## Summary

Get Summary

## Intro

0:00

First off, I want to give a huge thank you to our sponsor for this video, incog. They have a very special offer for you. It was so good. I actually personally signed up with the discount code in the offer today. My interview guest is Danny shean.

0:14

Danny might have a better understanding of what actually happened in just about every major 20th century American conspiracy than anyone I've met, and I know a lot of conspiratorial people shout out Alex Jones a lot of time. Think anra might have come from Mars. What, if you want to know who really killed JFK, watch this interview. It's absolutely crazy. Do you think that the CIA killed JFK? I do know who did kill him.

0:39

Oswald could not have gotten off the number of shots. this interview is an endless Wellspring of mind blowing facts from Danny that the that the craft have built into it some kind of an AI capacity to respond telepathically to the control of the of the pilot.

0:54

That's the key to it all from American industrialists and financiers secretly funding the Nazis before World War II so that they wanted Hitler to establish this kind of fascist government, the economic theory of which is: you place all the instrumentalities of the government at the disposal of the interests of the private corporations.

1:13

And the formation of the CIA as an extension of the great Gilded Age families, because the Central Intelligence Agency was the brainchild of the people at Brown Brothers. Herman. Danny even sketches a photo of a UFO that he saw firsthand in a classified facility in Washington while reviewing the Blue Book files for Jimmy Carter.

1:33

And finally, if you want a true understanding of the major players involved in the Watergate scandal, look no further than this interview. Danny's comprehensive knowledge of core American conspiracies is partly due to his involvement in like half of them. As an attorney, I was asked to be the attorney or Elon hubber. I could be given access to every single document anywhere in the world in the internal files of the Church of Scientology. I'm not kidding.

1:59

He was actually personally involved in the Watergate case, the Pentagon papers, Karen silkwood, and has personally represented UFO whistleblower Lou alzando, Harvard Psychiatry department head and legendary UFO researcher John Mack and the notorious Dr Steven Greer. So, without further ado, sit back, relax and be prepared to stay up all night, integrating your new worldview after hearing from the man at the center of every American conspiracy, Daniel P shean.

2:31

Different parts of the brain have different activities, but you know that don't me. But before we talk to Danny, it's important to point out that if you're watching this, you might be interested in other forbidden truths and want to protect your data. You probably don't realize just how exposed your personal information is on the web. there's an abundance of sites all over the Internet with personal data on millions of American civilians.

3:14

These sites get their information from sketchy data brokers who collect and sell detailed profiles of your online activity, your phone number, home address, family details, even your financial information. This is where incog steps in. They make it super simple to remove your data from these online Brokers and keep it removed.

3:35

I did it, and the drop off of weird calls and texts is astounding, and as bad as these annoying spam calls and texts you may experience are, they're nowhere close to the most extreme dangers posed by these Brokers. This data can be used for identity theft or even somebody showing up at your home if they have it out for you. if you value your privacy, you'll want to check out incog.

3:57

Use this discount code on the screen, American Alchemy to get a huge 60% discount off their annual subscription. Check the link in the description below. Exercise your basic personal online hygiene and take control of your personal data here with my new friend Danny shean, who knows probably more about every American conspiracy than anybody I know, part partly because you were involved in half of them as a public investigator and kind of people's Advocate, whether it was Watergate or Karen silkwood.

# Government UFO Disclosure

4:32

Now you represent a lot of the UFO whistleblowers: Steven Greer, Lou alzando, John Mack before that, who was the head of the Harvard Psychiatry department and studied alien abductions for the last 10 years of his career. so it's an honor to have you and I'm excited to have. I think we're going to have a pretty crazy conversation and terrific. Why don't we start actually with UFOs?

4:54

I think they're sort of very in the Zeitgeist right now. But I think a lot of people in the UFO closure World feel very frustrated because last year you have David grush from the national geospatial agency coming out blowing the whistle and you know, literally a year ago, August of 23, saying in front of Congress that we've had July 26th, July 26. That's right, okay, good, good. That's amazing.

5:20

Good memory saying that we have had a legacy reverse engineering programs. We've had crash retrievals of UFOs. We have them in our possession. you know, in various Aerospace warehouses do we have the bodies of the pilots who piloted this? Craft biologics came with some of these recoveries. Yeah, were they, I guess, human or non human biologics, non human, and that was the assessment of people with direct knowledge on the program I talked to.

5:46

That are currently still on the program and it's a sort of bombshell claim. And he's says that he's brought forward 40 firsthand Witnesses. People have worked on the program to the Inspector General of the intelligence community, monheim, and yet nothing's. You know, not a lot has happened since, and I'm friends with grush and I do trust him, and I think there's a. There's a lot going on there behind the scenes.

6:10

But yeah, what's your, what's your take overall and where we're at? there's a lot going on behind the scenes. M is the answer, and one of one of the things that PE people whove worked in Washington DC for 20 years or more realize that the public

hearings that take place in the Congress are kind dog and pony shows and that you know they're semis scripted.

6:35

As a rule, there's a decision made on high as to what's going to get said publicly and what isn't, what questions are going to get asked and what aren't. And so that there's a bit of theater involved, more than a bit of theater involved. What's going on in the background is: is the real deal making? And the challenge in Washington DC, among many others, is that everything is a deal. Everything is a negotiation, you know.

7:04

So, if you know, if the Republican Party proposes, you know, \$10 billion for a particular program, the, you know, Democratic party, you know, proposes 8 billion for the same program. You know ahead of time it's going to come out to 9 billion, because it's not a matter of principle, it's not a matter of you know what the program needs. It's a question of the kind of false dialectic that's going on.

7:28

So you have to get used to that to begin with, and now we've come into the scene with the UFO phenomenon and that there have been a number of passes at this in the history. But what's happened is since the one that everybody knows about is the December 17th of 2017, the front page story in the New York Times. Lou alzando and Chris melon.

7:54

You know and Chris melon, very importantly, was the deputy assistant secretary of defense for intelligence both under the Clinton Administration and under the bush W Bush Administration, so he's kind of a bipartisan.

8:10

You know, melon, Family Guy and Lou alzando was involved in the program that the Pentagon had a secret program Above Top Secret, the real elements of the program, where they were attempting to develop a weapon system and Advanced weapon system using the technology that they'd recovered from UFO craft, and the thing that people don't realize it was this big hubhub, you know, with the front page story in the New York Times and everybody's saying: oh, here's, two amazing

whistleblowers have come out of the shadows and they've come forward and they've made this extraordinary set of Revelations about the existence of this secret program and it turns out the whole thing was authorized.

8:59

I mean that the United States defense department office of pre publication, review and security had cleared all of those videos to be shown and had okayed the New York Times to publish them. And so there's this whole backstory going on that there's a pretense of kind of a insurrectionist kind, of whistleblower kind of group coming forward to reveal this information and challenge the Deepa secrets of the state.

9:30

But in fact there's decisions being made deeper in to reveal some of this. There have to be, yeah, and there also have. It has to be this sort of limited form of disclosure that's these people are sort of coordinating. because the videos, the three videos, you know whether it's go fast or gimbal or nimit, all these videos are not high quality, they're not high resolution, they're nowhere near what they there it's only one sensor.

9:55

And then they say they say: you know, we have a lot better stuff, you know, and so it's clearly almost like a roar shock test like or conditioning or something. It's like how are people going to sort of react? And then maybe we'll go a little farther in a couple years and then maybe we'll go even farther. Well, you have to be careful, because you can start speculating about what's going on there in the background.

10:15

I don't know, it's hard. Well what I've done that I got contacted by Lou alzando himself right after this happened. well for the context, for the audience. If you don't know anything about UFOs, Lou alzando ran an a tip, these programs from 2007 to 2012. He also was involved in a lot of interesting kind of counter, Intel and Recon for the US and was at Guantanamo Bay at one point.

10:40

I think he was deployed in Iraq and, yeah, been to his place in Wyoming. He's very interesting guy and in 2017 he came out as part of this New York Times Revelation. That's right. He was the first kind of whistleblower to say I ran this program. It was

actually under Senator Harry Reid, who was interested in UFOs. they had appropriated \$22 million.

10:58

Y, Harry Reid, Ted St from Alaska and danway and Dan inway from Hawaii, and they're all studying, you know, UFOs, a lot of which took place under Bigelow and on Skinwalker Ranch. So okay, Lou Alando, approach now you blown out the whole audience. Nobody knows what we're talking about. So the I have the same autistic, compulsory, you know, attention to detail that you do.

11:22

Yeah, well, the bottom line is that what's happened is that, for some reason, yeah, which we can explore. but for some reason there's been a decision that was made, you know, in 2017, at the very end of 2017, to come forward to begin a process of trying to establish control, literally, over the disclosure of the UFO information, and it actually generated an extraordinary piece of legislation that the United States Senate approved.

11:58

That was a 64 page bill that set up this complex process of undertaking a controlled disclosure and actually formulating a controlled disclosure campaign to go over a 7 year period to start rolling out information to the public, into the world. Therefore, about what it is that the United States government knew about the UFO phenomenon and about some vaguely identified nonhuman intelligence.

12:31

So what you're talking about now is the Schumer Amendment to the forward looking year 2024 ndaa National Defense authorization act. so it's defense budget. Every year, the and it was this amendment, and it talks about non human intelligence and the government declaring eminent domain over non human craft that's in possession of these, you know, private aerospace companies, and it ends up kind of dying on the vine because of Mike Johnson.

12:59

Well, not really, though, but that's the impression that again, people, it got diluted, it got passed, but in a very. What happened? What happened is that one of the most important aspects of the bill did get passed, and that is ordering. Here's

the Congress of the United States, both the Senate and House, signed by the president, ordering all six of the United States military services.

13:23

You know the Army Air Force Navy, you know the space force all of them, all of them, and all 18 of the United States intelligence agencies. There's a lot more than just the CIA. In the defense intelligence agency. In the NSA there's 18 of them right. And then there's 32 United States defense department agencies.

13:47

All of them were ordered by Congress and the president to take 300 days to gather together all, every single piece of information that they had about the UFO phenomenon and about any nonhuman intelligence that was understood to be responsible for the UFO phenomenon. Gather it all together, put it into digital format with an index so that it's recoverable and searchable, and have it ready by October 20th of 2024 to be turned over.

14:18

The Senate Bill said immediately to the National Archives. that got changed in the house, but only in a minor way, in which they said they were to turn it over as soon as possible after having it compiled. But that whole process was extraordinarily important and it was a key portion of the bill that the Senate passed and that got passed by Congress. That is the law right now.

14:46

So that whole process is going on right now. So so the bottom line is that piece got passed. You know, the big thing in the Senate bill that did not get passed was the creation of an independent panel. There was a board of review that the senate had proposed that' be an independent board of review that got to look through all of this information and decide how much of it is going to be made public.

15:13

Okay, and they put in a provision that the president of the United States could personally postpone the public revelation of any piece of information that the board chose to make public. But that was a big piece that was cut out. They didn't.

15:31

The house didn't agree to allow an independent panel to review all of this information and decide how much is going to be made public, so that the information has to be gathered together and made available in the National Archives. But then it doesn't necessarily have to go anywhere.

15:48

That's where we are right now, but the Senate, the Senate intelligence committee people and the house intelligence committee people will get to see it and that's key thing you know, to get to get the Congress briefed in on what it is that the executive branch has been doing all of these years, since the last 80 years. Basically, it goes back to basically January 1st of 1945 is the actual operative date in the statute.

16:18

Every piece of information, every phone call, every memo, every internal study, every report of a UFO sighting, every single piece of information that they have has to be put into this compendium. So that's happening. That's happening right now. That's amazing and that will that be public? Or that was going to be question as of right now?

16:38

The operative order of the Senate was that it had to be turned over immediately, on October 20th, to the National Archives and be made available to the members of the intelligence committee. Okay, the house has changed that language to be made available as soon as possible, which is a wiggle phrase, you know. The question is, how quickly are they going to turn it over? But they have to have it compiled by October 20th.

17:03

So that's the law right now, and a lot of people, even in the UFO Community, just think: oh, the law got gutted, it got made. That's fascinating, but this is extraordinarily. That's really important. but another very important part of the law is the idea that government is going to declare eminent domain over UFOs, the actual like crafts that these aerospace companies have in their possession.

17:26

Well, they have the right to do it if they choose to. Yeah, and but that automatic, but that got gutted. That is no longer part of the bill and my understanding of the behind the scenes. What might have happened is Mike Turner, who is on the. He's the chair of this house intelligence commit, chair of the house intelligence committee, but also represents Dayton, Ohio, which is where right Patterson Air Force Base is.

17:49

All the UFO rumors are centered around right Patterson Air Force Base, of them holding kind of craft, and his top three donors are, I think, locked. You know, I don't. I don't want to mess up the other two, but two other big aerospace companies, and you know he works through Mike Johnson to kind of take that out of tumor. That's right, and so I find that interesting.

18:11

Where do you think a company like lockie Martin actually see like? How do you think they see the UFO thing? Because they see it as a profit, making potential profit. There's no doubt about how they see it. Well, Ben Rich, who's the president of Skunk Works, their most secretive division, used to call UFOs unfunded opportunities, and then 201, you know theying with tomong, who's the Blink 182 FR.

18:36

And you have Rob Weiss, who is, you know, Ben Rich's successor at Skunk Works, and emails between him and Tom dong that were revealed through Wikileaks, where it's clear that locked wants to like talk more about the UFO. You know phenomena, but then they work through a guy like Mike Turner later, you know, last year to kill this bill, so that feels a little SK.

18:59

They sort of want to do it on their own terms, or they just they want to get. They want to get Congress to know enough about it, which they don't yet to agree, to set up a law that authorizes them to get patent rights. That's what they want.

19:16

They want to get patent rights to the technology so that the United States government, for the next thousand years, when it wants to have access to any of the technology of the UFOs for super luminal, flight or anti gravity stuff, is going to have to

license it from the private company and pay them a ton of money for it. I mean it's just absolutely. You know, it's just avarice and greed. You know, got it.

19:41

So that makes sense. So they want like a broader public knowledge or Surface area on the topic, but they don't want any of their IP taken out of the company. That's right. Yeah, I mean that makesense. They want to make as much money as possible on it.

19:54

And here we have a an event taking place of the World getting ready to be made aware of the fact that there's this hum humongous other civilization around us in the in our galaxy. What's the evidence that it's extraterrestrial and not some time traveler? Or like the fact the fact that people have been face to face with them and had telepathic Communications? Sure but sure.

20:21

But for every one that says they're from Zeta reticuli, they also say they're from the future and they're also super deceptive and say all sorts of other crazy stuff. Those are people in the UFO Community who say all that they kind of make up stuff, you know. But the but, the fact of the matter is it's just as plain as day.

20:38

No, but I mean, if you look at the Edgar Mitchell datab, any of the databases around this stuff, I actually think it's split like. I don't think it's clear that they're from another planet. In fact, if we, there's one homed species on Earth that's sentient, up right by pedal, that has advanced technology, and it's us. And there are 20 billion earthlike planets in the Milky Way galaxy, but they're over a trillion non e earthlike planets.

21:03

So, and we're seeing a thing that looks like us: yeah, they're hominid. So the likelihood of evolutionary convergence on a totally foreign planet is just super slim. And so the aam's razor explanation would actually be that there's something

emanating from they're. They're sort of related to Mankind and they could be Interstellar, they could be a different timeline interacting with us. I just think we have to widen aperture of possibilities.

21:30

Oh yeah, no, I mean they're, but not to the point of just obfuscating obvious. Sure you know the. Yeah, there's a thing, there's a phenomena, but I do think it's called the phenomena for a reason because it's sort of really hard to classify. It's because the conversation that you're talking about now has assiduously excluded all the evidence of face to face contact that people have had.

21:54

I mean there are thousands of people who've had face to face contact in tele, in telepathic Communications, with the actual occupants of. The Craft which there's this huge effort to kind of pretend. That isn't true. Like that isn't true because there aren't enough government circled people in scientific Community, people who've affirmed it yet.

## Alien Encounters

22:16

well, that's a good segue into the first UFO related person you represented is John Mack.

22:21

Right, and John Mack was the head of the Harvard Psychiatry department and I think he, U through his friend Bud Hopkins, his childhood friend right, started to see all these cases, these people who no mental health history, right, it wasn't even always through hypnotic regressions. They would just say I had these experiences where I was abducted by, you know, these aliens and he started to take it very seriously.

22:46

And so yeah, what do you think about John Mack and his investigations? Well, I represented him for 10 years and met dozens of people that he had worked with, was involved in vetting them to determine which ones were credible and which ones

weren't, what detailed information they had and have talked to.

23:08

You know several absolutely totally credible witnesses that I could put in front of any American Jury, and the jury would be absolutely clear that they were telling them the truth. That who have had Direct face to face contact with one or more of these extraterrestrial beings? You know they have them in American Underground military bases. They have the beings. They have the beings. So they've interviewed the beings.

23:36

I've talked to people who were there when they were interviewing the being. Where are the beings being? That particular one was at S4 in Area 51, in outside of area 5, about 11 miles away. So I would totally distrust that. But I have some good friends who are very trustworthy. So they're a couple and the husband broke the world record for the biggest wave ever surfed, and now nazer Portugal.

