Founding Fathers' Religious Philosophy

0:07

I don't get mad at people for opinions, even if it's like the most highest thing in the world. As long as they treat me with respect, I don't care. Yeah, well, there's no shortage of opinions nowadays, dude, they're everywhere. People in every corner of the internet has some crazy, ridiculous opinion about any, about everything, and people trying to like shut people down for just like giving their thoughts.

0:29

I don't you know which is kind of the central issue in this. What we're about to discuss is like American philosophy, or what the founding fathers philosophy like. Where did it all come from? Is it judeo christian? You know? You hear that a lot people say the Constitution, the Declaration of Independence, is a judeo christian

document. Thank Jesus for such a great people actually believe that. yes, really, oh my God.

0:55

Yes, they will stand by this. I was debating Crucible, Andrew Wilson, and he's like convinced that this was supposed to be a Christian nationalist nation and the founding fathers believe that a Christian nationalist nation, which all the evidence goes against.

1:12

By the way, there's just no evidence that any of the founding fathers, even if they were Christian which some of them were, which, I'll point out, some of them were, they did not want intend America to be a Christian National country, Christian nationalist country, like, for example, Holy Roman Empire, which was before Germany. It's modern day Germany. They call themselves. The Holy Roman Empire. You know the. You know Italy Church of England in England. You know this.

1:40

That was the, that was this. the world order before the end of the 18th century was Christian nationalism in many senses. Yeah, now didn't Thomas Payne? I was reading his book. So before he started going into like digging in on the Bible, he was like he was supportive of basically Christian morals.

2:02

Right, he was saying that the laws the laws of man or the laws of our, of the, of a Nation should be guided by the laws of God, yes, and not by they. So a lot of people say that these founding fathers are mostly deest, in the sense that they just sort of attribute a mind to the universe itself and just kind of go off there and have reason before Dogma. Mhm, reason is your Guiding Light.

2:31

A lot of the founding fathers. Thomas Jefferson was one. Thomas Payne too, even though Thomas Payne was so critical of Christianity. As you know, you were reading age of reason. He's just trying to debunk the Bible left and right. But then he'll say things like: but the real Jesus probably taught this to, probably was a philosopher, probably was a good dude.

2:50

You see this: with Thomas Jefferson, Thomas Jefferson wrote a text called the syllabus, and this syllabus was basically: he's taking scissors to the Bible, cutting off the whole Old Testament gone. Neo doesn't need that, no more. All right New Testament. What do we got? Oh, all the Epistles and all that stuff. Revelation gone, all right. What do we got left we got. Oh, we got four gospels left. Okay, what do we got?

3:11

The chopping off everything except for the red letters, which is, I say red letters because modern Bibles put Jesus's quotes in red in some Modern Bibles. So I'm just saying, I'm not saying he had a Bible with right letters, but I'm saying he chops off only the quotes from Jesus himself. So all he has left is sayings from Jesus. He's that no crucifixion scene. Thomas Jefferson did this. Some people call it the Jeff Jefferson Bible.

3:38

He called it a syllabus for whatever reason, and what he's left with is he's left with a basically a list of sayings of Jesus and his philosophies, and he thought that Jesus himself was a swell dude, someone to follow, someone who challenged the status quo, someone who thought with reason and in many ways he's right, in many ways.

4:05

So, for example, one of the Torah laws is in on the Sabbath: if your animal falls into a ditch, you cannot go and get that animal out of the ditch. It's going to stay in that ditch until the next day and hopefully he doesn't die right, right, cuz you can't work on the Sabbath and Jesus says: come on, you're not going to go and get your. We can, we can get our animals on the Sabbath.

4:29

That's not. God gave the Sabbath to man. So he's basically saying: like we can, we can do things on the Sabbath. He picks Grain on the Sabbath and gives it to his disciples. Apparently David did the same thing in one of the books from Kings and Chronicles. yeah, so G Jesus is sort of like a philosopher, going against the grain, putting reason ahead of everything else.

4:51

Yeah, and that's what Thomas Jefferson, that's Thomas Jefferson's view of Jesus. Yeah, and th Thomas Payne was a little more, a little more critical of Christianity in general. Another thing: Thomas Payne says: oh, I'm sorry, let me go back to Thomas Jefferson.

Thomas Jefferson just capped off what he thought about Jesus. He said, Jesus was a swell dude. Christianity is, I'm the only real Christian. Jefferson says this, but not, that's not.

5:17

That's not a good thing, for Christians can't really claim this, and I'll tell you why. Okay, he says the Trinity is incoherent. He says, how can one be plus, how can one be the same as another and then the same as another? That's three, that's polytheism. he say that's nonsense. He says the church is platonism. He says the church is just pure platonism.

5:39

Here me, let me pull up a letter from him where he writes this, so I can give you the exact quote: the church is platonism. Yeah, he says this is he talking about like a noble lie?

5:50

Yeah, so in 1813, in 1823, on April 11th, Jefferson wrote to John Adams: mhm, he says, the truth is that the greatest enemies to the doctrines of Jesus are those calling themselves Christians, the expositors of them, who have perverted them for the structure of a system of fancy, absolutely incomprehensible and without any foundation in his genuine words.

6:17

And the day will come when the mystical generation of Jesus, by the Supreme, Being his father in the womb of a virgin, will be classed with the Fable of the generation of manura, the goddess manura basically saying. The day will come when people will realize that the stories about Jesus being the Son of God will be a fable, just like we talk about the Fable of manura called it a fable.

6:42

Okay, and then he says, but we hope that the dawn of reason and freedom of thought in these United States will do away with all this artificial scaffolding and restore to us the Primitive and genuine doctrines of this most venerated reformer of human HS. So he's saying the historical Jesus, someone that's great, who lived with reason and fou the Bible and the myths about Jesus are garbage. they're fables. We don't need them.

7:11

So it's very distinct. It's not modern day Christianity, it's some. He's like a gnostic heretic. He's a heretic. There's no way around that. He nobody. There's not a single Christian or Catholic or Orthodox that would claim that and say: I believe that none of them. It's just heresy. One more thing I want to point out. He says about the platonism thing.

7:35

Yeah, one of the things that really stuck out to me about Thomas Payne's Age of Reason, where he's talking about Christianity being a, I think he calls it a Pious fraud and he said the thing about it is it gets lost in translation from the first Christian preachers who started talking about it, to the second generation of Christian preachers that started talking about it all the way down to the third generation of Christian preachers that were talking about it, until eventually gets so far down the line, they forget that it was a fraud in the first place.

8:07

Right, especially when you have people making a livelihood by preaching it yeah. And then by the fourth Century Council of NAA comes along and they're holding these ecumenical councils into saying: we believe this and this is Doctrine. now. Well, why didn't Jesus say that? Why didn't Jesus say that I am part of a trinity and if you don't believe in this Trinity, you're not a Christian? He never said that.

8:29

In fact, he tells people to get to heaven. Be good, treat your neighbors, good, that's all he says. He doesn't say. Believe in. He doesn't even say: but you have to believe thy resurrected. When did the Council of NAA happen? 325,3:25, yeah, what was the purpose of it? We're talking 300 years after Jesus is dead, right, it's.

8:45

The purpose was to say that to be in order to be a member of the Church of Christianity, the Orthodox Catholic Church, you have to believe in a trinity. That God and the father and the Holy Spirit are all one. They're all one. so before that wasn't exactly Doctrine, so yeah.

9:02

So Jesus himself didn't really preach that, and Thomas Jefferson's pointing this out that this church has been corrupted by platonism, which is what nii also agrees with now. In 1816, on January 9th, he wrote a letter to Charles Thompson and he's talking

about this syllabus that he wrote. And he says I too have made a wee little book from the same materials which I call the philosophy of Jesus.

9:30

It is a paradigm of his doctrines, made by cutting the text out of the book and arranging them on pages of a blank book in Order in order, a more beautiful or precious morsel of Ethics I have ever seen. it is a document in proof that I am a real Christian, that is to say a disciple of the doctrines of Jesus, very different from the platonist who will call me an Infidel M.

9:58

He's saying that church are a bunch of platonists. They're not Christians. This is all philosophy, and they're not actually following reason. Jesus. He thinks. In his opinion, Jesus follow reason. Now me personally, I think he's going too far. Why I think you don't need Jesus. Just follow reason, which is what Thomas Payne was doing. Thomas pay was just like reason. That's it, that's your, that's your logos, and so.

10:20

But I guess, Tom, I guess I could see what Thomas Jefferson was doing. When 90% of your population are Christians, you got to. You kind of have to play the game right. so there really, you really don't have a choice there, but it yeah. So yeah, totally. And then the other founding fathers, like Benjamin Franklin and John Adams. Those guys were working really closely with Thomas Payne, right.

10:45

And Thomas Payne was actually like instrumental in writing parts of the Declaration of Independence, and I think he was actually one of the reviewers of the Declaration of, even though he didn't sign it. He was there, he was there in pen, in Philadelphia in 1776. He was the philosophy, he was the Mind behind the whole operation. He influenced all of this Liberty, loving wisdom, loving the return to the Greco Roman ideals of republics and democracy.

11:18

You know, the Roman Republic and the Athenian democracy, those ideals, those constitutions set up by Solon, set up by demostenes, set up by Cicero, those type of that type of Phil philosophical U world view to lead people with, rather than, rather than the doctrinal or or what's the word Dogma set forth by religion.

11:47

Right, do this, or else John Adams was, as you mentioned he's one of his most blunt, famous quotes about this says: government is not, should not be founded any way on the Christian religion. Just straight up says it: our government will not be founded any way on the Christian religion. So there is no judeo christian ethics in the Constitution or the Declaration of Independence. It's just not. there's no Ten Commandments.

12:21

There is no Pauline Epistles there. It doesn't even mention Jesus in any of these documents. So there's. I mean it's pretty obvious.

Born-Again Christian Grift

12:30

What do you make of? I actually this before the podcast, but I was saying: what do you make of so many people online? You see, like people like YouTubers, like Candace Owens, like Jordan Peterson, Russell Brand, all these people like suddenly being born again Christians. I think they're on a team.

12:49

I think they're playing for a team. I almost want to say it's sometime. For some people it's a grift. For other people they believe in that side so much. They believe in the conservative worldview, the, you know the more of a sort of a nationalist leaning worldview. They believe in it so much. And then they, everyone, there's Christian. so you got to spiritually become part of this and so they're going to.