23:59

His name's Garrett mcnamer and her name's Nicole, and they're very good people and they would just would never lie, and they have a friend who worked at Area 51, or it might be a friend of a friend, but they met him and he was totally traumatized and after having worked there, yes, and he said that he went, was led down into a basement. That's right, and he saw reptilian creatures and they were.

24:23

They were speaking, Yeah, English, well, they were, they're telepathic. They're telepathic. They talk French to French people, they talk German to German people, but they're telepathic. But isn't that we? That's strange though, right, strange, yes, yeah, there's no doubt about that. So, but then, like if they're that advanced, they're telepathic. They can fly, you know, faster than light. then how the hell do we Corral them into underground bases against their will?

24:49

Or is it are they happy to be kept? Well, the one of the ones that I was I was talking to the guy who was there when they were interviewing one of them. It was clear it was voluntary, that the Extraterrestrial being was voluntarily talking with them. Was

Shar was having telepathic Communications. So they was being interviewed. They're just kind of hanging out in these baces. Well, that I wouldn't put it that way.

25:13

What do they want? Why are they there? What happened? What happened is: is Albert Stein was this guy's name? He called me on his deathbed. He was dying up in Northern Minnesota, called me and wanted me to come and see him right away, cuz he was dying, and so I flew there and went and met him at the hospice and he's sitting there with all the tubes in him and dying and he said: look, he had to tell somebody about this that he was.

25:44

He was the United States Army was assigned as a clerk typist to Project Blue Book, and that while Blue Book had this whole buffaloing operation going on. You know telling people that it was swamp gas and you know birds that they had misidentified, that there were over 700 actual sightings that they found it absolutely impossible to Discount, that they couldn't come up with because too many people had seen him.

26:10

You know, there too many corroborating witnesses, there was radar tracking and everything, and he was assigned to the group that was investigating those sightings and he would just and they' send people out to interview all the people that had seen one of these things and then they' come back and give them, give him their reports and he would type them all up.

26:31

And he was there for years and got to be close friends with the guy who was the commander of that unit, and the guy came into him. After a number of years. They shared certain kind of religious views.

26:45

He with a commander, and the commander came in and told him that he was going to be going to Area 51 and wanted him to come with him as the clerk typus just to kind of monitor what they were doing.

26:58

So they went to Area 51, they got taken to S4, went down a number of flights down at S4 and they came to this area where there was this: a big room with a two way mirror in it and there was an extraterrestrial being there.

27:17

He was, like you know, 5 and 1/2 ft tall, almost 6 feet tall, had a kind of a light blue jumpsuit on that they'd given him and he was standing there and this guy, Albert, wouldn't go near him. he was just traumatized by the by the guy, and he said he thought he was demonic and didn't want to go near him.

27:39

But his Commander went in and was having this telepathic communication going on with him, and so he stayed outside and the people that were there Staffing the area they showed him they had these card files where they had been interviewing the being voluntarily and he was answering questions that they had, and one of the questions was: you know where do you come from?

28:05

And he said that he was part of a group of beings that were from different star systems in our galaxy and that they were part of a team that were going around inside the Galaxy, look checking on places where life had actually begun on different planets, and they were sort of monitoring where what they were doing. And they asked the followup question. They say: well, what who's in charge of that? Who, what kind of?

28:36

They didn't say it this way, but what kind of juridical entity you know is there that's coordinating this kind of a thing? And he said: well, you people would refer to it as God, but it's very different from what you think. That's what he said. And so they spec. they specifically said that they were from different star systems and different planets inside our galaxy, and there he was.

29:02

Did he go more into the God thing, how it's different than he did? That's all. That's what he told me and that he wanted to. He wanted to share that with me and he said that he didn't believe him. He didn't believe it because he thought he was demonic and therefore he wasn't ever going. He never told anybody about this in his life and he was dying.

29:21

So he wanted to tell me that this had happened. This is this guy was on his deathbed. Yeah, really, what's his name? His name is Albert ber Stein. Albert Stein. He was a. he was a CL typus, US Army clerk typus, assigned to Blue Book, to this special division of blue book that was investigating the 700. That's absolutely insane. Do you have a video of you talking to him that? No, that I just.

29:46

He just wanted to come. Have me come and see him. So I went and S and talked to him. Do you have, do you have other deathbed confessions like that? No, okay, no, I have. I've have interviews that I've done with people live, people who've had different kind of encounter, exper, you know both. For example, also you know barbar lamb. You know Barbara lamb.

30:08

No, Barbara lamb is a was an associate of John Max okay and she's a professional psychologist, and she had a practice of kind of helping people who had these kind of traumatic experiences, of thinking at least that they'd had a direct encounter with a landed UFO that was on the ground, that they would have a direct contact experience with the occupants, and most people find that fairly traumatic.

30:35

Yeah, and so she ended up counseling dozens and dozens of people over a 50e. She's like 90 years old. She just became 90 years old and she's provided to us her archives of all the recordings of different people that she has had sessions with right.

30:57

And so, after all these years, 50 years of interviewing dozens of people who've had this kind of experience, she was kind of longing as she was approaching 90, kind of wishing she'd get to see one. You know, she'd never seen a UFO, she'd never seen a being. She was kind of lamenting this.

31:15

And then, one afternoon, she came in out of her garden, into her house, and here was this reptilian guy, wow, standing in her living room, you know, just standing right in the middle of her living room, and she was kind of taking back, but he was giving off really kind of EX, extremely friendly, positive kind of Vibes.

31:34

He wasn't scaring her at all, you know, but, and she, he came over toward her and he said: look, you have been wanting to get to see one of us, and here I am. So I'm just wanting to let you know you've been doing this a long time, and so that here I am, and then he turned around and left.

## Remote Viewing & Scientology

31:55

Do you have any takes on the UFO thing that very few people agree with you on or that you know are really out of left field, sounding to the average person or something? All of them are out loud enough. yeah, I mean yeah, but in a world where, like it's actually seen as somewhat conventional to believe in at least the phenomena itself.

32:15

Do you have any sort of really contrarian takes on how this stuff works or no? The what? What I, what I do believe, is that it has an awful lot to do with Consciousness. Yeah, that they're monitoring us, trying to gauge our state of evolution of Consciousness. Yeah, because that's a very big deal. Yeah to them. Yeah, I AG, you know they use it to drive their craft, to navigate. They do. They tele, telepathically, communicate.

32:48

You know that this whole thing of the level of Consciousness that we're at is really important to them. Do you think Legacy programs have made any sort of progress on this? it's kind of a branch office of it, which is the remote viewing stuff that hell put off and the targ and those guys have been involved in. Do you think that's still in effect? And oh yeah, oh, there's no doubt about that.

33:10

Yeah, I mean that's really sophisticated stuff. I mean really sophisticated stuff. What gives you conviction there? I mean, obviously it pops up in Skin Walkers at the Pentagon that they're studying it, you know, as part of a tip and assap or whatever, but like that to me is small fish. You know it's not a lot of money.

33:26

No, it's a big deal in that you know, when you know what they accomplished in that program, which they're lying about, to everybody say: oh well, you know didn't get very far, they couldn't. They kind of shut it down. So what do you think they actually accomplish? Well, I'll give you an example. Yeah, because i' I've read the whole file on it. Or you just talking about, like Joseph mcmonagle? No, I'm talking about Pat price.

33:51

Okay, what happened with Pat price? Again, Pat price was such an accomplished remote viewer, yeah, that they actually he got. He got to a point where they this one particular thing and the reason I saw this parenthetically is that I was asked to be the attorney for Elon hubard you were in the Church of Scientology. No way. So how would you connect Scientology and remote viewing?

34:20

I mean I know how put off was Scientologist for some time, but H put off was and so was Pat price and so was Ino swan. Mhm were highle clears of the Church of Scientology. The FBI and the justice department in New York subpoenaed the top 10 people in the Church of Scientology in New York and ordered them to come in front of a grand jury.

34:39

And they were going to be interrogating them in front of the grand jury. They called me again and I went up to New York CU. I'm admitted in the southern district and I got an injunction shutting them down. So they couldn't do that because it was totally unconstitutional again, and so they were so sort of inured of me they that they talked with Ron. hub R hover wanted to have me be the lawyer for them.

35:00

You know, with him and his wife Susan. You know, against the IRS, that whole thing they were doing. So I said that, look, I wouldn't even meet with Ron Hubbard unless there was a condition precedent that I could be given access to every single document anywhere in the world in the internal files of the Church of Scientology. I figure that was a real non starter. Right, yeah, of course.

35:22

And within a week they came back and said: it's a deal, what do you want to see? And so I could query anybody's eer results, anything I could get, anything I wanted. And so they flew me down to Florida and the big blue cube.

35:36

They've got down there, this big, huge blue building, and so I go in and there's the head of the Guardians office, us Guardians office and the international head of the Guardians, you know, out of the UK, and they say said: so what do you want to see? And I said, well, first, what I want to see is the file you got on me, mhm. And the American guy said: no, why?

36:02

No, we've got, I don't no. And I said, excuse me, I said, what do you think? I fell off some melon wagon somewhere. I said, you know you're going to have me to be Elon Hubbard's attorney. You don't have any file on me at all in the international guy says: go, get him the file, you know. So they bring me the file I'm going through. how deep was it? How much stuff did they have?

36:20

Well, they had they had. You know, I me pictur pictures of me, what I you know I was at. I was a Jesuit candidate. I was at the headquarters, you know. They would follow me around. They showed me in different restaurants, you know, and meeting with people. You know, Mark Lane and some of the other guys. You know they. So Mark Lane, he was like Kennedy assassination, investig. Yeah, yeah, rushed judgment.

36:38

He was the author of that, you know. So you know they had all these kind of things. And so I said, okay, good, I just wanted to make sure that it was, that it was accurate, you know. and then so the international guy says to me say: okay, so what else do you want to see?

36:50

I said I want to see the three most sensitive files in the entire world, according to you, as the head of the Guardians office, you know, and he just went. Oh, he said I said so either you get him or not, you know.

37:03

So he gets up and he gone and Rees around, comes back and he ends up laying one of the files in front of me and I started looking at it and it was all reports by Ingo Swan. Ingo Swan was filing reports with a head Guardian office in UK about the entire internal operations of the Office of Naval intelligence remote viewing program that they were doing.

37:27

He was just giving them all the information, and so he was a spy or something. Yeah, he was a spy for the Church of Scientology, for the Church of Scientology, over and against the Office of Naval intelligence. Why would he do that? Because he was a high level clearer. That was his loyalty group. His loyal he was. He was loyal to them prior to. That's right. That's right. Over and above over.

37:50

I always thought put off was like looking into that stuff. Cuz he was like an NSA guy before he was a Scientology guy. So I thought off was just like tasked to, like looking into this. You know, very, you know parag governmental intelligence organization, that is Scientology. That's seen as a threat, and so you know, put, get, put off in there. no, this was a, I mean the Church of Scientology.

38:13

You're not aware of it that their highest principle, yeah, in the Church of Scientology, is all to do with UFOs? Really? Yeah, they believe that there is a major confrontation going on, mhm, between the humanlike people from the pleades over and against

the reptilians from Zeta reticuli, and that there's a major confrontation going on over which of them is going to actually assert major relations with our planet. Do you agree with that world view?

38:47

No, I don't. I, but Swan was like fully in with the Scientologist giving them information on the Office of Naval intell, and so you're also saying that there's a remote viewing program that was deeper than St Target cuz. That wasn't Office of Naval intelligence, that was Dia after CIA, what? no, this was AO and Pat price. Some idea how deep this goes, Pat price? You know they had the file.

39:09

Inos Swan had the file that Pat price had gotten so good remote viewing that they assigned him a task of. They gave him the exact longitude and latitude down to the minute and second of a location, and he was assigned an artist so that he didn't have to do these hen scratches trying to P show it. But he was and he was saying: you know I. So what's there?

39:29

So there's this major building here, uhhuh, and there's big fence up with razor wire on the top of it and everything, and his facilitator, uhuh, was Russell tar uhhuh. And so Russell was saying: okay, now can you get inside the fence? can you see anything inside the fence? He goes: yeah, okay, all right, yeah, I can. I can see inside the fence and there's just this snow man's land there.

39:54

Can you get to the front door of this place? And he said: all right. He said, okay, all right, I got it. Yeah, okay, I'm in front of the front door. He said, can you go inside the building? He said, let me see here. Okay, yeah, I can see, I can see inside the building here, he said, so what do you see? Say this big long hallway?

40:13

There's some doors on both sides, and Russell said: now, go down to the third door on the left. He said, okay, said, can you go into the room? Yeah, I can go into the room. So what do you see? well, there's big desk there and chairs and stuff. There's a big file cabinet over in the right corner over here. Go over to the file cabinet. F goes over the file cabinet.

40:36

There said: second drawer, first file. Read it to him and he did. What was it? Well, that's not the point. The point is that he did it, yeah, and he can do it, you know. And it turns out it's an American facility, it's a top CIA security facility. That's insane, then. So anybody with remote viewing skills can get the nuclear codes, not anybody. But Pat price could the best.

41:00

So that's Pat Price, Right M, and in the same file it points out that Pat price had actually evolved to the point where they could take a full photograph of a boomer class Russian submarine, nuclear submarine, and show it to him and say: where is it right now? And he would give them right down to the exact longitude and latitude, down to the minute and second of exactly where that is.

41:27

And he visualized the whole thing and told him exactly where it was. But there was a huge UFO right over the top of the water where that thing was and it was tracking it and monitoring it, and he had it in the file. You know I'm going, whoa. I said this is, this is pretty wild. and then I said: okay, so what else have you got, you know?

41:54

He says well here, and he said I said: show me the. Show me the second file. They showed me the second file and it was again from ingos Swan. It was a deep inside report from inos Swan that they had taken Pat price in the program up to Southern Canada, south central Canada, just north of the state of Michigan, and he was in.

42:17

He brought to this little facility was like this little domed little building and it had these big, huge dishes on top of these community vacation dishes on top and they brought him in and they set him down and they put this helmet on him and they had him think a particular message and they turned all the D, the big antenna, down to the northern Peninsula of Michigan, that little section that's in there, and had him being telepathically projecting.

42:49

You know, when it comes time for you to file your national, your US income tax forms next year, file them in this little post office box down this little town down in West Virginia, and 85% of the people did it next year. No way, absolutely way. That's insane, it's. You keep saying that. So you're saying. you're saying that. You're saying Scientology had some sort of Mind Mass mind control. It wasn't the Church of Scientology.

43:22

What was it? This was the program, the program. The Office of naal Intelligence. This was the program. But that's like. The implications of that are crazy, would? No, they're profound. Yeah, not quite crazy. Well, it's crazy. Do you think that there is a part of our government that interacts systematically with this other life form? Because, like if you watch the movie contact, you know Jody Foster walks into the.

43:50

You know this plane, and it's almost like. The implication is this guy who's been like kind of tracking her, but he's part of this strata of the world that's just very elite and he kind of interfaces multibillionaire guy, multi billionaire guy. Do you think that is the case in our world? i'. I'd put it a little bit differently.

44:09

Yeah, I have no doubt whatsoever, no doubt whatso, zero doubt that there's an element inside our government structures that is part of the intelligence Community, as part of the military, that have direct knowledge about the existence of these extraterrestrial beings that are here on the planet. But are they systematically in touch with them, like: do we have treaties or agreements? Or that's a question of degree?

44:41

Now, the question, then, would be: is that, in light of the fact that they know that they're here, that it would be almost impossible to believe that they hadn't made efforts to have some kind of communication with them, sure they aren't going to just let them sit there. Take that a step further, though, and say that we've made agreements.

45:00

Well, it's you have to take it one step at a time that I think that they clearly would have made the effort to have communication with them. So the next question you have to ask: is it reasonable to believe that the beings would have

communicated with them at all?

45:17

There does seem to be some sort of a tacit understanding that they have about being able to coexist in some way, whereby the United States government isn't going to just run out and say: oh, everybody, there's being from another system, you know, star system here on our planet, you know.

45:36

So they obviously have got some sort of protocol established here where they're not going to be revealing it and the beings themselves are not just going to land on in Central Park and tell everybody: why do you think the UFO stuff needs to come out?

## Internal Government Psy-Ops

45:51

Is there a forcing function because I go back and forth myself where you know?

45:56

I think actually people who know me well are surprised that like I'm as skeptical as I am, even though, like I do, all these interviews or whatever where it just feels like a lot of the thinking is really lazy and poor. You know, we talked earlier about the example of like. You know there just so many scops and stuff.

46:16

I was sitting in the UFO hearing and I was just like these people don't know anything like. honestly, I had two thoughts simultaneously. One is: I'm so moved that this is happening. This is amazing, this is a watershed moment. And then, on the other hand, if you wanted to pull off a scop on these people on like the government itself on the, on the civilian government, it would be easy because they have no idea.

46:37

You know they're getting spoonfed all sorts of stuff. I actually was with a friend yesterday who told me and I'll keep him anonymous, but he's a prominent professor at a, you know, a pretty well respected University, who looks at this stuff kind of behind the scenes, the UFO stuff, and he was talking about evidence given to a congressional staffer.

46:59

Congressional staffer gave it to him and some of his hardcore ufologist friends, and they were like: oh, this is a, this is a hoax from 30 years ago. And the staffer went pale in the face because he was so sure that you know he was given this stuff in a classified setting, in a skiff, as if it was real. Yeah, and so this is like kind of crazy.