13:18

I think people like that sort of convince themselves that it's true. Yeah, and they don't. They don't look for evidence. On the contrary, they're not looking at. They're not reading Barrmann, they're not. They're not looking at like. Is it really true? They're finding out. How is it? How can I make this true and sort of convincing themselves that?

13:36

And then you get people who want to convince themselves that the founding fathers somehow set up this country for Christians and only for Christians. as we pointed out all these quotes from these letters from these founding fathers, where they're saying

the opposite. Like I mean like getting back to that, it's just if I had a dollar for every podcaster I've seen make videos of themselves getting baptized on their Instagram. Yeah, I think it's a grift.

14:02

I think it's a grift. I do. I mean not everybody. Maybe, like I mentioned, some of them really probably like convince themselves and they actually believe it after a while because they want it to be true, because that's the team they're on. But I think it's identity politics. And just they don't call it identity politics. Everyone else is doing identity politics. oh, the trans movement, all the black lives ladder movement.

14:24

It's all identity politics, except for me, even though identity politics could be Christians, Christian, I, as a Christian, I believe this, cuz the Bible says. So, even if I don't actually believe it, I have to believe it. That's identity politics. It's it's same thing. Yeah, you know, it's just crazy to see it happen in real time. It came out of like nowhere feel like over the last like couple years.

14:47

It did everyone's, and that's one of the things me and Matt Bale were talking about, and he's pretty. oh, Matt Bell, Matt Bell, yeah, he's, as he points out, like people are driven by identity these days, whether what, I don't care what side of the political Spectrum you're on, it seems to be.

15:08

Everyone is being sucked into some sort of identity where nobody can actually live as themselves and they just they're sucked into some sort of like. What is this, Steve? It's a Greek translation, for Jesus used him's hair. Regrow your hair like Jesus, with him's hair loss Solutions. It's a miracle. In a bottle. Baby hair loss is stressful, yes, and it's very common. But you got two things going for you.

15:31

One: the variety of solutions hims offers. Two: you weren't caught in the public park at 3:00 a m by centurions, so the chances are good. you'll keep your hair longer than Jesus did. If there's anything worse than losing your hair, it's waiting for it to grow back. That's what makes it so special. You'll start seeing your hairy grow in as little as 3 to 6 months. It works, and all from the comfort of your couch.

15:50

They have chewables, oral spray or serum options, so you can pick what works best for you. The process is simple. It's 100% online. Just answer a few questions so they can determine what you need. You get your prescription and then they ship it straight to your door. Hims has hundreds of thousands of trusted subscribers, so as long as you're alive, you can get your confidence back with hymns. Start your free online visit today at hs.com/danany.

16:14

That's hs.com/dny for your personalized hair loss treatment options. again, that's hims.com/dny. Results vary based on studies of topical and oral Minoxidil. Prescription products require an online consultation with the healthcare provider, who will determine if a prescription is appropriate. Restrictions apply: see website for full details and important safety information. Be like Jesus and regrow your hair with hymns. It's linked below. Now back to the show group.

16:41

Think whether I mean there's so many of them. There's a whole different group thinks everywhere. It's almost like little mini Cults everywhere and they don't realize it and they think everyone else is doing it except for themselves. But it seems to be that everybody sort of gets sucked into some sort of identity area. Definitely, definitely, there's, definitely, and then there's PE.

17:00

There's the whole another side of this thing, where the internet props up, or the internet sort of amplifies people with the most extreme views on different things, whether you be right or left. The people that are the loudest have the craziest views and they're the ones that get the most retweets or the most views on any kind of on Twitter or YouTube, and people see that the most, because that's it's so inflammatory.

17:27

It gets the most attention and people think: oh, this must be normal, yeah, or that must be normal, and this is just the way the world is now. Yeah, meanwhile, like what you see on Twitter is not the real world. These are people behind keyboards trying to get attention. There's this. I talked about it on the last podcast that we did, but there's this thing called the. There's a w.

17:51

My friend Julian in New Jersey has this Theory called the Wawa. Theory goes: you want to see how the world really is. Just go to WWA. He goes. You see people online fighting and talking about how you know there's going to be a Civil War. The rights, the right and the left are going to kill each other this end of the world.

18:07

But then you go to Wawa and you see the girl with the green hair holding the door for the Vietnam veteran. You know, it's not really what you see online. You're right. The internet does amplify things a little bit. and I noticed another thing that I noticed: people who I know in person, who are normally kind of chill and they have their opinions or whatever. They don't really get crazy with it.

18:28

When you see them online, they act like they're like going crazy. Oh, heyy, oh, Trump needs to win or the world's going to end, or the. If Trump wins, the world's going to end right. And then. But you see these people in person, how they communicate, just chilling, know they're like, eh, whatever, that's not a normal human interaction, a normal one on one human interaction.

18:47

That would be so weird if somebody was talking to you like that. Right, it's only on the internet where you see that. Yeah, it's a fake personality. it's a fake, especially when you can put an avatar in front of your name right and with a nickname and then you could just say whatever. You just go into Anonymous mode and you can just do and then you get. Then you get dark. People get dark with that.

19:09

Oh yeah, you can say whatever and no one's going to know.

Whatifalthist's Claims Of 2024 Civil War

19:11

It's, you know, that's. I think a lot of that's going on. Like with that guy I just had on who was talking about the Civil War stuff, how he thinks it's going to be a Civil War. What fa his by the time this video comes out, I've already debated him. Yeah, that's funny that you saw.

19:23

I just released that podcast with him this morning and you said you're planning on debating him already. Yeah, you know, that's. that's my thing with like, with that. Like he, I don't know anything about his lifestyle, but he clearly studies a lot of history and he reads a lot of. But everything you read in books and everything you see online, like what we just said, is not the real world.

19:49

Sure, it's not what it's like right now when you walk outside and deal with a group of human beings. I mean sometimes, depending on where you are right, if you're in Chicago at a Palestinian gptq protest, that's a different thing than going to Wawa. Well, that's the one thing about what.

20:03

If Altis that I think he's a little wrong on, just to use lack of a better term he sees the world so black and white, it's either communist or it's either. goodh, it's either like there's the good free market and then there's the Communist, evil leftism, and he, he looks at all of history through this dual lens of. There are. Basically, in the 1400s, everybody was a communist and everyone for this.

20:32

For the next 300 years, everyone was Communist and everything was bad. And then all of a sudden this person came along and then they brought free markets back and everything was good for another 200 years like. That's how he. That's all you get from him, and I don't. I just don't. I think it's lazy, I think it's. I don't think it's good historical rigor, I don't think he's doing.

20:50

I think his methodology is terrible, I don't. I don't think he reads a lot of history books. Maybe he reads like. He definitely reads a sh. I think he reads books about history from historians like from you know. I think some of them are a little outdated, but I don't think he, I don't know what are. You's primary sources are off. What are you going to debate him on? The Middle Ages, the Dark Ages?

21:13

Oh, really, specifically about the Dark Ages. I hold to the opinion that and I'm admit, I'm coming at this from the non I'm actually giving him the. I'm giving him the upper hand because the consensus is that the dark, the Middle Ages, weren't that dark.

21:29

As the term Dark Ages comes from a Renaissance writer named petrarch, and he coined the term Dark Ages and basically he was looking at the period between 500 AD to 1 000 ad, and he was saying that the literature that came out in this period was all garbage. You can't? It's nothing compared to Homer and hiad and Asis and ureides and Sappo, the classical world was way more bright, way more threedimensional and colorful.

21:56

And then the Dark Ages was this period of Christianity, and Christianity took over, Christian suffocated all and there was no more literature, no more theater, no more art. So he calls it the Dark Ages. That's my I hold. I agree with petrarch, I agree with Naki, I agree with all the people who hold the Enlightenment thinkers that thought this as well.

22:14

Yeah, that's where the term Enlightenment comes from, coming out of the Dark Ages Enlightenment, which is perfectly what we're about to get into. Actually, Enlightenment, what? So what are his views? How did his views differ from your? He thinks that was the best time in the in the world. He thinks that Dark Ages thinks the Dark Ages was the best time he's a Christian.

22:31

He thinks that was the time when everything was perfect and that the enlightenment was the corruption of the world. The end of was everything's bad because of the Enlightenment. Huh, he didn't. Did he say that when he was in here, I told you the one.

Origin Of Democracy

22:44

The one thing that we talked about was the creation of De democracy, because I told him that the Greeks created democracy. Right, like the word is demos cratos, it's Greek right.

22:54

You can't have democracy without Greek. It's impossible, it's not? This is not even subjective thing. Who did he say? Francis Bacon. He said he, Francis Bacon, was the

one, I think, who created, who invented democracy. What I mean this is not this: is you to me, Sir Francis, to me, that's not a historian? Yeah, you cannot, you cannot not know. If you don't know that democracy comes from the Greeks, that you don't.

23:16

What are we doing? Well, I think he said that, like he said, he said that there's a difference in coming up with a theory and putting it to test. They did put it to test bacon like refined. So let me explain. Let me just put this right now: yes, in Athens, between the time of Solon and the time of Aristotle, actually.

23:38

So maybe a little after that you know Plato's Aristotle's time there was a system of government and there was. There was gaps, there was tyrants would come up and start ruling oligarchies for little periods of time. It happened at the end of the fifth century BCE. From like 420 BC, I'm just guessing, till 405,404 BCE, there was an area called the 30 tyrants.

24:02

Okay, but before that and after that, they had a system of government with no King, no Emperor. They had Senators that were elected by the people called archons AR yeah, rulers, it means and they weren't allowed to be married or have kids. Right, I don't think that's true. No, I think. Yeah, I don't think that's true, AR.

24:21

I thought they weren't, because that would be a conflict of interest, because the they were supposed to be looking out for the state or the city, or whatever it was. Well, I don't, I don't know if that's, because their terms were only two years. Their terms were only two years. Terms were two years. They were getting. They were getting flipped. Oh, actually, in Athens I think it was one year.

24:40

Oh, in Rome it was two years. We have fouryear presidencies, right? They had. In Rome they had two year consuls. So Rome was a republic. Okay, but let's stick with Athens for a second. Okay, they had a senate. They had people who were in getting elected and taken out of power, elected, Tak power, which is democracy. They were being voted on. things were being voted for by the people who had citizenship.