47:19

So so you got your finger right on it. Right now, Jesse, is, that is the level of non competent. Yeah, on the part of all human beings, all organizations, you know, is more than their image they project. Yes, you know that they've got a whole marketing thing of. you know, here's who we are, how effective we are, how perfect we are, Etc.

47:39

And but if you really become more and more familiar with the details of it, you really realize that there are all kinds of vulnerabilities that organization had. The thing that actually makes me think there's a there is there like a lot of pretty serious people involved.

47:55

You know, I'm, I've become decently close with Carl Nell and, like I consider crush a really good friend at this point, sure, and it's like these guys are pretty hardcore guy, they're very knowledgeable and it's like a big waste of Human Resources if it's just a scop.

48:10

And so the question: is there some sort of forcing function that is causing the program itself to allow some of these defectors oh out, because they realize this thing is bursting at the seams and they need to get in front of it or something? And so it's a good start. It's a good start. Yeah, well, what do you think?

48:28

Because my belief is like I take it face value and fully trust David grush when he says that he sort of stumbled upon this stuff, and then where I think people are maybe a little naive and I kind of hinted at this in my interview with grush is like the whatever the defection is from, the internal program has to be somewhat coordinated.

48:50

These people have no immunity because they haven't come out, and so like the idea that they don't have some authoritative opice under which they're operating. You know they'd all be dead if they weren't. And so there's some, somebody somewhat in charge in whatever programs that do exist, you know, has. They've said you can, you can come out to this degree. That would be my mental mod control disclosure. That's the key to it all.

49:16

And so, and then the question is: are we just seeing the tip of the iceberg? And the tip of the iceberg looks nothing like the bottom of the iceberg? Or does the tip of the iceberg resemble the bottom of the iceberg?

49:28

So we're getting a snapshot of what we knew, maybe in the late 40s or early 50s, and we're getting some sense of Greater enological truth, and it's just, you know, kind of we're get, we're working our way down into some core truth. I can see all these little 3x5 cards going up on the wall. You know that you're kind of laying them out. Here's the possibilities. There's this. It's all true.

49:49

You got to get them all up in front of you and all the things that you're saying are things that Merit exploration, MH, you and some of them are internally and self referentially consistent. Some of them aren't you know, so that you can drop some of them down into different baskets that are consistent with each other. That's how you go about doing this. yeah, you know, in that obviously I've thought about all these things.

50:12

Yeah, you know. And representing Lou and in talking with Carl and talking with David and you know, in discussing these things with them, you know, but I keep, I consistently refuse to get a security clearance. Yeah, I will not do that, yeah, because then, whatever I know about, they're going to try to say I must have gotten it through the security clearance and then I can't tell anybody, right, you know.

50:33

So I'm not going to do that. Yeah, and I know more than a lot of them do.

## John Mack & Alien Abductions

50:37

You're a Harvard trained psychiatrist or a professor of Psychiatry, at Harvard, to be exact? I admire John Mack a lot. He seemed like a very Earnest, good guy. what do you think his mission was, at the end of his life, like?

50:50

Do you think it was just to kind of destigmatize things for kind of the, you know victims or abductees in these cases? Or, or was it to spread some sort of new worldview that he had or well, he had. He had at least two different missions. You know. He was running the peer group, the project for Extraordinary experience research, and that I was legal counsel for the group.

51:12

That was where I got to meet lots of experiencers and help vet those people, and John and I had both decided, more or less at my suggestion. Actually, as it turns out to try to train them, mhm, that if they're going to get repeatedly abducted, you know, why don't we train them to do holotropic breathing and just stay calm when it starts to happen and then question the ET people and we'll give you a sets of questions to get information from them, you, so that we can start getting direct line. Have, like a diplomatic, reach out to these people.

51:42

Did they get anything interesting? no, what it was is that she study car on was she was furious at the UFO people because she'd been abducted and then when, after she had been returned and couldn't remember exactly what happened, she found that she was pregnant and she hadn't been with anybody for like over a year.

52:03

She couldn't understand what was going on and she was pregnant, went all the way through to the end of the first trimester and she was going to the obti and getting. She couldn't figure out what was going on and then she gets abducted again and she's not pregnant anymore. And and she was just furious about this, about what they were doing with her.

52:26

So when I they would show up again, she would actually throw things at them. she would like throw lamps at them and, you know, kick them and throwing things at them. And she was outraged at these guys. Right, and and she was one of the people that John was interviewing she came to work with John.

52:45

So we agreed she's one a good candidate to kind of get her trained, to get her to come down and do all that. And we did that. And she, the next time it started happening, she used to say her like the hair would kind of start to stand up on her arms and she could get this weird feeling that it was getting ready to happen again. So she could tell.

53:02

And so she started doing the holotropic breathing. And so these three little dudes show up, you know, in her living room. They brought her onto the craft you know totally conscious now about it and they have her have to take off all of her clothes and get in this pool, this kind of like pool filled with this kind of gelatin, kind of weird aqua colored gelatin stuff, and she'd get in and she had to breathe it in and fill her lungs up with it and stay under there for a while, and and it was a very weird experience yeah, and then they bring her to this other place.

53:33

She didn't they? They took her off the craft and brought her to the. She couldn't. she didn't see the environment, she didn't see what was going on Outdoors, but and there was this little hybrid, like 2 year old girl you know, really kind of stringy hair and kind of big eyes, but she knew instantaneously that was her daughter.

## **UFO's & Nukes**

**53:51**

You know the critique everybody has of the UFO thing.

**53:53**

They say it's not scientific because it's inherently ephemeral, it's not repeatable. I disagree there. No, they say there are no patterns. It's, there are patterns. The two patterns that I have noticed are: one is people who are in heightened States Of Consciousness or engaging in specific protocols or whatever, or the nuclear connection.

**54:14**

You have 170 ICBM security Personnel radar operators, people who work at nuclear bases across the United States who are have to be the picture of mental health. in fact, many of them are on the PRP program, the personal reliability program, where they have to report if they're on ibuprofen. Yes, because they're guarding the crown jewels of the United States defense. They hit the wrong button. It's no, not good for us.

**54:38**

And they claim to have consistently see anomalous objects in the sky, sure around their nuclear bases. In fact, there's a really great book called the UFOs and nukes, by a guy named Robert Hastings, where he Chronicles all of this stuff. He's a super hard headed, you know, detail oriented guy, yeah.

**54:53**

And there was even a case in as late as 10, right after he retired in 2008 at Fe Warren in Wyoming, where there was an outage for an hour and Wired Magazine wrote it up. and they're like: why is there's an outage at a nuclear base like that's a big deal

in and of itself.

55:09

Hastings back channeled with the missileers there and they were all like, yeah, there was a Tic Tac shaped object, oblong object, flying in the sky and that caused the outage. And time and time again you hear of all these cases and those guys careers have been hit because of report rep in this and the Air Force office of special investigations continuously shows up and kind of makes their life a living hell after they experience this.

55:34

So anyways to the people that say: this isn't sort of a repeatable thing, it's not true, it's not true. Yeah, it's just that they're ignorant. yeah, you know, I mean, the only thing worse than being ignorant is being ignorant and then arrogant about it. Yes, you know, and that's the way lot of the people are. Yeah, and so that what I've said is: I've just ignored that you know.

55:56

Say you know, if a person is ignorant, you don't have to beat up on them over it, they're just ignorant and you don't have to be insulting to them, because if they're ignorant, they don't know it, and so they think you're wrong when you accuse them of being ignorant. Yeah, so there's no advantage to that.

56:11

But there's a whole other level of people in our human family that are not ignorant, that follow protocols and try to figure out what's really going on, and that's what we're talking about here. And one of the most important issues that this element of our human family deal with is the UFO issue.

56:31

Uhuh, and the reality is that it mixes in with these psychic faculties and that the so, even though you have something, is, dare I say, prosaic, as extraterrestrial beings who have, who have been like two billion years more technologically advanced than we are and psychically advanced than we are, you know, who happen to have been figured out how to come and go from our planet.

# UFO's, Religion, Experiencers & Psychic Ability

56:57

Okay bang, you know. But then there's all this other stuff.

57:01

There's all this other strange phenomenon that goes on our planet that exists at this other level of insight, such as the capacities of our human family to have telepathy and teleportation and astral travel, in remote viewing, in transmutation of matter, you know, and but what we've done is we've culturally riveted on some of these beings in the past, like Jesus or LSU or the Buddha, and say: wow, look what these look, what these individuals have done and what they do is they build up a complete religion around these people and then they, a tenant of the religion, is that you can't do this?

57:42

Yeah, this one individual person could do this. Yeah, and therefore there's something super nonhuman about them. They're transcendental, they're spiritual, they're, they're from some other domain somewhere you know. it's not true that what they are is there mutations of our human family, that, as this faculty is evolving in our human family, certain individuals have it more fully evolved than others and they attract attention when this happens. You know, that's what's going on.

58:15

As I say, this is another element that really intelligent, thinking, careful people who are not ignorant are interested. So you're saying it's almost the metal layer to or the source code of religion. In some ways this. There's no doubt about that, and it's funny because you know we. You probably know Diana Pula, who's a religious studies professor at UNC Wilmington.

58:40

She originally wrote a book called Heaven Can Waade about Catholic purgatory and specifically she was chronicling a lot of divine intervention. quote unquote experiences from. You know, Brothers, nuns, people associated with the church, yes, people who are, you know, seen in her eyes, is fairly credible Witnesses.

58:57

And she would actually go back to the Greek and Latin of the translations and she would consistently find that there was almost a one-to-one match between that and the description of. You know, if you read John Max abductions, you know book, it was the same thing. It was like an orb showing like St Francis of Assisi. She just sees a an orb showing up and it, you know, he has radiation damage.

59:22

And so you know, may maybe we're actually uncovered sort of the source code of a lot of these sort of quote unquote Divine experiences. No, that is true. do you think that the Angels and Demons, kind of nomenclature that's just been used, you know, across civilizations that might, that might just be it.

59:41

And the reason I ask is because there was actually, there's a book called Final Events, by a guy named Nick Redfern, and he talks about. There's this Evangelical Christian group that was very embedded in the CIA, called the Collins Elite, and they were at right Airfield and they were studying demonic entities and they were doing all sorts of weird cabalistic stuff and they were attracting these sort of. You could say, similar to.

1:00:06

You know the protocols of amist, like neoplatonist or Thomas Aquinas, is kind of Angel hierarchies. you know beings between us and God which have been believed in for centuries, and they then came out of that study saying: this stuff is demonic, it's evil. You know, maybe we are actually living. The Book of Revelations and this stuff showing up is, you know greater proponents is actually really bad and they started to campaign against it.

1:00:33

Yeah, well, there are different lenses through which you a worldview that you can perceive this thing, and there's no doubt that is one of them. You know that is one of the lenses through which they're perceiving this entire operation, which is that is that scary? Are we at the end of history or something that feels like sort of a paradigm shift?

1:00:51

No, it is a paradigm shift, but that doesn't mean you're at the end of History. it means that you're, there's sort of a full aadal jump, you know, in Consciousness. That's what's happening right now and it's generating a lot of instability and people are

becoming, you know, disconnected to reality and not trusting in facts anymore and speculating wildly.

1:01:14

And you know, trying to figure out what's going on, you know, in the UFO phenomenon is an integral part of that and the whole relationship of psychic capacities of our human family are directly related to this. You know, in the whole issue of religions, trying to figure out, you know, whether there's some new religion that is birthing here that relates this.

1:01:40

And but remember that religion, the Latin root of religion, is reare, which is like to relink, and ever since the evolution of the intellect in our species of homo sapiens sapien, the in us, the Latin root of intellectus is the ability to distinguish the difference between and so that we've been able to experientially experience the difference between ourself and all the rest of our environment, and that we've developed an intellect that is able to manipulate that and kind of computerize it and mathematize it and all of that, and to primarily, to manipulate physical reality around ourselves.

1:02:21

Do you think you know? It almost feels like the most underrated narrative here? it's not as much, maybe, about the crafts that were trying to reverse engineer, but it's about the people that seem to attract this phenomena. And so, like Betty and Barney Hills, this famous, you know, case in 1961, you know they see this craft coming. I think it's in Vermont or New Hampshire, New Hampshire, that's right.

1:02:45

And CD Jackson, who's in the psychological strategy board under Eisenhower and also runs kind of our psychological warfare program during the war, during the war, and was the editor in chief of Life magazine. There you go, FR Hen, Henry loose. Yes, he comes, he goes to New Hampshire and meets with Betty and Barney Hill, and so there's a special interest on the part of the government among the people who've been contact.

1:03:15

Now you have this guy, Chris bledo in North Carolina, who, like you, have this guy, Jim semivan, who's a hardcore Intel guy, top ranking CIA official, who's, you know, 20 year Intel career, and he some. Why is he showing up at Chris Bludso's house

and asking him what he's you know? Chris bledo says he's encountered this divine feminine figure that says she's come from the Dark Side of the Moon.

1:03:38

Is semivan just wasting his time spending time with him? It almost feels like people are the conduit for this, like esoteric information, and there's a strata of Intel that's interested in the people themselves. All of that's true. Like like Greer, for example, who you worked with, he started doing these C5 protocols and attracting the sort of alien stuff, and then you got. you have.

1:04:00

Albert stubblebine and John Alexander get in touch with him and it's almost like they're trying to recruit him into something like. They become very interested in him because he's an attractor of this stuff getting warm now, okay, so what does all this mean? Yeah right, yeah, well it. What it means. What it means is that there's a very definite psychic connection here, what we as human beings, Homo sapiens, refer to as psychic capacities.

1:04:30

You know telepathy, you know precognition, remote viewing capacities. There's a whole series of charisms that are that're basically referred to in the Hindu Stu as sidas. Yeah, you know. Which is our function of Consciousness? Is that, clearly, our human species is capable of experiences that are non normal? yes, they regular, normal people don't have these experiences, or at least they don't realize it.

1:04:58

My first year of Law School I had come up from Harvard College, had gone across the street to the law school and I had heard that crane Brinton, who was the chairman of the Department of intellectual history at Harvard for like 30 years and he was going to be doing his last lecture.

1:05:16

And he said he got up and he said, you know, I've been asked to lecture on what I think the most important single intellectual Insight of our human family is that I've encountered in my 50 years. and he said and this is easy, he said.

1:05:28

He said, I think that all the greatest minds of our human family have come to realize that our human family is right on the brink of its next step in biological evolution and that we're going to be evolving from homo sapien into the next stage of our biological evolution. And the key factor that is going to differentiate the next species from us is this evolution of this faculty.

1:05:55

There's a faculty, like seeing or hearing, that is able to directly and immediately experientially access a certain vibrational frequency that exists in the universe, like light or like sound, but that there's an extraordinarily subtle bonding phenomenon that bonds every single, ultimately irreducible integer of matter in the entire physical Universe into one unified harmonic. Ho said, and that this is: this is discernible.

1:06:24

It's extraordinarily subtle, but there's a faculty that is evolving, by means of which we can access this experience. And when one has this experience, the it's like it's like a crystal set locking into a kind of a radio signal and that you lock into this unitive phenomenon in the universe and it can download all kinds of information to you nonlinearly, like seeing or hearing. He said in that.

1:06:54

He said in that this faculty, we're at the brink of moving into this new species. He said. He said, and I think he said he said to us all: this is 1968. Right, this is like May of 1968. And he says, and I think that's why so many of you young men here refused to go fight in this war in Vietnam. ah, wow, that's what he said to us in that lecture.

1:07:16

So he's saying that, like you know, Pierre deardon like the very well, as a matter of fact, the new sphere, like the sort of mental sheath around the earth that you could sort of tap into, or the Russian, the Russian cosmists sort of believed in something similar. Yeah, so to the Chinese. Interesting, this the first thing that Dr Jen Jo Jing showed me.

1:07:37

Dr Jen Jo Jing, who's the head of the Chinese Academy of social science, that they've got this, this faculty in Beijing 300 of the top professors in all fields that are there for the poet Bureau and I met her that I was chairing for the state of the world forum, for gorbachov and for James Baker at the end of the cold war.

1:07:59

That I chaired a thing called the Strategic initiative to identify the new paradigm and I met her in that context and she invited me to come to China and, wow, as soon as I showed up, the first thing she did is she brought me to the laboratory showing me all these experiments they were doing with psychic abilities and they were exploring and trying to figure out what all this was, and so that this is a very real thing that our human family is going through right now.

1:08:29

It's a. It's a transition period into a kind of a new paradigm and the UFO stuff is part of it. You know well, Aerospace has been very interested in Paras psychology mind over matter for a very long time. they sort of hidden it. But, like you have James McDonald, who's the patron of McDonald Douglas. He had a parapsychology Institute in the 60s.

1:08:51

You had, I think he was actually pretty close with Bob John, who was the dean of engineering at Princeton, who went on to start the Princeton anomalies. You know, pair, and this is extraordinarily important. It's really important, and people, people who are who GFA at it and poke fun at it stuff, are just not only ignor, but they're arrogant. I just had a call with we.

1:09:13

I'll delete this if I'll ask him if I can put this in here. But the head of revolutionary technology that Skunk Works I think this is okay to say. CU. He's on record, sort of believing in this stuff, but he's head of like the program that you know, like our most important Recon aircrafts, just on an objective level, come out of and he believes in all this stuff.

1:09:34

He's, I mean he's, I mean he, I think, is on record. If he didn't, he shouldn't be in this position. He's yeah, totally no exact. If anything can procure an advantage for them, they have to be studying it, yeah. And so yeah, it's very interesting just how interested they are in this sort of Mind Over Matter stuff. And it's almost like a cleavage between Academia, which shut down.

1:09:55

You know all ideas around Paras, psychology in the 70s through 90s, and then Aerospace, where it's like. It's just basic Game Theory. You have to. you have to do anything to get an advantage. Where they really went way deeper into Paras, psychology, and then Academia, stuck in string theory, which is a stupid, abstract math that hasn't gotten us anything, hasn't shipped any prodct. They're still stuck in the scientific, logical, positivist, materialist worldview. That's right.

1:10:21

You know, it's institutionalized at the Academy, at the University level, and that therefore you can't. You can't get Cutting Edge exploration on the part of some of the better minds of our family, Human family. They won't, they won't allow it. Yes, philosophy, Theology and any of them, you can't go there, yes, and so that's why you have lot these other like that. We have a relationship with the new paradigm Institute. It's called ubiquity University.

1:10:49

They're accredited in Europe but you, they can't get accredited here in the United States because they talk about this stuff. Yeah, and saying, look, we've got to get, we've got to get intelligent Minds working on this some systematic way. It's so absurd. We spend \$15 billion on a large hygrine collider and you have the possibility that there's a mind matter interface. That kind of our cartisian dualist ideas are just totally off.

1:11:16

And it's like: maybe you know, sub 50 million has been spent on, you know, I know, and maybe that's by Design, I don't quite know. Yeah, and there still there're still, you know, lighting like rocket fuel on fire and burning it com to shoot a, to shoot a rocket up into the, and they're spending billions of dollars on that as a front operation. you think you think it's a front.

1:11:43

So you think SpaceX is a front totally for what? For what's really known about what, the way that these craft really work right? But then are we operating the craft? Then? Or when you say the? Well, no, it's interesting that they, they obviously ran into a major problem, that they weren't able to Pilot the craft, because it's Consciousness that Pilots, the craft and the people that were trained to be Pilots are not.

1:12:11

They don't have those qualities. Well, that's this rumor, these rumors of them rounding up people in third world countries who are have this better psionic connection with the craft and then testing them on the C, which is, you know, I think, probably kind of unethical.

1:12:28

But you know, like this hybridization of the person in the cow, which makes sense if you look at a random event generator, you have, you know, basically the Mind affecting random kind of quantum mechanical processes like Quantum tunneling or radioactive isotope Decay. Yeah, so you know you have this almost like per perfect digital coin flip created.

1:12:48

You have one and a zero that's showing up on a screen, but it's tied to this perfect random quantum mechanical process and an observer is present and they can, statistically, beyond the standard deviation, sway it between one and zero. And so maybe there's something about the ability to Pilot the craft that you know requires a certain level of internal Harmony. Orating on the point I was making: yeah, is that they weren't able to fly them.

1:13:13

Yeah, they've got them, but they can't fly them.

## UFO Photo For President Carter Investigation

1:13:16

Have you ever seen a UFO? No, have you ever SE seen photographs? You've seen a picture of a UFO photographs. Where have you seen a picture of a UFO? In the classif files of Project Blue Book. You got to go through the files of Blue Book.

1:13:29

So Blue Book for the audience was the Air Force's investigation in UFOs under astronomer Jay Allen Heck from the 50s, in the 60s, 52 to 2,69, and really you were able to go through, weren't those classified files? They were. How were you able to see

them? Were you in a kind of a skiff, a compartmentalized facility, or no, it was the. They brought them to the basement offices of the Madison building of the National Archives.

1:14:06

You know, back before the building was open, the building had just been finished in the early spring, January of 77, and I was the special counsel to the study that was being done at the request of President Carter. What was the study? Well pres, you just have to back up a bit.

1:14:26

When President Carter, remember, had seen a UFO yeah, in 1969, I believe it was with a bunch of other people, a bunch of people, 11 other people. They were standing on the steps of this Lion's Club, although I think that sighting may have been debunked, since, no, it's it wasn't he. No, it hasn't been that what he saw, he, it was. It was only like a thousand yards away.

1:14:54

It wasn't like a big, you know, star in the sky or any of that weird stuff. It was like a UFO and he was very specific about it. He talked about it. Yeah.

1:15:03

There's an interview where he talks about yeah, and he and he filed a report about it with the Air Force and stuff with naikap at the time, and so that when he was elected in the first week of November of 19 76, you know, the first thing he did was he sent for the head of the Central Intelligence agency to come down to Plains, Georgia, even before he had gone to Washington.

1:15:31

So he was still at his home down in Georgia in ask. the CIA person had person to come to brief him on the UFO issue, and it turns out that person was George H W bush, who had been appointed by Gerald Ford, who had come in taking over for Nixon when Nixon resigned over the Watergate thing. There's a rumor that Jimmy Carter saw the UFO files and was shocked by them and tears or very distraught.

1:15:59

Is that a rumor? Is that BS, or a rumor is the most? It's Arisen to that. So when Carter was inaugurated on the 21st of January in 77, one of the first things he did is he contacted Congress and told him that the agency refused to brief him.

1:16:18

He didn't want to have a war with the CIA, you know, and spend all that political Capital trying to engage with them on this, and so he asked the Congressional Science and Technology committee to contact the Congressional research service and have them do a special research project for him on what all the information was that our United States government had about the UFO phenomena and about whether or not there was any connection with extraterrestrial intelligence.

1:16:52

He asked both things, and so that I ended up being contacted by Mar Dr Marsha Smith, who is the head of the Science and Technology division of the Congressional research service, and she asked if I would be special counsel to the project, and I agreed to do that.

1:17:12

And it's there's two or three steps involved here, because I don't want people to get the wrong impression that the reason that she asked me to be special counsel to the investigation was specific.

1:17:24

Speically, she wanted me to contact the Vatican archives and see, as general counsel for the Jesuit national headquarters in their Social Ministry Office, whether I could get access to the Vatican archives and find out for the Library of Congress and for the president what information they had. So I checked with the my superiors of the judu would headquarters and got permission to do that, and so I agreed to be special counsel.

1:17:53

So I contacted the Vatican and ask if they would let us give me access to the to the archives, and they said no. so I was kind of taken aback by that, and so I wrote them a second letter with the authority of the Jesuit headquarters and it re explained in more detail what we were doing and why we were doing it. And they still said no.

1:18:16

And so I contacted Dr Marshall Smith and told her that this it's not going to happen. They won't do it. So I figured that was it. That was the, you know, my sole role as the special counsel. But then she called me back a couple weeks later and she said: oh the new, the new Congress that's come in with President Carter.

1:18:39

The House of Representatives cut out half of all of the budget for seti, the search for extraterrestrial intelligence at the jet propulsion laboratory, and so she said that she's helping to organize a group of astronauts to go to the key members of Congress at the House of Representatives to Advocate putting the full budget back in. Would you agree to do that? Would you agree to go with them as the legal counsel for the Jesuit headquarters?

1:19:09

So I did. I went with, you know, Rusty Schwab and a whole bunch of the schwier and a bunch of the other folks, and we went around and talked to the Congress people and they put the money back in. and so the she, Dr Marshall Smith, called me and said: oh, the scientists at the SEI project are super excited, they're really happy, they're very thankful for you to help on this thing, would you?

1:19:31

They want you to come and give a closed door seminar to them on the theological implications of contact with an extraterrestrial civilization. So the bottom line is that I get asked by Dr Marshall Smith to go out and do this seminar to the top 50 scientists, soci C.

1:19:52

So I say where I said: look, if I'm going to go do this, you know, I'd like to really to have you get me some access to some of the stuff that you're getting and gathering for the president you know that you're putting together, so I can be better briefed on. you know what we're doing here to talk with them. And she said: well, okay, what would you like to have?

1:20:12

And I said: oh, I want to have the classified parts of Project Blue Book. And she said: oh, right, there, they're not ever going to give that to us. And I said: well, you know, you won't get it unless you ask. I said: here you are doing this for the president. You'll, just if you would ask them so I can see them. And she said: well, okay, I'll ask.

1:20:31

And she called me back, like I don't know, 3 or four days later or more. And she calls back and she said: well, she's totally surprised that they agreed that I could see her. So I did. you know, I get my suit on, I bring my little lawyer briefcase, I bring the whole line yards and bring my passport and my Washington DC driver's license. I go over to the Madison Building and I would come there.

1:20:54

And I was a Saturday morning. And here are these two suits there, these big, no neck, tough guys. Kind of suit. You know, they're not Air Force, those are not Air Force guys. You know, I don't know, couldn't quite tell who they were, but look like SF guys, you know. And so they are kind of gruff and they check my ID out. I showed them the ID and stuff. They said: all right.

1:21:16

So they leave me into the hallway and they say: okay, go down the hallway here to the to your right, go down there and take the elevator down, go down to the basement and you'll see them. So I said: all right. So I go down the hallway and I get in the elevator and I start down the elevator. And it was just an instinctive thing I did.

1:21:35

I opened up my briefcase and took out a yellow pad, a legal pad, and closed up my briefcase and I put the yellow pad under my arm and I come down to the basement floor and I get out of the elevator and there's no lights on, like in the hallway or. But I could see down the hall. I could see down to the left.

1:21:54

I can see a light out of a room with the door open. So down I go. I got down there. Hear these two other suits, two other guys there right and they both check my ID and stuff and they say: okay, you got to got to leave the briefcase here. Stuff you can't, you can't go in, you can't take any. No, you can't record anything, you know. But here's the room. And so I.

1:22:15

So I walked in the room and I say it's like about 20 ft wide and about 12,15 ft deep. and there these three cardboard kind of card tables, you know, there in the in the room, and they had these boxes, little cardboard boxes like. They were big, like big shoe boxes like they're big, bigger than a shoe box, but they were this kind of pale green with a little tie, little string tie on them.

1:22:42

And so and they had a microfish machine was there. And so I go and sit down and I take the yellow pet off on there and I lay it down there. I go over and I open up one of the boxes and they've got there's a whole bunch of documents with you know, all kinds of you know, head letter, head on them and everything.

1:23:01

And so I'm saying: look at, this is going to take me forever if I start reading all these things. Let me just try to find some photos. And so I went through this one, then another can of it and another I think maybe the third canister of this stuff. And here are these photos and there's. It was photos of a. There wasn't any doubt about what it was. It was a crash retrieval of a UFO.

1:23:22

You could see that the UFO had crashed into this field and there was snow on the on the field and it had plowed this big gouge all the way through this field and the dirt was all turned up and stuff and the UFO itself was stuck in the side of this big embankment that was covered with snow. But you could tell it was like just Earth and embankment.

1:23:44

It was stuck in the side of the bank. You have any idea where the UFO was or it the photo? It was. No, it was. It was snow and there were Air Force guys all around it. I could tell that's what they were and it was Winter and they had these they had. The park is on like with a little fur around the hood stuff. do you think there's any chance?

1:24:04

It was fabricated for you to show you? It would have been ridiculous to go to those lengths to set up some fake picture or something like that. I mean it was, it was clear.

1:24:17

It was clear that it was and you could see the guys taking photographs of it, and there was one like a movie camera they had that had those weird two canisters on the top, like this kind of an old timey, kind of older version of a movie camera, and they were filming it and you know there were like three or four of the different photos of it from different angles and I could see it in one of the photos.

1:24:44

I could see that around the bottom of the Dome it was a classic saucer, like 40 ft wide and it was stuck in the embankment, and that I could see around the base of the Dome on the saucer. This, these symbols that were all around the base of the of the Dome, and I looked at it and I cranked it up again so I could see the symbols.

1:25:09

And what I did is I took out the yellowad and I opened it up. for some reason, just instinctively, I opened it up to the inside cardboard of it and I slid it under the microfish machine and I focused it so that I could see the symbols. And then I traced the symbols, exactly verbatim, you know, all the way around this, the half of the Dome that I could see, and I just put them all.

1:25:38

I just traced all of them and I put the closed up. The yellow pad, you know, rolled up the micro fish, put it back in the little canister and put it back in the box and tied the little string on it and put it back and I said, okay, that's it, I got it, you know. Wow, did anybody else see it or no, well, they, father Davis, saw it photo. No, he sawm.

1:26:03

He saw the tracings. Did you not want to show anybody the photo itself? Well, I didn't have the photo itself. I there wasn't any way I could get. You were alone. I was just alone. I was just alone there. The two guys were outside the door, okay, and so I had the. I had the thing traced, so I put the stuff away.

1:26:21

I put the, the yellow patter under my arm again and I just walked out. Can you sketch the yeah, UFO? Yeah, I'd love to see. I can sketch the UFO. I can show you exactly what it looked like. Okay, so here's the photo and it's you know. You can see the field here and it was so that you could see the plow there was this thing plowed right straight through here.

1:26:45

This is the dirt, with all the dirt all kicked up all along the side of this trench and the trench was dug all the way through the field and the craft itself was like this. And it was. It was stuck in the in the side of the hill and the hill came down like this and it was stuck.

1:27:07

Well, it wasn't that tall, it was like up here and it was stuck there and around the bottom of the Dome on top of here. There was right like this around here. There were all of these little symbols. There were these symbols that were here and they. They look like this, and that's what they. They went all the way around here. Have you spoken to like a symbologist since then?

1:27:43

Do you have any sense of you? Should I? I hadn't. What I, what I did, is I walked out of there when I had him and I walk out and I walked pass. These two guys there was and they were kind of surprised that I had come out of there so fast. I mean I've kicked myself a hundred times since then. You know, why didn't stay in there and try to figure out more stuff?

1:28:05

So what I did is I, you know, I was kind of freaked out. You know that we got well. So I come, I walk out of the place and I reach down and pick up my briefcase and start just walking away. these guys, you know, and they were kind of surprised that I'd come out of there that fast, and so, as I started walking down the hall, one of them says: hey, hold it, hold it.

1:28:28

What do you got there? And I said: oh, this is my briefcase. I just picked up my briefcase and he said: no, no, what do you got under your arm over there? And both of the guys come over to me and they stop me and one snatches the yellow pth away and Ruffles through the pages, and there's nothing on them.

1:28:46

Of course, CU, I did it on the inside of the cardboard, on the back, wow, inside. And so they didn't even see it. and then he just hands it back to me, me, and so I just walk away and I kind of go down the hallway and get back into the elevator. Wow, and, and then it was elevator's going up. I open my briefcase and put it back inside and walk up. Then.

1:29:07

Well, you brought up Carter's initial interest in UFOs because he saw one. Then he goes to George HW Bush and he says I want to get briefed. So HW Bush probably, you know, knew a lot about the whole UFO phenomena and 2015 2016, when Jeb Bush, his son, is campaigning, you know, against Trump and the Republican primary.

## JFK And UFO's

1:29:28

George HW Bush is, you know, helping him campaign. He's very old at the time and he's on the stage.

1:29:33

He's in a wheelchair and somebody from the public in a, you know, Q&A session says: what do you know about UFOs? And he starts going off about how. You know. The American public is not ready for the truth on UFOs, which is definitely off script from what he would usually say, and you know, they just sort of slowly wheel him off the stage and you know, say he's like.

1:29:53

You know he's not, doesn't have his marbles or whatever interesting. Yeah, but what about JFK? You know there's this document from 2005 that was, it was Foyd in 2005 and by a guy named, I think, Lester, William Lester, and I've tried to get in touch with this guy multiple times because I want to know whether it's real or fake. It's like this.

1:30:16

Another thing like the Oppenheimer thing, where it's like if Oppenheimer was involved with UFOs. That's this crazy Smoking Gun that like would really change the public in cus if JFK was looking into UFOs at the end of his life, and we know that also

would be this really important fact for people to know.

1:30:32

And so it's this letter that was foed in 2005, but it's from November 12th 1963, so 10 days before he shot in Dallas, and it's a letter from him to acting CIA director John mccon, and he's saying: I want all the data on unknowns, but by unknowns he means UFOs.

1:30:50

And he's saying specifically: I'm worried about, you know the USSR freaking out because you know they're seeing these UFOs in their airspace and they think they're acts of American aggression. yeah, and so do you think that letter might have been real, or I mean might have been real, might not have been? I don't know. I do know. I do know that in when I was when I was working with dick Billings.

1:31:18

Dick Billings was the chief staff writer for the house select committee on assassinations and he was one of my investigators actually at the at the christic Institute back in Washington, and he and I were investigating the assassination CU. He was a very important guy. He's the guy that got the zeruda film down in Dallas and he was the guy that had. He was the.

1:31:50

The Life Magazine guy for Miami, the Miami office, and was F, and he ran the. he ran the Life Magazine team that was on the ground in Dallas the day of the assassination. Afterwards. He's the guy that got. There's a Bruder film. He knows all about all that stuff.

1:32:10

I had just been over on the hill, meeting with tip O'Neal and, and also with on the Senate side, was Clayborn pal and showing them copies of the complaint that we had drafted. Clayborn pel, by the way, is super interested in Paras, psychology and all sorts of crazy stuff, and he's Biden. He was Biden's Mentor all throughout his career. Anyway, keep so. The bottom line is: I've been over on the hill.