25:05

So as long as you're an Athenian citizen, you had voting power. Now that doesn't mean somebody from Syria can come and join in the election. They had a real democracy. There is no other definition for it. That's not them thinking of a theory and then it gets realized 600, a thousand years later. That's objectively incorrect and that's bad historian. That's a bad historian. Is he for him not to know? What do you think?

25:29

Deart came up with the word democracy by going back to Greek. The word is Greek: demos katos. Demos meaning people. Katos meaning rule. So where do you think it came from? Demos katos and the Republic. the ideas of Republic comes out of that system, where the Romans have their own version of this, where they have consuls that are elected every two years. Two consuls, one from each party: the popularist Party.

25:54

The Optimist party, right, they these two, and they have this huge Senate, giant Senate elected by people who were once again people who were Roman citizens. So the end of the Roman, the end of the Roman Republic, sets up this Emperor. You have an emperor and the Senate basically doesn't have as much power anymore. They're just sort of they're wealthy.

26:15

They're just wealthy, like land owners at this point, and which sets up for the end of this type of way of life. And so, yeah, this because they shouldn't be allowed to own land. right and an emperor or a senator, a senator. They own land they all. Yeah, really yes, they all own land. They're all rich, wealthy land owners.

26:36

Alond was telling me the original version, the original purest version of democracy, where the people that were the rulers and the Senators, and those people they weren't allowed to own land. That's interesting. We can look that up. He's the PHD classes. I don't know. Yeah, that I didn't think. Maybe I'm getting that wrong. Yeah, that's what. That's what I talking about in Athens or in Rome. I know for sure. I know for sure.

26:57

Roman Senator, his own land. Cisero had own. Ciso had a giant Villa. He was basically equivalent of a millionaire, but did no Athenian Senators. We already know Roman Senators did. Yeah, that's Athenian Senators, Athenian with a B. there isn't much information about whether aans or had land, but here's some related info. There were property qualifications for Athenian offices, except for those that required.

27:23

There were no property qualifications for aan officers, except for those that required professional expertise. However, the Athenian Boule or Council of 500 was dominated by men of property because poor citizens might not have been willing to serve interesting. Wealthy Aristocrats controlled both the land and the government in Athens, and poor land owners eventually became enslaved. But do I mean like how long did they like that? They were around for like thousands of years.

27:53

Right, yeah, they were for the Ean thean democracy. Yeah, not. Thousands of years, hundreds of years, hundreds. Maybe it has changed Solon. I think Solon was the first to give the laws to the Athenians. Igus was the lawgiver of the Spartans and they both had these basically systems. Well, I wonder what Solon said. The qualifications to be a politician would be. That's a really good, can you see?

28:20

Can you look up like what did Solon say, the qualifications of being in government? Good question, it's a good question. I never thought about that. Just type in Solon s o l n, Solon qualifications for governance and yeah, the idea that democracy was thought about by the Athenians but not practice is not even like. If we're talking about like what's your favorite color, that's subjective. This is objectively false.

28:49

To say that the Athenians aren't de Democrats, objectively false, right, and that's really. It's surprising that someone would. I'm talking crap right now, but it's surprising that someone would consider themselves a histor. Maybe he's. maybe to be fair. Maybe he focuses on other areas, not in the ancient world. That's fine, but you should make statements about that. He said Classics ends in the re before the Renaissance. Is that right? Study of Classics?

29:12

The classical Classical period stud class starts back in the Renaissance. Classicists don't study the Renaissance is what he said? Yes, they do, they do. Oh well, it depends. Even though our government is really corrupt, it's not so bad when you party with zbiotics pre alcohol time a politician lies, Danny takes a drink knowing zbiotics has his back. Honestly, I wouldn't even need zbiotics if our government wasn't so corrupt.

29:35

Steve, how long did it take you to write this segue for the zbiotics commercial? You know it was. It was pretty hard to connect democracy with genetically engineered probiotics. stick with us folks. Sometimes y'all wonder why Danny looks stoned. He's not. He's just reflecting on how worse life could be without zbiotics protecting his system. Now you can drink without stressing over your next day thanks to zbiotics itic pre alcohol. So how does it work?

30:00

It's a vial. You drink before your alcoholic Funtime to avoid rough mornings. Zbiotics is the world's first genetically engineered probiotic. It was invented by PhD scientists to tackle sour mornings after drinking. Here's how it works. When you drink, alcohol gets converted into toxic byproduct in the gut. It's this byproduct, not dehydration, that's to blame for your rough next day. Pre alcohol produces an enzyme to break down this byproduct.

30:27

Just remember to make zbiotics your first drink of the night. Drink responsibly and you'll feel your best tomorrow. I'm not 20 years old anymore, so whenever I go out I always drink zbiotics first. At first I was really on the fence about zbiotics until Neil over here invited me to his apartment a few months ago to try some snake venom and try to meet the devil.

30:44

But luckily I brought a shot of zbiotics to take first, and boy was I glad I did. Zbiotics is the real deal and I can tell you for a fact, I was doing way better than Neil the next morning. Weddings, vacations, birthdays, reunions get the most out of your summer plans by stocking up on pre alcohol. Now go to zbiotics docomo. Get 50% off your first order when you use the code Danny checkout.