1:32:39

I was showing them copies of the complaint that we had prepared and it filed already down in Miami. Bottom line I come back to. I come back to my office and I walk into the office 1324 North Capital Street. You know, just 13 blocks in the capital, walk in and Patty Austin is my secretary. She says, Danny, there's a older gentleman here waiting to see you, and I said, well, who is it?

1:33:05

She said I don't know, he didn't give me his name and I said: well, where is he? And she said: he's up in your office sitting waiting for you, and so I said: all right, so I go upstairs, I go into my office and I walk over and I: here's this guy. He's looks like he's about 65 years old or something like this, and so I walk over. I said, hi, I'm Danny Shen.

1:33:25

He said: great, it's good to good to meet you, Mr Shen, and never told me what his name was, and so I go back and I get behind my desk and I say: okay, what can I do for you?

1:33:35

He said, look, he said I've got a copy of your complaint here, and he pulls out a copy of the complaint, which had been sealed, actually by Judge James Lawrence King down in Florida, the just the previous Friday, and so I was kind of a little bit taken aback that he had it. And he said, he said now he said, you don't, you don't know who I am at all.

1:33:59

I said, yeah, I noticed that, and he said: but look it, I just want to ask you a few questions. you don't have to answer me if you don't want, but I think I might be able to help you on this. I said: okay, what he said. Now you got 29 people listed here as the defendants in your Iran Contra. You know Federal Criminal racketeering complaint you've got filed against them.

1:34:20

He said: who do you think is the most important of all of these folks? And I said: oh, that's easy, it's Theodore shackley, Theodore G shackley. And he said, really, he said, what makes you say that, and I said, well, a lot of people would think, is because Theodore shackley was the addo, the associate deputy director for operations of the CIA running covert operations,

and he was the immediate boss of the fellow who was the National Security adviser for George Bush Senior, who's the vice president.

1:34:58

I said so that you know in since that's the guy in whose office they've been meeting the Iran Contra people and Felix Rodriguez and the guys were meeting with him. You know. So a lot of people would think that's the reason. I think that he's the most important. And he said: but that's not the, that's not the reason why you think he's the most important. and I said no.

1:35:23

He said, well, why do you think he's the most important? I said I said because he was the CIA station Chief in Miami on November 22nd of 1963. And he said he said there aren't two men in the world that would have answered that question. That way, he said my name is Dick Billings. I was the chief staff writer for the house select committee on assassinations.

1:35:48

I think I can help you out on this case and that's how it started. We found out that Kennedy on June 5th of 1963 and this would be what June, July, August, SE, October, like five months earlier that he had asked to be briefed on the UFO stuff. He wanted all the UFO stuff on June 5th.

1:36:12

That was the same day that Bobby Kennedy had been first notified about the existence of the political assassination team that had been put together by Richard Nixon back in 1960, when he was the vice president and the chair of the 5412 committee.

## JFK Assassination

1:36:30

Under is under isenhower. Here is a bulletin from CBS News. In Dallas, Texas, three shots were fired at President Kennedy's motorcade in Downtown Dallas. Do you think that the CIA killed JFK?

1:36:44

Not exactly, okay, not exactly, but I do know who did kill him. You know, and I do know, that it was an s force. it was a 15 man force that was created back in 1960 okay, actually, by Richard Nixon. And this was the force created to go after kill Castro, to kill Fidel Castro, R Castro, CH Goa in five particular kantes of the new government. And so why did Nixon create this? For us?

1:37:13

To kill Castro? He realized who. Well, actually, what he did, strangely enough, is he called Howard Hughes. MH was the day. The day that Nelson Rockefeller MH withdrew from the Michigan State Primary in the Republican presidential primary campaign was the day that Richard Nixon knew he was going to be the Republican nominee in 1960. okay and he knew that this Kennedy kid, whose father you know, had basically bought him a seat, you know, in the Congress and he was just kind of, you know, Hollow vehicle. You know it was.

1:37:53

He was going to beat him, and so what he did is: picks up the telephone, the security phone in the 5412 Committee of the National Security Council, and calls Howard Hughes, because Howard Hughes was a secret consultant to the National Security Council he had he had invented the glomar Explorer to pick up Russian submarines if they fail and fall to the bottom of the ocean.

1:38:18

He did the c5a cargo plane, the big Spruce Goose, and he was doing two other extreme, extremely sensitive programs. What was he doing? I can't tell you that, but that but the bottom line is, he was close in. Well, he must have been working on UFO stuff too. Not, no, he was not, he was, he was not. No, no, they hadn't gotten him in on that.

1:38:41

He was doing things much more kind of military, kind of prosaic military stuff. So the bottom but the bottom line is: Nixon knew him because of that, because Nixon chaired the 5412 committee, mhm, as the vice president under Eisenhower in 1960. So he chaired that 5412 committee that's in charge of covert operations. So he knew about him being there.

1:39:03

And so he picks up the red phone and calls Howard Hughes and tells Hughes that he wants him to set up an assassination team to kill Fidel Castro and Raul Castro and Chay Goa, because they're refusing Nixon's demands being communicated to them that they not have any diplomatic relations, either Russia or China. He was setting that up as a condition. You know he was invoking basically the Old Monroe Doctrine.

1:39:30

What he did is asked uh, him to set up an assassination team. He asked Howard Hughes to do that. Howard Hughes didn't agree or disagree on the phone, being smart enough not to trust Trump, trust Nixon, as whether he was recording it or not. so he didn't say yes or no, but he called in one of his lawyers, Bob Mayu, and assigned it to mayh to figure out how we might do this.

1:39:55

And so Mayu goes in. They were in Las Vegas, where they were right. And he goes. And Robert Mayu goes to see Johnny roselli. And Johnny roselli is the bagman at the two casinos that were owned by the mafia right and his principal is in Chicago. He goes to see him right Sam janana M, and says: look I.

1:40:23

So Mayhew goes to Johnny roselli and says: look, you guys, you guys with the bent noses, you know you got your own reason for wanting to get rid of Castro. You know. he closed down all the gambling casinos, he closed down the whouses and, very importantly, he closed off the heroin trafficking that was coming in through the Golden Triangle. Okay, and so therefore you got your own reasons for wanting to get rid of them.

1:40:50

So why don't you guys do that? That Nixon's getting set to be president MH. He wants you to do this, m, and so he says: well, I can't do it without talking to Gian Kan, who's my principal. So he goes back to Chicago and talks to Gian, says: well, wait, a,

this is traffic's territory down there. m. He's the da of the mafia in Havana.

1:41:11

And even though he fled from Havana on January 1st of 1959 when Castro took over, so he fled and came up to Florida and was camped out in Tampa setting up his regime there. And a whole bunch of the other refugees of that were Batista people you know, along with trafficante, because they were Partners in the heroin trade, Batista the dictator predecessor to was. He was the dictator.

1:41:38

He was partners with Santos traficanti in the heroin operation and the third guy in the partnership was, uh, Paul helwell. Paul helwell was the head of the sea Supply Corporation, sea, a southeast Asia Supply Corporation. He was full time. Full time Central Intelligence Agency, mhm, full time Central Intelligence Agency. so is this like pre Iran Contra or something pre Iran Contra all 1960?

1:42:05

But it was kind of like a precursor in some ways, because were they doing the same thing, using the profits to fund back? Absolutely yeah. And so that so they said: we can't do this without trafficante, you know, being in charge of figuring out what to do about this.

1:42:21

So they fly down, you know, Sam ganana, Johnny Ros II and Bob Mayu fly down to Florida and they have three sets of meetings at the fan blue hotel. Now we're getting all of this directly from trafficante, who turns out to be the client of the firm where I was. What are these trafficante guys doing in the Watergate Hotel? Why are they there, you know? So that's how I found out.

1:42:46

So traffic count is telling us all this, so that these are the facts of what happened. Okay, so the bottom line is that he, after the second meeting, says: okay, I'm supportive of this in principle, but you know I didn't fall off no melon wagon, he said. So I

wanted to make sure that this wasn't his term a brain fart. This wasn't some kind of brain fart. You know of Howard Hughes or much less Mayu.

1:43:09

You know I needed to know this was coming directly from Nixon if we were going to do this. And so the next meeting shows up a guy at the third meeting that used. The Gnome, Dear Mr Ed, and it was Sheffield Edwards, who's the chief security of the Central Intelligence Agency. okay. So he greenlights the creation of this assassination team that's designed to kill Castro.

1:43:33

If fed Al Castro, R Castro and CH Goa and these other common Dantes right, and so that goes into motion, they agree to do that and trafficante figures out. Okay, what am I, who am I going to put together on this team? He's smart.

1:43:50

So what he does is he picks 15 guys that are all former gunman from him down in Havana, who had fled with him up to Florida, who'd now been recruited by the Central Intelligence Agency to form this thing called operation 40, which is this cover operation against Cuba. Burning Bridges, you know. Lighting fires to their sugar cane Fields, you know.

1:44:12

Poisoning the shipments of sugar going out, you doing everything to try to destroy the economy of that country. Right because they were in defiance of Nixon, because they' gone ahead and established diplomatic relations with both China and Russia. So he wanted to you know, to close down their economy, to show that you know a socialist economy couldn't s couldn't function. So so the. So the bottom line is.

1:44:35

They trafficante contacts guys that have now been hired by the Central Intelligence Agency covertly to participate in operation 40, in covert operations against Cuba, and he selects 15 of these people, which they call a code name, the S Force. So what happens between the S Force and castra? well that they're trying to figure out how to assassinate Castro.

1:44:58

They're trying to figure out all these different ways of doing it in, but in the meantime what happens is Nixon doesn't get elected, you know. And so that he doesn't get elected and in comes Kennedy, you know, and brings in his brother Bobby as the Attorney General right, and it turns out they don't know anything about this assassination team, because it's been set up completely off the shelf, like this by Nixon right, and so that everybody just steps back and lets that team keep on going. But the kennedies don't know about it, mhm.

1:45:27

And so that whole operation comes down, you know. they go through the whole Bay of Pigs thing you know that falls through and Kennedy goes down and apologizes, literally goes down to Miami in the Orange Bowl and gathers together all these hardcore right wing kubano refugees and apologizes to them for this and Promises them that the free flag of Cuba will fly over the island before the end of his second term.

1:45:54

He says that to him right and he comes back and he, even though he told Cru Chef that he was going to stop the covert operations going on against Cuba, he was going to shut down operation 40. He wasn't going to do that anymore. You know, Maya Copo, sorry for doing that. 40 with an operation called mango.

1:46:13

They settled up over at the Miami, on the Miami campus, University of Miami campus, in this big hanger that's there, in the that mango runs there. And and the guys that were doing the covert operations against Cuba still, you know, included all the guys on the S Force who had that other hat on Kennedy's, aware of all this and even directing some of it. How does it end up turning on him?

1:46:40

No, Kennedy wasn't aware of it at all, at all, at all. Okay at all until June 5th. Okay until June 5th of 1963. Okay was when he found out that Walter Sullivan told Bobby: you know about, out about it, and then Bobby tells John, you know, but they didn't know about it until June 5th of 1963. so that thing is going on all that time, okay, and so that the smoke is cleared on the Bay of Pigs problem.

1:47:06

But what happens, of course, is you in 62. In October of 62 is the Cuban Missile Crisis, because Kennedy had lied to kusf about shutting down operation 40 and it just substituted operation mango.

1:47:21

Nikita grusf is totally pissed off, and so what he does is but that's what I mean by Kennedy being aware is he's aware of, but he's not aware of the S4. No, no, right, he knew about, there's no doubt about that, but he didn't know about the S Force. So he doesn't know about the original intention to take out Castro. he does anything about that.

1:47:40

Okay, and so the bottom line is that what happens is that kusf is so pissed off over the fact that he's been lied to Now by Kennedy. You know that he starts putting missiles into cubba mhm. Okay, and then, when they find out about it in October, this whole thing comes down which everybody knows about, and they come to within.

1:47:59

You know a hair's breath of totally destroying the entire world, and you know Curtis lame and his guys. You know, are you know coming up with operation Northwoods and all that stuff of trying to figure out how to generate a war, you know, with Russia in. So the bottom line is Kennedy has to crush that whole operation to say: look, we've got to, we've got to stop. this is totally nuts, MH.

1:48:22

So what he does is opens up a line of completely covert Communications with Nikita CRF and he is promising him: look, okay, look, you're right, I lied to you, but look at, I'm telling you now it's, I'm telling you the truth. You and I need to do something about this. We've come just within a minute of destroying the entire planet. You know we've got to do something. And what?

1:48:42

They decided among themselves, in an exchange of 18 different letters that went back and forth completely secretly, outside of the channels of the state department, outside of channels of the CIA, that he set up a completely private operation.

1:48:58

Kennedy and cruff to each other agreed that they were going to each use their respective Authority as the executives of those two countries to start disassembling the nuclear warheads of their entire nuclear arsenals, because they were each personally so totally traumatized by what had happened, or almost happened, and so that they started get getting ready to do that.

1:49:21

And what happened is Ellen Dulles found out about this who had been the first civilian head of the CIA, yeah, and who hated Kennedy. They well, that yeah, sure, he hated Kennedy, you know, over Bay of Pigs hated him.

1:49:37

Bay of Pigs hated because he got fired, you know, but really more importantly and more sophisticatedly, was totally opposed to the disassembling of the nuclear warheads, of the nuclear Arsenal, you know, because they believed that they needed to have that against China, not against Russia. It's against China, because they'd already been shown. You know, at the Reservoir in Korea and at inchan, that the Chinese could put a million men in uniform into the field against.

1:50:10

You couldn't do anything about it. You couldn't win a traditional land war against China. So they had to have the nuclear missiles. So they viewed Kennedy as a traitor, but he was getting set to disassemble the primary military capacity that the United States had, doing it covertly with the Soviets. I E chrisf personally, okay, and they said that's it, that's curtains. we can't wait. We can't wait for an election a year from now.

1:50:41

You know, a year and a half from now, in November of 6,64. We've got to get rid of him now, mhm. And so what they did is they tasked the S Force that they knew existed. Cuz, Cu, cuz Dallas knew that they existed, cuz Dallas was involved in it earlier on. So how does Dallas do that? Because dallis leaves and joins Brown Brothers Herman.

1:51:03

Yeah, he goes back to Brown Brothers Herman, where he had, in effect, never really left, as a Central Intelligence Agency was the brainchild of the people at Brown Brothers Herman. You know Robert LoveIt, who was one of the senior Partners.

1:51:15

There is the one who wrote the original memo to Truman, recommending that they create a Central Intelligence Agency and that they have a c operations capacity, which they put in section 5412 to authorize them to engage in covert operations.

## Brown Brothers Harriman, FDR, Nazi Germany, And The CIA

1:51:28

And what would? Brown Brothers Herman was, just like a normal Law Firm at the surface. Or what? Brown Brothers Herman wasn't a law. Brown Brothers Herman was a collective Investment Company.

1:51:38

I was an investment, that's right, and they had the kind of the richest 25 patrones from the robber barons. That were all investors, common investors, and they would come together and decide how they were going to direct their Investments together. What they did, for example, after world, after World War I this gets a little complicated, but after World War I, in 198, they had the versai treaty. yeah, negotiations. Yeah.

1:52:05

It turns out that the Secretary of State under Wilson yeah, back in 1918 was a guy being Robert Lancing. Uhhuh, Robert Lancing was the son in law of John W Foster, who was the former Secretary of State back in 189 93. He's the grandfather of John Foster dullas and Alan Dulles.

1:52:26

Those are his nephews, and so what he does is when he supervises setting up the Versa treaty, he brings in his two nephews as part of the team that they bring to Versa. Those are the two guys that drafted the war reparations Provisions inside the Treaty of Versa. This feels like too big of a triple Bank Shot, or something cuz. You also talk about like. It's like the Union Bank was like funding.

1:52:50

There was any doubt about that. yeah, that's just fact so. So you think? Do you think that the Versailles was sort of intentionally, you know, too harsh, in a way that like made you know, like created an opice for the extremism of Nazism? Sort of you know, no crushed wart.

1:53:08

It started out in a much more prosaic motive, because what they did is they said: oh look, we're imposing the war reparations requirements of Germany through the exercise of the power of the state department y supervising the Veri treaty. And so they this major debt now that they owe to all the corporations that they have destroyed their property in the aggressive war in World War. I right. And so what they did, then is the.

1:53:31

Through the power of his office as Secretary of State, Robert Lancing appoints Allan DS MH, who is legal counsel for Brown Brothers Herman MH to be the lawyer for Germany and he conducts a negotiation pursuant to which those War reparations will be covered by Brown Brothers Herman.

1:53:53

They're going to extend loans to the German government to pay the war reparations and they're going to take as security for those loans stock in all their major military really crazy. In 1924, George Herbert Walker leaves brown BRS. Herman sets up the Union Bank of New York, completely capitalized by the guys who are part of Brown Brothers Herman, all the 25 investors. They capitalized the bank.

1:54:18

They set up a foreign subsidiary up in the Netherlands called the bank of shipping, and commer is run by Fritz th, and they finance the construction of the international headquarters of the Third Reich. So crazy.

1:54:29

And they start funing money to Hitler to rise up to become the bwork against bolshevism Y in Europe, yeah, and so that they wanted Hitler to establish this kind of fascist government, the economic theory of which is: you place all the instrumentalities

of the government at the disposal of the interests of the private corporations, mhm, and they will then help. You know, help the major corporations. The corporations will prosper. They'll hire more people.

1:54:57

It'll stimulate your economy, you know, and people all the way up into the top agreed with. That's a great idea. like Henry Ford and the guys at Brown Brothers har they thought that's a good idea to do that right. Ford had ideological sympathies as well. That was what they were doing. So that's how.

1:55:14

And then when Hitler started coming off the leash Y and deciding that he was not only going to going toize everything, he's going to take it all, and so that ended up getting sort of out of control, they lost control of him. But it's like this is like a really interesting narrative that the CIA, they're set up by oligopolistic interests.

1:55:36

Yes, yeah, to be, but to be able to set up a an economic system that was actually fascist, that was actually putting the instrumentalities of the government at the disposal of the interests of the corporations, because then the corporations could deploy, for example, sending a military expeditionary Force down to Nicaragua, you know, and Ting, the democratically elected government. All on behalf, all on behalf of who? Yeah, sort of Yankee imperialism.

1:56:03

There's a book called the three new deals, and it was like Hitler, musolini and FDR, and they were all sort of compared and it was sort of. It just shows how sympathetic the US was to Hitler. You know, just after 33, and before 38, between 33, and was because they tried to assassinate him. They were planning to overthrow him. I didn't know that. yeah, 19,1934, Brown Brothers, Herman, the people planned to overthrow the Franklin Roosevelt.

1:56:33

Is that true? Oh yeah, absolutely true, absolutely. They. The plan there. They tried to recruit the commandant of the United States Marine Corps, General Butler, to lead a major Insurrection of the of the World War II veterans, you know, against

Franklin Roosevelt's government. Oust him into, put Butler, the General Butler, in charge, and that they were going to have a fascist government. The carnegies,. The Rockefellers. You know, these are all the guilded age fam.

1:57:01

They're just the guilded age got it okay? So when you say Rober Barons, you mean the guilded age contr. The they were very, very they were. That's right, absolutely. they were very effective doing what they were doing and that They Carried what they were doing to. The Logical conclusions of say, well look, why wouldn't we exercise control over the government?

1:57:24

But this is, this is what was going on, and the bottom line is that after, because Hitler came off the leash, yeah, and started becoming totally excessive about what he was doing in Europe, and then started going after all the Jewish people you know and start doing all these kind of excessive things still you need to remember.

1:57:46

It's going to be kind of a shocking observation, but the United States never declared war on Germany, really never did. they declared war on Japan after Pearl Har, Japan after Pearl Harbor and then Germany declared war on the United States because they were in the axis, because there was this huge, powerful group inside the United States that didn't want to go to war with.

1:58:09

The critique of FDR at the time was like he was not paying attention to any of the stuff going on with the Holocaust and that he waited way too long, and that you know. Yeah, I mean he didn't want to go to. He didn't want to.

1:58:23

He want war initially and then, once he realized that he that well, because the whole Lobby didn't want to go to war against Germany, because they're the ones that had created them. But there are some rumors that he might have had pre knowledge of Pearl Harbor. He didn't. wasn't that s rumor. Do you think that's true? I know that's true.

1:58:40

They lured the Japanese in because he was convinced that they were eventually going to have to go to war anyhow, and so that what he wanted to do is he wanted to Rally the American people behind it.

1:58:49

So what he did is he ordered all of the destroy and the all three of the major aircraft carriers into Pearl all at one time, and they were monitoring the Japanese trafficking and they realized that they said: oh, what's your confidence level that he had knowledge of? That's 100% okay.

1:59:06

It's 100% okay because we know that they had the cable traffic, they had the communications going on with all the Japanese military and they knew that they were luring them in. And once they decided they were going to do it, he sent the personal order. The night before the attack on December 7th, he ordered all the aircraft carriers to leave under the cover of night. That's the key.

1:59:30

Once you see that they ordered them all out of there and they let him bomb Pearl Harbor and in sync a number of the Fairly outmoded destroyers anyhow that they had. The United States of America was suddenly and deliberately attacked by Naval and Air Forces of the Empire of Japan. once Japan did that. Then they declared: he got a declaration of board against Japan, not against Germany, and then Germany declared war in the United States.

## JFK Continued

2:00:01

Okay, so let's jump back to JFK. Actually, so this? So Brown Brothers Herman is a very powerful Center of organizing. Okay, and so that? So that when Kennedy was deciding that he was going to do this backdoor Channel thing with Nikita Cru and start issuing orders to disassemble and destroy the AR, the nuclear warheads, that when dallas find out about that, what he do goes to Brown BRS Herman and they give the green light, say: that's it. You know that this guy's got to go and he knew about the S Force, so that they just targeted the S Force.

2:00:40

Was George HW Bush involved in the death of JFK? no, he was notified just before it was coming down, as Lyndon Johnson was. They were notified that this was happening because they had said: look at, he's trying to. He's trying to disassemble the nuclear warheads of our whole arsenal. They all got together. The Jagger Hoover and George HW Bush was CIA and I think he went missing.

2:01:03

The rumor was for 12 days and there's a photograph. We know where he was. He was, he was. He was in a meeting at the ranch of Clint merchon is where not the one in Waka, but the one in Dallas. So he was helping coordinate this whole. No, he was just being briefed. Okay, he was just being told, notified that this was getting ready to happen. Okay, and so that's it.

2:01:24

But he, he had pre knowledge of JFK's. yes, that's he did. L Johnson did. Who did the lynn Johnson thing makes? Because it was VI. It was viewed as the Patriotic thing to do. Because he was. He was a traitor in their eyes and he was actually planning to physically disassemble the nuclear warheads and Destroy them. You know, I mean what more. What a greater Act of treason could you do?

2:01:52

Doing it in on behest of this is KF. There's so many angles to this, and so that's why they did. That's why they felt completely self righteous about it. They deploy the S Force. you know, the guy that killed him is Robert, is Roger Morales, who the dead eye shot for the, for the, for the team, you know, off the null, and it turns out so he was one of the men on the grassy null.

2:02:13

Yeah, that's right. The key guy and what's his name? Morales, Roger Morales, his name. And then cabel is one of DS's right hand men. And there's this weird narrative with him where his brother is the mayor of Dallas. That's right, cabal and cabal. Yeah, that's right, was it cabal? Or cabal? Cabel, Cel and his brother, the mayor of Dallas, reroutes JFK's motorcade. Is that right? Yeah, they did. He was involved in the decision to do it.

2:02:38

Yeah, and there's a weird kind of UFO connection there. because cabel, you know CIA off officer Cabell had seen Blue Book and he said, you know this is a super shoddy operation. This is written up in Edward J rupal's book. Yeah, and so, and he actually became part of Blue Book. Right, he actually had Authority in Project Blue Book to fix the place up and run it, you know. So that's all true.

2:03:04

You know it's one of those data points that you have to look at and say: what does that mean? Do? Does it mean what you think it might mean? How many things could it mean? Etc? But the bottom, the bottom line, is that Oswald, the most unpopular part of this whole reality, is that everybody thinking Oswald, just this innocent guy that just happened to be in the neighborhood, that's not true at all.

2:03:27

Do you think he was brainwashed or coerced, or you know? No, I think I think what he did is he realized that there was a plan, the foot, to have him go up there and take a shot at Kennedy, not to kill him, but take the shot at himh. So what they could then do is say: oh look, he's connected to Cuba.

2:03:46

That's why he's did that fake Cubans free Cuba committee thing and that they could blame that, spend some time in Russia, and then they, that's right, and then they could run and attack. You know, he thought he was going to be the only one that was going to be taking the shot at him and then goes, try to run away, and then they were going to event, though. Well, he was.

2:04:05

He was, or was he ideologically down to be Mar? No, he just believed that it was going to work, he was going to get arrested and then they were going to come to his Aid. Okay, you know, he was going to get legal defense and he do all these other kind of things. And but as soon as he saw tippet, soon as he saw tippet coming for him, he killed TI, he shot and killed tippet.

2:04:22

Mhm, and tippet is the police officer that he killed. Yeah right, you know, cuz tippet was assigned to go get him right. And because he had too much knowledge, you think they got Jack Ruby to kill him. Yes, and Jack Ruby. Jack Ruby, I think, was

maybe an mkl trip patient. It wasn't required. He was a mob guy. you know, I mean the mob guys were all into the assassination team and everything.

2:04:42

Yes, so it wasn't. It didn't require brainwashing him or anything. Yeah, but it was really odd because he never recalled killing Lee Harvey Oswald and as soon as he kills him, he going. You know, cuz all, he's a Miami nightclub guy and all the cops around him. Are you know, arresting him and he's going. What are you doing?

2:04:57

I'm Jack Ruby, and then in his jail cell for six months or whatever, he doesn't recall, you know, ever having anything to do with the killing, and then he's seen by Jolly West, who we know is, you know, random kro was in correspondence with he also. he also tried to get to talk to Earl Warren directly to tell him what was really going on. You know he, Jack Ruby, Jack Ruby did. Well, that's why.

2:05:18

That's why you get Jolly West in there and Jo Jolly West spends hours with him in his jail cell no records of this and he comes out and he says: Jack Ruby has had a psychotic break and Jack Ruby goes nuts. And he says: you know, I'm hearing Jews screaming on the other end of you know my jail cell. I think they're dying or whatever.

2:05:36

And so to me that screams that at least at least there he was brainwashed. I don't know about prior. Well what? What I'm saying is that the with aam's razor applying aams Razer. it doesn't require all of that for him to be directed by the mob to do the inial. Take out Oswalt, correct? Get him the hell out of there, correct.

2:05:54

In fact, it would probably imply he was lucid and had some knowledge if he were brainwashed by Jolly West, which I think he was. So maybe he was actually aware of what was going on when he killed him, yeah, and then they saw him as a liability and they had to take him out west. So the plan?

2:06:12

The plan was is to Simply have: have Oswald take the shot at Kennedy, yeah, flee, run away, get away and have tippet, uhhuh, kill him, mhm. And so they'd have the single,. The Lone Gunman shot and killed and it' be over to be done with right, which is the classic Mo. that's how you do it right.

2:06:34

And but as soon as he saw tippet coming to see him, he shot him and killed him, MH, and then continued to flee and realized that he was getting screwed. CU, he didn't know there were any other Shooters. It is also when you read the transcript of Jackie O coming off Air Force One and being readed by Lyndon ban Johnson.

2:06:53

You know Johnson and JFK sort of hated each other by that time, sure, and I do see LBJ is sort of this ruthless guy. President, Lyndon Johnson has left the hospital in Dallas, but we do not know to where he has proceeded. Yeah, he was that, he was that and, like you hear, I don't know what.

2:07:13

You just read the transcript of him speaking to Jackie O and she kind of runs into his arms and he's seems freaked out. He's like they're going to get us. They're going to get us all. Yeah, and it to me it seems like liveaction role playing, like a little bit fake, Jo, Jack valante. Jack valand told me all about it. Okay, Jack valante was with him. Okay, so that's right. Jack valand was with him.

2:07:34

He locked himself in the bathroom and Air Force One he locked. He locked himself in the bathroom and wouldn't come out, and Jack Valente had to go and get him to take him out of there and he was going through this whole thing. They're going to kill us all.

2:07:44

They're going to kill us all, but he'd already been notified the previous night out at glint meron's house and there at least three witnesses to testify to that. So RFK Jr thinks that his father was not killed by Sirhan. He was shot from the back by a guy

named Eugene th Caesar I've talked to Bobby about this at length who was coordinating with Bob Mayu? Who's Hughes? His lawyer? Yeah, and so that's a.

2:08:11

That's a crazy Revelation, and I think Eugene th Caesar goes on to become a bodyguard at Skunk Works. Well, he got employed with Mayu right, and Mayu was working with Suma Corporation. My understanding is that he was working with mayi around the time. mayi was clearly coordinating with him around the assassination, and then Eugene th Caesar went on to work at Skunk Works. But I could be wrong.

2:08:38

Okay, but yeah, but I, but I think it was. I think it was Suma corporation, which is, which is Hugh's operation, Operation su Corporation. So yeah, what do you make of that? I mean that's insane, that's a pretty. I try not to be insane. No, but it's just. It's just like a bombshell like important, you know, thing that people need to know. Well, it's. It's interesting.

2:08:59

You know, I've talked to Bobby about it, and Bobby was going to go be meeting with the fellow to try to get him to do it, and the guy insisted upon being paid, you know, \$1.000. he wouldn't sit down and talk to Bobby at all, and Bobby just blew him off. Who was the guy? Yeah, Eugene Caesar, yeah, exactly, wow, you know that I was a little surprised.

2:09:18

It seemed like it was worth 10 grand to, yeah, that seems worth 10 you, although I could see not wanting to be out extorted out of pride, your father's assassin. That's what he did. He said, no, I'm not, I'm not going to go away. Yeah, but that it's a pretty crazy story.

2:09:32

And I think the other you know possibilities, that Sirhan himself was an MK Ultra patient because he had spent some time with William Jennings Bryan, not to be confused with the 19th century William Jennings Brian, but the Y guy who was probably involved in MK Ultra, and I think he was working at the Santana race. We we did the only case against MK alra that won. You know we actually we.

2:09:56

What case was that there was? There was a woman who was the daughter uh of a, fell out on Long Island. that was a tennis pro, uhhuh, and he, like some Tennis Pros, was having affairs with some of the women, the wives that were getting trained to be tennis players, and his wife divorced him and he became totally depressed about being abandoned like that.

2:10:22

And he started meeting with a friend of his who was a psychologist, and the psychologist said: you know, you actually need to have a little bit more than just talking to a psychologist. You need to get kind of more counseling. So a friend of mine works at. Remember which big hospital was. Big Hospital in New York City, M, something like SLO kering or one of those big. Yeah, he said in the.

2:10:45

My friend works there, and so you could go there and take a whole week, be there in Residence and you can have a meeting with him in the morning and meeting in the afternoon for each day for a week, you know. So he agrees to go do that.

2:10:58

Well, it turns out they were doing MK Ultra experiments there at the place and so that after about two days of General counseling with the psychiatrist there, they dose him with a huge mass of LSD without telling him, and course, he's totally freaked out. I mean it's hard enough when you know what's happening right.

2:11:18

But he was just freaked out and they told him, falsely, that he'd had a psychotic break, mhm, and that he would have to stay there for a little bit longer and they would have to help figure out what's going on here. And then, like four days later, they give him a second massive dose and he dies of a heart attack. Jesus Christ, okay.

2:11:34

And so they're freaking out at the place, and so what they do is they have to bring in lawyers from the Army and from the intelligence Community to come in to cover for them, and it turns out that what was this guy's name? I'm. I don't remember his name. I had other lawyers do this for us right in the bottom.

2:11:58

I've got it in the files, but the B, the bottom line, is that the lawyer that came in for the US Army yeah, to cover it up their involvement in this was Jacob javitz uhuhuh, who went on to become the United States senator from New York. Uhuhuh, and the other lawyer that was representing the intelligence Community was, was Warren burer uhuhuh, who went on to become the Chief Justice, the United States Supreme Court.

2:12:23

These two guys came in and covered up that entire event that took place, and when we discovered that in the discovery, the judge said: that's it. We're not going any farther on this case, really. This is going to settle. you have her tell how much money she wants really and you will give it to her, because Warren Burger had already become, yeah, head of the US Supreme Court. No way.

2:12:48

Yeah, that's true, that's wild, that is true.

## MK Ultra

2:12:51

What do you think the purpose? Because I have some weird conspiracies about, like what they tried to do with MK Ultra. I don't know if you have any theories. They thought they thought that you know if you dose somebody with LSD, it will dissolve away. Yeah, the boundaries, yeah, of their concept structures you know.

2:13:08

And that if one of their concept structures is that they have to remain loyal and keep secret certain information that they've got, that you'll dissolve those away and that under interrogation, you can get them to come clean and talk to you. so it started out as a, as a device, LSD, to have a device of interrogation. Truth here. But there was, I think, more to it as well where they would construct killers.

2:13:33

And I think you know, like, if you look at Jolly West, yeah, you know he had his Center for violence reduction, yes, and the way I think it almost worked is like. So I think like Charles Manson was an MK Ultra Pati. I have a buddy in La named Tom O'Neal.

2:13:47

I know that documents it pretty well, and so you have to ask like why would you make Charles Manson do what he did, possibly, and it was like, maybe it was like to make an example out of him, marginalize the. You know the hippie movement, and you know you have the famous Donna tart line.

2:14:07

You know, August 8th, 1968 or whatever, is the, or maybe 69 is the, you know, the day that the 60s ended and it was like. You know everybody. Really they see this long haired guy and he seems like a hippie but like actually super violent. Just well, so you make it, you make an example out of something that you want to marginalize, and so it's sort of Mass pacification through local violence creation or something.

2:14:33

It's conceivable. But on the other, like conceivable isn't the standard. There's lots of things that are conceivable, you know, and there are a lot of them. And there say people fixate on something that is conceivable that happens to correspond to their worldview. Is there an MK Ultra UFO connection? so I have a friend who I will remain anonymous, but he interacted with Sydney gotle, and Sydney gotle obviously was the Chief Architect of MK Ultra.