31:06

Pre alcohol is backed with 100% money back guarantee. so if you're unsatisfied for any reason, they'll refund your money. No questions asked. Remember, head to zbiotics docomond. Use the code Danny at checkout for 15% off. Thank you, zbiotics, for sponsoring this episode. It's linked below. Now back to the show. Classicist do. Okay, he's kind of right. Okay.

31:27

Classicist study the Roman Greek period, Latin and Greek Antiquity, basically from the Iron Age until the Middle Ages. Right, so that, yeah, that's Classics period. But there are some Classics that will. For example, Mary beard, she does focus on Renaissance stuff, but yeah, you know it's she. He's kind of right. I shouldn't say he's wrong on that.

31:50

Seems solon's Constitution reduce the power of the old aristocracy by making wealth rather than birth a Criterion. So it's the other way around. political positions? Okay, yeah, the wealth. The land owners are the ones who are in power and the ones who are the Senators, a system called octia democracy. Citizens were also divided based on their land production. Pent, Oh, my Jesus, I don't know that word.

32:19

Yeah, Pentecost, that's, that's the Constitution and that Solon is mentioned by the founding fathers as someone. That they're they, drawing from the idea of a constitution. Where do you get it from? You get it from Solon. You get it from GL kgus. You get it from the Romans, the con. That's a constitutional democracy. But why was? Why would wealth be a criteria of being holding a political position?

32:41

Because you have to have a stake in what you're deciding. Can't just be some random guy who has no idea what economy is doing, like. think about logistics. All right, somebody owns cow, this person cuts down timber, that person is a minor and they have to like trade with each other and they so they all own stuff they all own. They have to own property to do that.

33:03

So they understand the inner workings of the society. They know the logistics, they know the economy. Those are the people that have to make the choices. Sorry, I'm

sorry, but the random person that's on drunk at the bar shouldn't have the same. I mean I'm not saying I'm talking about back. I agree you.

33:18

What I'm saying, the random person who has no idea what's going on outside of, and how he, how he even has a bar to go to, or how he even has the opportunity to go the city hall and do whatever. Right, that's, that's the, that's the. That's the idea that they were going for right.

New Voting Requirements

33:35

So, and that's, by the way, that's how the original American system was.

33:39

Wealthy land owners were the ones who were voting and stuff like that. Now, today, we have a different system. Yeah, you couldn't vote unless you own land. Yeah, you had to own land, you had to be an American citizen and you had to be male. Now, I don't agree with that. Just want to make that clear.

33:53

I don't think that's correct, but I think there was a reason why it progressed the way it did, because now in this, in today's world, we have a different system of things, we have different Logistics, we women can now work in different companies and they can get people. All people can get educated now. So now that, now that everyone's educated, everyone can vote, what do you think, simp?

34:12

What do you think about the idea, hypothetical idea? Not that I believe this should be enacted, but instead of everyone being able to vote just, I'm just kidding: just a king? No, just the men. Oh yeah, that's how it used to be. No, I was going to say, I was going to say like, like you have to take a test to get your driver's license right.

34:33

Yeah, what if you had to take a test to some sort of basic T to make sure, yeah, to make sure you understand what you're doing, the things that you, what you're voting on, not that coming in because you've been fed propaganda. Right? I totally agree

with that. Yeah, and I'm and I'm not saying it make it so hard that someone who's not educated and doesn't have a stake in things.

34:56

I'm saying, let's make it B lot a good argument. Yeah, what if you're uneducated? You can't you want to vote, but you still have a staken, things like you still have things that you're, you know. Maybe you're dependent on something and you want to vote for that, so you still should be able to vote. so that's what I'm saying.

35:08

If we can design the test where it's sort of not like bias in one space where it's basic, it's basic like okay, if you don't, you can't pass this basic test. You shouldn't be voting. I agree with that. There should be criteria, for I, you know, I don't know, I don't know if that will ever happen. No, probably so I don't.

35:25

If someone gets mad at me for saying that: look, I'm not dying on that Hill, I'm just talking crap right now. But we're doing the complete opposite. According to, the internet looks like they're flooding people. ID in new yor, thousands of people across the southern border. Last time I voted, I went in, I went in there with my ID ready and I'm like and they're like: What's your name? when was this 2020.20?

35:46

Yeah, and they asked my name and I was ready to handle my ID and they just said: he, go ahead their ballots over there and I said: don't you want my ID. They're like no, we don't. You don't do that in New York State, what don't I? You, New York State, holy, let's say I didn't vote.

36:04

Now this is going to be very rare, obviously, because every time someone votes they cross off the name, so somebody can't come in 5 minutes later and say my name and vote 10 times. They can't do that. One person gets one vote boom done. So that sort of limits how much fraud that can happen already. Secondly, but here's the here is one little tiny loophole.

36:21

I don't know how big of a deal this is, but let's say I said I'm not voting, I'm staying home. Mhm, you knew this and you live down the street for me in my district. Right, you can potentially go and vote and then right and then go back home, for you

know, 8 hours, 10 Hours.come back with a little hat on in a hood and say my name and vote twice.

36:40

You can do as, but it would have to work out that you knew your friend wasn't voting yeah, and you vote like you can do. That's, there's no. New York has no way of stopping. That's insane, dude, it's true. I mean like how does it work with people that are like unreg, unregistered citizens, or like not legal citizens? Like how would they be able to? they're not citizens. I don't think they're on the list.