2:15:02

And he opens up Cindy goly's talking to him and he opens up a briefca briefcase full of UFO books and he says: you know, I'm reading all about this. Well, so I mean you know, I mean you know.

2:15:14

As we get to the issue of the UFOs, Stu, there's all kinds of issues that are involved in Consciousness: mhm, in the states of Consciousness, the elevation of consciousness, all of that stuff which relates tangentially at least to the LSD, you know, that is

involved in the UFO stuff, the entire remote viewing process, the entire psychic process, the ENT, all that, all that stuff with how put off in and with Russell tar and all those folks.

## UFO's & Consciousness

2:15:43

That whole element of Consciousness is a very big deal. The UFO thing is so confus using. Because, okay, you have different threads. You have this like Consciousness thread, where it's like I don't know if it's cabala or like certain people can summon this stuff, but like you sort of intend on the thing happening. You know Greer has C5 or whatever.

2:16:08

The stuff sort of enters your orbit and, like that, feels different to me than like nuts and bolts craft. Oh, it is okay, it is, but it's all. It's all part of a specific phenomenon, you know, as long as you confine it to looking at the UFO stuff.

2:16:24

And you know the fact that the UFOs appear to be navigated telepathically, for example, and that the that the craft have built into it some kind of an AI capacity to respond telepathically to the control of the of the pilot. Now that's pretty far out. You know when you get into that stuff. And so the whole question of how telepathy works.

2:16:48

You know what are the, what are the physiological aspects of telepathy like and remote viewing? you know. I mean you know there stuff that Pat price could do, you know? I mean you know. How the hell do you explain that? Yeah, you know. And when you start focusing on that, trying to get an understanding what that is, you realize that there's. Do you think you can turn that into math or repeatable science?

2:17:09

Or do you think it's this inherently kind of ephemeral thing? No, no, I believe that it's reductional, you know, to some subtle dimensions of physics. There's not any doubt about. It's going on, yeah, and there's something to it, or it would point to the

human as the carrier of all knowledge, and there's something actually like the senses. The sensory world is actually a reduction on a default state of Greater omniscience.

2:17:38

And if you read Plato with more of a belief that maybe he believed in the ontological truth of what he was talking about, and you read like. The Myth of air, or you know some other things he sort of hinted at, maybe you know there's much deeper knowledge that's kind of latent and innate inside a human being. All true, that is all true. Okay, that is all true. Yeah, I'm sure. I'm sure that's true, yeah.

2:18:02

And what I'm in the process of doing is and they know that I'm doing. I mean, you know, Lou didn't just hire anybody. Yeah, you know, didn't retain just anybody to be his lawyer. I mean he knew perfectly well that for 20 years I was legal counselor for the disclosure project. He knew I represented Dr John Mack. he knew that I was at the peer group. That's interesting, though, that you represented both gerer and Alando.

2:18:21

Cuz they hate each other, right, it's unfortunate. Why do they hate each other so much, cuz I? It's unfortunate I, Greer, obviously you know both of them have their fair share of critics, but Greer, to me, like he's more right than like. You know, like I, there's something about the presentation of the guy that I kind of detest, or something like. It's just sort of really ridiculous, megalomaniacal.

2:18:50

And yet, like, I think a lot of the stuff he says he was early on so much, and I think a lot of it probably checks out. You know I should probably do some deeper digging, but like, I think he's clearly deep on a lot of this stuff. so why does Lou hate him? Well, I mean that you know. Why does anybody hate anybody if they really know.

2:19:11

I mean the more you know, the more you forgive. You know for why people do what they do. You know that I don't. I don't think people hating each other is very constructive, but I know that it's not a good idea for them to hate each other. Yeah,

that there's a. There's a constructive relationship that could be formed. Do you think Nixon was pretty interested in UFOs because there's a famous Jackie G gon thing?

2:19:40

Yeah, I know about that. You know he was. He was. I guess I guess you could call it had more or less kind of a purian interest in it was. It was kind of this kind of itch that he had to kind of know, but he was. He was so involved in so many kind of low Consciousness things that were going on.

2:19:57

I think this was kind of above his not his pay grade, but his kind of level of Consciousness that it was. It was just something he couldn't probably figure out how to use it. Yeah, you know, politically he was very smart and very crafty and just didn't fit into anything as far as he could tell.

## Watergate

2:20:14

I think five men apparently caught in the act of burglarizing and bugging Democratic headquarters in Washington.

2:20:21

The Watergate thing just seems like so crazy, and it seems like you know this, like all these deeper layers than other people. As to you know how it went down, I do. and so what's your version of the story? High level? And then we can get into some of the you know deeper names and narratives and that sort high level is that the key to? It is that there were four trafficante guys.

2:20:45

Mhm, there was, eh, Howard hunt, mhm, who was the leaon to the to the Everglades operation in operation Mongoose. He also said he was involved in the JFK assassination and he said that JFK was killed over UFOs. Well, he, his son, says, he said that, he said it. Okay, he didn't say. And then and then and then Frank Sturgis, MH was on the team that did the burglary.

2:21:19

MH, he was the lead on out on Swan Island. Okay for that group. So the same S force guys, they're S force guys, right. so those are both S force guys and the Cubans were S force guys, MH. And then they had mcord, who was there, who was the CIA wiretapping specialist, okay, and so when I was brought on to D Dallas once called mcord the best guy I ever had, or something.

2:21:47

Well, in what Nixon said, literally in this gun thing, if you peel off that scab, there's an awful lot of stuff that could come out that we don't want out, uhhuh, and he was referring to hunt, uhhuh, okay, and that whole Smoking Gun, when you look at the Smoking Gun conversation on the 21st of June, that with halman in Nixon on the tapes, that halderman comes into the office and says: Mr President, I think we've got a problem here.

2:22:14

He said, what is it Bob? he said, Pat gray, who's the New FBI director that had just been installed cuz Hoover had died. Uhhuh, he say Pat gray has called and they got a problem, that the FBI people are insisting upon going down and investigating the bank down in Mexico City, MH, where those bills came from that were in Bernard Barker's pocket, and he wants to know if that's going to cause any trouble.

2:22:45

The White House, Nixon says: Bob, what I want you to do is I want you to go and get John erican, I want you to have go over to the agency and I want you to see Vernon Walters in dick Helms and you tell him right now to contact the, to contact the FBI and tell him to get the hell out of that part of the investigation.

2:23:10

And halman says: well, you know what am I going to tell him to say? And he said you just tell them. If they dig into that part of this investigation, all the Mexico stuff about the Cuban guys are all going to come out. That's Waka, that's the Cuban guys that are being trained in the assassination.

2:23:32

Wow, because that bank account where those monies came out of, where those bills were in Bernard Barker's pocket, was in the bank account of this lawyer by the name of agario, which is where they put the money from the skim off the casinos, mhm through Marcelo in or New Orleans and into the Miami National Bank of my Lansky.

2:23:58

So, and they would wire it into the bank account down in Mexico City to pay the cost of that triangular fire team base. that's where the money came from. That was in the pocket of Bernard Barker. So the question is, if anybody punched into that, where does it lead to? You know it leads to the Kennedy assassination. MH, right there in, was terrified, like don't peel off that.

2:24:22

He was terrified because the guy whose office they were in the DNC, mhm that Larry O'Brien, MH, before becoming the new head of the DNC to run the campaign against Nixon in 72, had been the major lobbyist in Washington DC for Howard Hughes. Wow, interesting, and Nixon knew it. Nixon went.

2:24:51

Oh, he said, if Larry O'Brien was told about what we did back in 1960 creating that assassination team, yeah, that's going to lead back to the fact that they're the. they're the ones that killed the president, cuz he knew they the ones that killed the president, and there wasn't any way that he was going to be able to convince anybody that he wasn't behind it.

2:25:11

Cuz he's the one that organized the assassination team that ended up killing the president. And so he freaked out and he said: you got to. So you've got to get that shut down. You got to find out whether he's going to say anything about it. Really interesting. So you go into his office. I want you to bug his phones and I want you to. He didn't say it there, so his paranoia really did him in.

2:25:31

He was trying to overcorrect the fact that they trying to shut that thing down. that's fascin, okay. And so that's why they went in, and that's why you had to have guys from the shooter team that were in there, because they had to know what they're looking for. Okay, and nobody else could know what they were looking for. So you couldn't bring anybody else to do it.

2:25:47

And you say: what the hell are these traffic howy guys doing in there, you know. And so that was the question I asked. I was assigned to go back to Washington to monitor the hearings, the Watergate hearings that were going on right, and so they were going to have one of the hearing things and it was televised.

2:26:05

So I was sitting in the goldkey motel MH with my investigator, the William Jonstone Taylor, who was the Protégé. I men to you to bat Andy tuni, who headed up the Mor Arian Associates investigative firm. He's my guy right. Three tour Vietnam C Marine Corps, guy right, and he's sitting there and they bring on. They bring on to testify.

2:26:33

Uh, Jerry alch MH, who was listed as the official attorney for James McCord and he comes on in Dan inaway and Hawai from Hawaii. And what's his that from North Carolina. Sam Irvin are interviewing him. Right, and, and Dan inway says, Mr R, she said you're partners with you, represent James mcord. Is that correct? He said yes. He said you're the law partner of Lee Bailey, aren't you? And he said, yes, I am.

2:27:11

He said now, isn't Mr Bailey under indictment down in Florida on a charge of you know, male? and he said yes, but that's going to be dismissed right away, cuz I'd already filed the Motions to dismiss it, which we won all right. So he said: well, that's just going to be dismissed right away.

2:27:29

So they said yes, but anyway he says: well, couldn't one get the sense that Mr Bailey might be attempting to keep McCoy, John James mcco from testifying in order to do a favor for somebody very high up in the administration in exchange for getting good treatment on his criminal case? And and Jerry said: yeah, but that isn't true, you know.

2:27:56

And what happened is just as that testimony was come in, Lee Bailey walks into the to the hotel room where we are. He comes walking in and he's standing there listening to this testimony and he hears the testimony and he turns around and walks out into the hall and we heard him slugging quarters into a payone, which was totally weird because he used to carry this briefcase around that had a telephone in it and he would.

2:28:24

He would kind of move away from all of us and he go over to a place where nobody could be around and he would open up the suit gas, he'd pull out the antenna and he would have this telephone that he could talk to somebody that he was talking to a bunch of times and we couldn't figure out what this was. And even bad Andy didn't know who that was right. so Billy.

2:28:41

So he just says that he goes out in the hall and we hear him, hear him putting the coins in the phone, and I turn to Bill Taylor. I say what the hell is this all about? And he said I don't know. And I said: find out okay.

2:28:57

And so he goes and talks to Bad Andy and then Bad Andy didn't want to tell him, said no, he says you boys are, you guys are good boys, you don't want to get involved in any of this kind of stuff. He says, and you don't say that to a private investigator, you don't really want to know. So he said: so say, yes, I do, I want to know I.

2:29:18

He kept leaning on Bad Andy and bat. Andy is the one that brought him into the private investigation firm because he's an old Marine Corps guy, right so Billy keeps after him. Finally he says: look here's the story. It turns out that Lee is on index 4 for the agency.

2:29:35

He's one of the four attorneys, MH, that are on retainer for the Central Intelligence Agency, so that if any CIA operative is caught State Side engaged in a covert operation which is totally forbidden mhm by the National Security Act in 1947, MH,

that he's one of the lawyers that will be retained. That's why James mcord has reached out to him. This was after Watergate. This is during the Watergate hearings. Yeah, this is after water.

2:30:08

Mcord was let off for right like within four months was given one to five years. mord is the guy that wrote the letter to judge CA, blowing the whistle on Nixon exactly, and the plumbers guy that did that right out of our office. Yeah, so that I'm, I'm sitting there. So why wasn't Nixon set up in this, in this model of what happened?

2:30:27

Because McCord is this sort of deep CIA guy who's, you know, very close with Dallas, because we know that Nixon is the one that ordered the Breakin. He wasn't being set up. He's the one that ordered the Breakin in order to see whether Larry they sold him out afterwards. Well, so you have to separate up being so. It wasn't done to set him up. Mhm, okay, but so what happened is mcord.

2:30:55

MHM mcord out of our office is the one that gets pissed off over the fact that he thinks they're all getting sold down the stream here, MH, and he, saying what's the story, he says: look, I was told that this was a because he wasn't briefed in. Got it, got it, he didn't know got it.

2:31:12

He was just putting the wiretap equipment and stuff in, and he was told the reason they were doing this is because they thought that the that the DNC mhm was helping to coordinate anti vietnam demonstrations got it and that they were therefore engaged in National Security. He thought he got sold out and he thinks he got sold out. So he got pissed off about this. And so he writes the letter to ca.

2:31:35

Right, that's what happened. I mean and we know exactly what happened. So when? When I find out when Taylor gets all this information from Bad Andy, they lay it out to us in detail. You know he went down to Hank. Hank G ales is Han Gonzalez is

officially, technically, the lawyer for trafficante. He was just a cover for Bailey, right then who ends up helping out Woodward and Bernstein so deep? That was Mark.

2:32:02

That was Mark felt. So I still don't understand Mark felt was getting. He's the guy that was insisting upon going down the next morning to Mexico to investigate the bank account. Wow, that was Mark felt. He was going down to follow the money. Where did that money come from? They tracked it back to that bank. But if he's the deputy director of the FBI, right?

2:32:23

Mark felt yeah, and then he's acting as this sort of anonymous T tip off guy, for you know Woodward and Bernstein at the Washington Post. Doesn't that again Point towards this sort of coordinated effort against Nixon, where he's sort of trying to trying to like expose this to the citizen press? What was happening? Mark felt was still pissed off MH that he'd been passed over for the, the head of the FBI right.

2:32:51

So he was that so pure. It was pure renge SP, because he was pissed off that they were trying to cut him off. he was trying to go down and do that investigation, legitimate investigation of what the hell happened here.

2:33:06

And he and gray was telling him not to go okay, because gray had called the White House and said: look at, you know i' I've got FBI people that are W to go down and do the do the investigation of this bank. That's when. That's when Nixon said: tell, go, get the agency to shut him off, so tell them they can't do this.

2:33:24

So felt's motivation was basically, you know he was pissed personally, yeah, and he wanted to do the investigation. That would have led him to the original s force setup, Stu. So he so he would find. Well, he didn't know what it was going to lead to. Yeah, yeah, but it would have. and then, and then James McCord was pissed that he was getting sold out. That's right. Sold the river.

2:33:43

It was given, you know, not the right information as to why he was DNC. That's exactly right. Very interesting, and so and so that when we get this information from trafficante, mhm Bill Taylor and I say: holy, you know, look what we're in the middle of here. Yeah, that we now know that, in fact, the assassination team that was created back in 1960 by Richard Nixon are the ones that killed the president.

2:34:08

Isn't it wild that a mob boss, drug dealer, knows more about the true history of American politics than the average American citizen? Oh no, that's not surprising, Ian, it's not surprising. Almost anybody knows more than the average citizen of the United States. it'd be surprising to somebody off the street. Do you think there was, or could have been, a CIA conspiracy to remove you from office? I don't know. I know many people think so.

2:34:39

I would say that I've had it found it difficult to understand why the CIA, which apparently had Advanced knowledge of the, didn't inform me. I found it difficult to understand how it could have been that at least two of those involved had CIA connections and nevertheless that it was not brought to my attention as far the break in occurring. Here's another weird connection that you might be familiar with. So you know.

2:35:16

We talked about G Gordon ly and we talked about Bob Mayhew their photos with both of those guys. And John le and John le is very involved in the Bob Lazar stuff. And so when I talk to, like Jeremy Corbell and George knap, I don't understand why they're so dogmatically like Pro Lazar, being at least accepted at face value. Because I'm like: look you're, I'm not discounting your reporting like.

2:35:39

I think the reporting was good, but the idea that this wasn't pushed out by the CIA, I think, is just. It's like you're not able to think properly about this because you had this guy in John leer, who's son of Bill leer. Whether he was a useful idiot or an agent provocator, I don't know.

2:35:57

Probably useful idiot, I don't know, but he had been spending a decade outside of Area 51 and you spend a decade outside of Area 51. The security guards know you there.

2:36:08

Like this is all documented, why the hell would they not do a basic background check on Bazar, know that he's best friends with the guy camping out and you know sketching out, sketching all these kind of exotic aircraft around Area 51. That would be number one.

2:36:21

Number two: why would you continue to have him fly cargo jets, for you know, and be a pilot for you for various missions into the 80s, which you know? He says he disaffiliated in 83, but he really disaffiliated much later. MH, let me tell you a story to make you even more confounded, please. right, I'm at Jesuit headquarters here in Washington DC, right, and I get a call.

2:36:46

I get a call on the phone and it is what's his name. Guy that owned Rebel magazine and Larry Flint. Uhuh, right, so I get a call from Larry Flint. Uhuh, you know who the this guy is. Larry Flint's a guy that owned like 30 m different magazines. You know Rebel magazine and jent and these skin magazines and all this kind of stuff.

2:37:13

Okay, he had gotten sued for liel because in one of the magazines that he published, someone wrote a story using a woman who won the Miss you know, Oklahoma or something beauty contest, and so she filed a lawsuit against him in one, and the case had gone all the way to the United States Supreme Court and his lawyers were challenging it as a violation of First Amendment right.