37:03

So there's a list. New yor has a list of every person who's a citizen that lives in that you, if you have. So if you have a, if you live in any house in that District, you're analy. So there's a video. I saw where they were interviewing people in like some. I forget what I think it was.

37:18

It might have been in New York, where they were going around into like an apartment complex that was filled with illegal immigrants and they were asking them if they voted and they were all saying, yeah, we voted. If they're on a, if they live as a legal, if there, if it's a legal address and they're somebody who lives in that house, they're probably on the list. now I don't know about how the work.

37:38

I don't know how it works with their ID or whatever. However, they got listed in that house. You had to have some level of citizenship, I'm, I'm assuming. So I don't know what that video was or whatnot, but I do know that in New York state, if you live in, if you live in a certain District, your name is on a list and you can vote in that District.

37:56

You can't go to another district and vote right. So, and that blew me away last time I go. I'm just thinking to myself: they're not even going to ID me. This is crazy. That is insane. I got a guy who I could introduce you to. He's got a great podcast. you should do his podcast or he should do your n you probably better on his. He's got a. His name is Matt Cox.

38:15

I've heard of him. You know him. He comes out here sometimes he. He came out, he literally got out of the halfway house right, hit me up, emailed me. He's like: hey man,

I want to do a documentary. I'm like: just do my podcasts, and he comes on, does the podcast and gets like millions of views in a week. Really yeah, dude. He was doing mortgage fraud when he was in.

38:33

Like the '90s, he was like doing fake mortgages and like refinancing houses under other people's names, creating fake identities, and made few million dollars. Basically, he basically scammed Banks and he did like damn.

State Vs. Federal Prison

38:46

He got sentenced to 26 years in prison. how much time did he do? I think he did 12. No, he did like damn.

38:55

Yeah, maybe 12 Federal time, Federal, lucky, I bet you he knows this federal prison is way better than State Prison. Oh yeah, federal prison, they treat you like a real human being. You're like it's like you're not even. It's obviously not like being free, right, but it's 10, maybe 50 times better than being in state prison. Oh yeah, plus he's like 5 foot2. Yeah, and he was a pretty frail guy back in the day.

39:18

Yeah, and the FEDS isn't like the state where everyone's ganged up right exactly proba still going plus. He was in a medium or no, he was in a low. I think he was in a medium for a little bit. Then he was in a low. he was hanging playing sports was hang out white color criminals. You know what I mean: people playing sports all day, watching movies, gambling all type and eating good food, cooking.

39:37

Yep, the only reason I notice I went to State. You know we already talked about this last time I went to, went up State and all the people Upstate were like I wish I was in feds. It would be so much better than this. They all talk. I don't know how they know about it, but like you know prisoners, you know how they are. But State Prison sucks. Yeah, it's not fun.

39:54

Way more Bullit, way more going down, more gang stuff y killing, stabblings, all that. luckily, where I was at was a medium State Jail where was primarily for people who weren't there for C more violent stuff or people at the end of their sentences. So I did have people who I met, people who murder people, but they were like 23 years into the 25e sentence. So they're not, they're not.

40:20

They're doing good, right, they're not trying to, they're trying to behave. Yeah, they're trying to behave. They're older guys, you know. But yeah, that's what I was in when I was in Orleans state in New York. Dud, my buddy Matt, was doing everything he could to get his sentence cut.

40:33

He even went so far to where, like, there was this old dude who committed a Ponzi scheme, ran some big Ponzi scheme and he, this old guy, had no friends in the prison. So he like started talking to Matt right, and they were like just hanging out. He befriended the guy, was being nice to him.

40:46

One day they were just walking around the yard, just walking laps or whatever, and you know the guy was like getting kind of emotional, telling his story about how he lost his wife and all this stuff. And damn the story of the whole thing was like him and his wife got separated and when he went to prison the FBI was trying to like find where he hid. They thought he had more money, right.

41:08

So they were trying to get more money from him and he was like they thought he cleaned him out cuz his. He got a divorced, his wife took x amount of money and he told Matt he goes. He told Matt he's like. Can I tell you a secret? He's like. Can I trust you? And mat responds: was, of course you can trust me and he goes. That was the biggest mistake he ever made.

41:27

Was saying was trusting me, but event, he told Matt he goes. I got like 5 million stashed that the FBI doesn't know about. A day later Matt goes to the front office of the prison. He like: hey, I got some information I want to talk to this guy to. I want to talk to this guy's, whatever prosecutor or whatever. I want a deal.

41:46

He's like I can find you \$5 million if you guys cut six years off my sentence. Is that how he got out? He got out ear. That was one of the ways he got out early. He literally made a deal like where they cuz they'll try to. He's telling people that they'll try, they'll.

41:59

They'll try to you by getting you to spill the beans and then never give you a de like they'll you over on the deal. So he made that guy had lost \$5 million, the guy. So here's the catch, though I feel bad. Here's the C. Why would you tell somebody? Here's the catch Matt ended up getting, I think, four years off his sentence.

42:20

The guy got like a week, added to a sentence at the end of it, at the end of it all. But he lost \$5 million. Yeah, but he's, that was what that he was. He was going to sleep good every night. He's gonna be in prison until he's like 99. Oh so, he's never going to see it anyways.