2:37:40

He's coming into Washington DC to go to the court, the Supreme Court argument. He calls me on the phone. He says dan. He says Larry Flint, here I went. Ah, okay, yeah, okay, Miss Flint, what he said? Well, I'm coming in town for the Supreme

Court. I me. I'd like to have a meeting with you. If I could, could you come and see me? tomorrow I'm going to be staying at the Park Hotel.

2:38:03

So I say: okay, what's it about? He said you I'll. I can't talk with you on the phone about it. So the next day I get Father William J Davis, who is my Jesuit Superior, at the headquarters right and we jump in the blue flame. His little car is.

2:38:19

Look, we drive over to the hotel right and here are like four of these Big Stretch Imos all parked in front of this hotel, which is the Larry Flint Entourage. That are all there right. So we go into the lobby and we say: you know my name's attorney, Dan. She and Father Bill Davis were here to see Larry.

2:38:35

Oh yes, he said, you know, and they bring us over to this elevator and they bring us up to the top floor of the penthouse. Right we get out the elevator and here's Larry Flint and his goldplated wheelchair. Right. So, because he got shot, somebody tried to assassinate. So he's in this gold plated wheelchair and he brings us into the side room. He said, look, I want to retain you at this chis.

2:38:58

The christic Institute that you guys have. We'd like to retain you to investigate the death of Savage. What was her first name? She was the original host, Hostess of Frontline. Okay, when first started y on PBS, right Jessica Savage, her name was, and she and her husband had driven off a bridge in the middle of some storm and he gotten drowned and killed. uhuh, and he said, I think that was a murder.

2:39:39

Uhhuh, and I want to retain you guys to do the investigation. You guys did the Caren silkwood investigation, you've done all these kind of things. So I said, no, well, we don't. You know we're a 501c3 public interest group. You know we don't get hired to do investigations. I said you could make a contribution to us if you wanted to. Yeah, it's all tax deductible.

2:40:01

And I said and we could then look into this if we figure out that there's some sort of major public interest thing here, that this was a murder and she's a major reporter and there's something important, you know, we could then, you know, make that public. And he said, well, would you do this?

2:40:17

Would you just let me know first, so I could publish it in my magazine, In Rebel magazine and and I'll give you guys the million dollar contribution and I said I think we could do that. Said, but there's one thing. He said I've got an investigator that I'd like to have work with you on this. I said no, no, that's not how we do it.

2:40:38

You know we've got our own investigators, because I had not only the guys Bill Taylor and the guys that were in Mor arti, so who still kept doing stuff for us for free, but I also had all the Jesuit guys, 42 countries all around the world that are giving information to our headquarters, right. So I said no, I said we'll do this to ourselves, you know.

2:40:57

Just let me, let me introduce you to them right and he dials the phone and the door opens up and in walks. G Gordon ly walks into the room and I looked at him and he comes over and he sticks his hand out like that and I said: excuse me.

2:41:13

I said, you know that I told you, I told you we're not going to be dealing with anybody, that you un, and especially him and lydy, turned to Flint. He said: see, I told you, I told you he wouldn't do it. So we say, no, we're not going to do this and we don't know whether he was going to give us the million dollars or not.

2:41:32

So I go downstairs and I down the elevator and I'm starting to walk out of the hotel. all of a sudden somebody H and says: Mr Sheen, Mr Sheen, and I said: yes, yeah, what is it? And I go over and it was Gordon Noel. Who is that? Ah good, you don't know.

2:41:47

No, Gordon Noel is the guy that was arrested and prosecuted by James Garrison in New Orleans for burning down 555 Camp Street, the office where, where Lee Oswald well had the office, along with what was his name, the guy that was the hardcore right wing guy that was the head of the Latin American anti communist League, one of the guy that was the former FBI guy that was down in New Orleans.

2:42:26

The heck was that guy's name? But anyway he had an office in the same, in the exact same building, MH, on the exact same floor. Whoa, with him and Gordon Noel, was prosecuted and convicted for burning down that building. MH, in the midst of, in the midst of the investigation. That's crazy, okay, and so it gets crazier, okay.

2:42:51

So he says: I want you to represent me, I want to get that criminal conviction of me expunged, and I said: well, you've already been convicted of it, you know, and that was years ago, you know, and you've already served the time and everything for it. He say, you don't do that. He said, no, I just want to. I want you to, you know, get that expunged for me.

2:43:13

And so I said I like, I don't. I don't know anything about it, but you know, here's my card. You can call me if you're. So I go back to the office and a few days later he calls and he says: how's that investigation going? And I said no, I said I haven't agreed to the investigation. He said what you, son of a. He said, you know, I confided in you and he, he started.

2:43:33

He threatened to kill me. Gordon Noel, right, MH. Well, Gordon Noel ends up later being hired by John Alexander whoa to be one of the investigators for nids wow, to go around, you know, trying to make people who are contactees, come and give them the information, and he's a spotter for people who are getting abducted through my lab. crazy abductions. Right, and that's him, okay.

2:44:04

And so Gordon Noel, years later, and you're implying that he was kind of part of the cover up of the JFK assassination. I'm just telling you what the facts are. Well, the facts are weird, that the facts are weird. Burned down 555 cam stre, which was being used as what by Lee Harvey Osowell. That was an office for the uh, free Cuba group.

2:44:22

Okay, the alleged Cuba group in this guy, Ben or Bert, whatever his name was, had his office right next door to him. So Gordon noville pops back up as this UFO. He pops. Well later, because this: I'm out 1994. I'm out, you know, representing Dr John Mack, and I was asked to do a presentation at the international UFO Congress.

2:44:43

Uhuh, so I'm doing a report on the international UFO Congress and all of a sudden Gordon Noel walks up out of the crowd, uhuh, and says: Oh, Mr Shen, he said, look, you know, I've got, I've got all these drawings and stuff about the UFOs and how they're propulsion system works and all that kind of stuff, you know.

2:44:59

And he starts showing them to me and he said, you know, I've been working on these things and had a lot of time when I was in prison to do this, and I'd like to have you represent me to you know, get my stuff patented here. He says: that's Gordon Noel, and I'm saying: excuse me, I said I don't. I don't think you quite remember. You know, you're threatening to kill me.

2:45:18

Yeah, you know, number of years ago. wow, he says I didn't really mean that you know, and I said, and that was the last, I had anything to do with him. Okay, so what does all that mean? You know what is exactly? Does all that mean? You know that what I just sort of put it on the wall. Yeah, it's one of the cards on the wall.

2:45:34

Yeah, you know to see, you know where and you have the threads. You know the nylon threads that you put between the Cards and figure out what's going on here. But but there's lots of weird stuff, lots of weird stuff, lots of weird pieces, and those are all little data points, because I know those things to be absolutely true.

# Karen Silkwood

2:45:53

but you know the reality is that during the Ken silwood case that we did.

2:45:58

You know that Karen silkwood is this young, 29 year old health and safety person at a nuclear reprocessing plant. It wasn't a nuclear power plant. It was the sole place where they were trying to bring the spent fuels from the 103 nuclear power plants and then grind it all up into powder and then put it in centrifuges and centrifuge out the plutonium, then recover the plutonium and then bring it to the fast flux test facility at Hamford. You know it was an attempt to figure out what to do with the waste materials.

2:46:31

The bottom line is that she discovered that they were missing 40 lbs of 98% bomb grade plutonium from this facility and she just concluded that it must meant that they were really sloppy, that they must have been be loose around the planet, around the plant, somewhere, you know. And she didn't.

2:46:55

So she called the union people that were trying to organize the Union at the plant and told them that, oh look how sloppy they are, they're missing 40 pounds of 98% P plutonium was going to Israel to for nuclear weapons, in violation of the nuclear arm proliferation treaty. Really yeah, and not only that. But they had to then share it with Iran, a condition under the shaw, and then the two of them had way.

2:47:23

Yeah, it was all true, you know. and who facilitating this on the American side? Central Intelligence Agency. Theodor shackley, who was the temporary guy on the Israeli desk, you know, but he had been the former Saigon station chief that ran the assassination program in Southeast Asia too.

2:47:39

But so that what I'm saying is that she didn't know what was happening, but that when she got killed on the way to meet with the new New York Times Reporter to bring him the documents of David Burnham, who was figuring there's some rat in the wood pile here somewhere this isn't just missing in the plant and then she got killed, run off the road.

2:48:00

They rammed her car and ran her off the road and killed her and took the documents out of the car. And this is a real story. This is a really true thing that happened, and I was in charge of the investigation to investigate what happened and what people came up with all kinds of Nefarious theories as to what could have happened here and who could have done this and all that, and I had to keep drilling through all of these different theories of what's going on here to figure out exactly what did happen.

2:48:28

And what I discovered is that the you know people what they've assumed. They assumed at least half a dozen different theories of what was going on, and what I discovered is that a little bit of two or three of the different theories were true, but no one of them was true, but the there were pieces of what each of them had, that they're the ones that really came together to explain what actually had happened in what. I've discovered that over and over and over again, what's your process?

## Epistemology And Truth

2:49:00

I feel like you have to hear something and then catalog everything is like possible but low probability, and then you wait for corroboration. Well, it comes from. I was trying. I think people a priori discount things they hear too much because they're too epistemically closed. So they're like. It's like beijan reasoning, where it's all based onii PRI, prior evidence.

2:49:24

But if you have this like a bias, every time you hear somebody say: hey, I saw a weird thing in the sky. Your beijan reasoning is going to be totally off because you're just putting this in the junk pile when it shouldn't be. It should just be like you're open to everything.

2:49:38

The person that I had trained me in this is Lawrence tribe, Larry tribe, who is now renowned as the leading American constitutional lawyer, you know, but he was a Summa cum laude mathematics graduate from Harvard College and then went and got his PhD.

2:50:00

Summa cum laude from Harvard in mathematics in at the age of 25, was the head of the United States Bureau of Statistics at the age of 25. This guy and he got bored with that after a few years and decided he was going to law school, went to Harvard Law School, became the captain of the Varsity debating team for Harvard University and still end up number two in his class at Harvard Law School.

2:50:26

You know I mean this guy's totally brilliant guy and he started out teaching evidence at Harvard and started explaining to us how you go about setting out your options in Bay's theorem, in the whole thing, and he started. He started explaining that's right from the very beginning. Yeah, when, when I learned that and then ended up at the Bailey's office, where I had access to 40 class a licensed private investigators.

2:50:56

Yeah, I could put that kind of investigative skills together with working through these different theorems of what's how things are going, and so that's how I've ended up being. I guess it might account for how I end up in these peculiar places. Yeah, because I've, I've been able to not get drug off onto some one theory of something. I try to do the same thing, and I think being outside of Academia helps us.

2:51:20

Yes, because Academia you become criticized and you have to kind of tiptoe around anything too bold or too, because they're not. They're not designed to really forward the human knowledge in any kind of significant way. It's all nibbling at the edges.

2:51:36

I was just with Eric Weinstein and a bunch of other, you know pretty renowned scientists, and you know I've worked with Eric for a while and Eric is using beijan basic beijan reasoning, and you know he's obviously has his own sort of Theory of Everything in math and physics. Y is has come to the conclusion that he thinks maybe there's a good chance that the US has a secret physics program behind.

2:51:59

You know the kind of exoteric layer of physics which is. That's a wild Revelation that he said names people: John Wheeler, Bryce, dwit, Freeman, Dyson, people like that who were, you know, renowned in the 50s and 60s. And he thinks that maybe there was something going on in the background with them and maybe they were actually inter facing more with Aerospace than meets the eye. Even Fineman, yep.

2:52:22

And so yeah, it's very interesting the conclusions you come to once you become open minded. Yeah, and I think for a lot of people it took the New York Times and the Pentagon, saying this stuff is real, for them to kind of open the possibility space on everything else. CU it this: if it is real, it has to shatter everything else.

2:52:42

You have to be physics, you know religion, everything it has to affect you, and the one argument I'd say against not trying to piece it all together, I think I do think having one Theory of Everything allows you to you know you want, you want, if you have a bunch of high strangeness events, a bunch of anomalies, it's like you have big foot here and you have orbs over there and cattle mutilation and all these things.

2:53:08

It's really hard for the average person to not just say: that's a basket of crazy, it's like an, it's an amalgamation of crazy that doesn't fit neatly to you know. Science is supposed to be repeatable and predictable, yeah, and so I do think the theorizing does help get this stuff across the line. yeah, and the in the that my usually that I'm involved in a litigation, you know that requires.

2:53:35

You know you're going to have to put the stuff in front of a jury and you're going to have to follow the rules of evidence and you're going to have to have the judge sitting there on your face, you know, trying to keep you from putting things in that he or she just doesn't want in. You know, because they think that they have their own judgment.

2:53:52

That might not be realistic or true, and so they don't want you putting it in front of the jury because they think they're in charge of the courtroom. you know, there's all kinds of things you have to do, but it lends a certain kind of focus to what you're doing. And you, you, you don't just aimlessly speculate about things, given that sometimes I think the metaphysical conversations are frustratingly unfalsifiable. They're not.

2:54:18

They're sort of not even wrong, as fan would say, and so there's almost a part of me. It's like we should look back at this history in the 50s and 60s in the US, where there's some interesting people claiming Robert J Oppenheimer set up UFO secrecy. Like Rush has said that on record in an interview with me, let's talk to his grandchildren, let's talk to you.

2:54:39

Know anybody who was alive at that time, and try to corroborate that there's something about renowned scientists. we just spent \$130 million on a Christopher Nolan movie about this guy. He's like a, you know, the emblematic kind of American scientist midcentury.

2:54:55

Yeah, if he had anything to do with the UFO story, any Smoking Gun evidence around, that would be this massive update, I think, for the average person who's just seen that movie and is interested in this character, yeah, and so I do think sometimes the conversations are sort of frustratingly woo. And we could, we could just move it into this territory of like. Okay, but what about Oppenheimer? You know what about these people?

2:55:20

Yeah, well, the this is all an phological question. you what is the methodology that a given person utilizes to try to determine for themselves what's true and what's not? You know, and the reality of it is that 99% of the people don't have the time or the

disposition to be trying to find out things for themselves. Yeah, and so that they just have certain author it figures that they look to that.

2:55:50

Tell them you know and you're trained to that. Yes, you know from the time you're in school. Oh, your teacher is the one that knows. Here's Mr policeman, who's coming in to show you how you get across the street safely, and they're the ones that you need to rely upon. Or the media: here's the, you know. Here's the New York Times, or here's NBC, you know.

2:56:08

And what they do is they offer to you different epistemological sources of authority and the people do not, do not engage in trying to figure F things out for themselves. Not at all okay.

2:56:21

And so, given that reality, what happens is the that when you introduce into that setting a National Security State, such as we did at the end of World War II, where we set up a Central Intelligence Agency, and that their job is to deceive people and to try to engage in a greedy, aoristic world domination endeavor, you know, and view themselves in this dialectic with the Soviet communism, who they think is trying to take over the world too, and they're projecting their Shadows on each other, you know, and you start to distort reality intentionally, yes.

2:57:06

And then what they do is they target the epistemological sources of authority and penetrate them. What I've been doing all the time is: I just take in the information, take in the information, store it way, put it as a card up on the wall.

## Eric Walker And Robert Sarbacher

2:57:20

Do you know who Dr Eric Walker is? No, well, there was a you know Robert sarbacher. Do you know that name? Or there?

2:57:30

Sarbacher is a guy who's an atomic energy expert and he was working at the Washington National Labs. There were rumors that maybe he had taken over parts of. You know the Manhattan Project, post Oppenheimer in the '50s, and he was closely coordinated with Tom, Thomas, towns and brown and he was definitely involved in some weird stuff.

2:57:51

You know, he would put cameras on these sort of modified V2s and they would try to take photos of UFOs. It was a sophian effort that didn't end up, sort of working out 1987. This UFO researcher named William Steinman writes to him and he says: you know, was there actually a UFO program? I need to know. Blah blah and sarbacher says the rumors about the UFO crashes are fundamentally correct, quote, unquote.

2:58:18

And I say that because fundamentally correct was actually kind of nomenclature between him and Thomas Townsen Brown, where, if you say substantially correct or fundamentally correct, you were saying you're probably right on the surface level but you're wrong on like just about everything else or something right.

2:58:34

And then he goes on to say: you know, you know V, but you know Von noyman, Oppenheimer, vanar Bush were all involved in this core program in the 40s and 50s.

2:58:45

And I actually do know a guy who might, you know, be able to point you in the right direction right now, and he describes a guy who kind of matches the description of this guy, Dr Eric Walker, who's an engineer at, and he's actually the president of Penn State. And so they go and they go into Eric Walker's office and they're like: do you know anything about the UFO stuff? And he looks at them.

2:59:12

Cold call, right, yeah, yeah, he just appro approach right here. I just happened to walk in and ask you: yeah, yeah, well, he probably had office hours, cuz the University president probably used to meeting people and he starts, he gets like kind of

shocked, but then he kind of regains his composure and he goes: yeah, I've known about this for a long time and he's like, but I would know if you guys were clued in, and I know you're not. And then he says: you know, you're chasing windmills, you know, kind of quoting Don kote.