42:36

So he was just hoping to get out and then get you know, maybe I'm 99 and I got \$5 million. He was trying to give it to his wife or something. I don't know. Why did he just give it to her? I don't know. Idiot, all right, well, ex wife, that's funny, but yeah, he's not ashamed. I'm sitting here thinking: why didn't you do that? He's not ashamed of snitching on people. He goes.

42:52

That's who I, that's who I was. I was a sociopath. He's a self admitted sociopath that one dude is. Remember his name. I can't remember his name, this black dude, and he is just known for being a snitch and does not care really. Yeah, I can't remember his name. I was, I can't remember his name right now. I want to look it up because I just want to know, cuz he's very famous right now.

43:14

He's very yeah. He's known for snitching and no one, and he's like. He's like trying to make snitching cool again. That's what he's trying to do. Hold on, let me look it up. Hey man, I appreciate a snitch who admits to being a snitch right versus a snitch who just lies about it. Yeah, that's true, because most people are snitches. BR, Charleston, white. Look at the mo like people. you're in the mob.

43:37

I've had mob people on here in the past and they talk about. You know, the number one rule of being in the mob is you never be a rat? Yeah right, you never rat on anybody. That's how you get killed. All these guys who get put in prison under these Rico acts, they're all. They're ratting on everyone, bro, everybody. That's how they're getting out. That's how they're getting out. Well, Charleston white is.

43:57

He gained Fame and notoriety for going on podcast and telling his story about how he's a snitch and how he red people out and he got murderers off the streets. This that. And the third. He's said: I don't care, I'm a snitch and I know it and I don't give a come, get, come, see me. That's how he talks. Who's? what's it, white? Pull him up. You should get him on. You should get him on.

44:15

Yeah, he's an interesting guy, my friend, who's in Miami, the one I was, tell one of the five people I know down here, MH, the Danza project. Shout out to the Danza project. Show Charleston. White. Look at this guy, this guy, that's him, that's him. He's friends with my friend that I grew up with, the Danza project. That's the name of his channel. We got to get him on Matt Cox's podcast, Matt Cox.

44:35

Yeah, they got to talk. They got to talk. You got to get him on Matt Cox, BR. He, they got a mill. He gets millions of views on. My friend, my friend blew up because of having him on. He was not. He had little way. he didn't have nothing going. Yeah, we're gonna get him on. Matt Cox: yeah, he'd be great, he might have already been on there.

44:51

He blew up because of his, because of being his Niche Comedy Club. What town, baby, he don't care, he's not, he's a comedian. If you look up, he's got to have a Wikipedia page. Right, I'm, he might have a Wikipedia. He's that big, I think. Oh wow, I think he's that big time. No, well, let's see Facebook x. No, no Wikipedia, baby. Yeah, who is Charleston white there? It is right there.

45:15

Nah, that's not a real Wikipedia. What the heck is that fish tank? Live, I don't know. Go back, go back to the one before that, where it says who is charlon white right there. okay, I bet you it talks about his snitching right here: gang reformed teenage

gangler to inspiring online activist reming himself, serving jail time. Inspiring online activist serving jail time for his juvenile transgressions.

45:39

Controversial remarks: yeah, all right, but so he's in Miami, huh? Yeah, what do you think about Miami? You like Miami. I don't think I've ever been to Miami. I've, oh, you haven't been. No, did I cuz? I came to Florida when I was young, but I don't know. No, we went to Orlando's, all right. Yeah, I been to Miami.

45:57

Yet the best thing about Orlando is close to the east coast, so you can, like you're like a 30 minute drive from Daytona Beach, depending on what part of Orlando there's so many cities in Florida. Yeah, I didn't even I wasn't even thinking about that till I was here this week. I was like: you got, okay, you got Tampa Bay, Miami, Jacksonville, Orlando, Miami.

46:16

Oh, I said Miami, Daytona Beach right, Daytona, yeah, Sarasota St. All these are all big cities like, bigger than Buffalo. Tallahassee, and these are all bigger than buffalo is so like. Really yes, Buffalo is so small. Maybe some of them, maybe some of them are like the same size as Buffalo, but these are all real cities, like big cities like, and I'm like.

46:39

It's just like weird that so many cities are just in one state, one little State, one little, one little wiener hanging off of the state. Basically, well, it's the oldest state, it's the oldest. It's where the SP, where the Spaniard landed, bro. we got. We got the oldest city in America. They Nam Florida after Augustine. Yeah, they named Florida. After the city in Sicily called floridia, there's a city in Sicily called floridia.

47:06

It's actually the name of one of one of the classic texts from appas. Florida Nam after that City. Yeah, Florida, boom, see it. What year can you find out what year the Spanish L discovered Florida? What year, what year did they land in St Augustine? 1492, I think. Is it 1492? Yeah, wasn't it Columbus OH? That might? That might have been the okay pause day.

47:33

Leon, the first governor of Puerto Rico, is credited with discovering Florida in 1513, on Easter Sunday W. Yeah, because in 1492 they discovered the islands first. They didn't go to the. Yeah, so that makes sense. 15. That's right, that's only 20 years later. No, that's yeah, 20 years later. Yeah, 20, about 20 years. No, bro, that brings me to what I wanted to discuss. You got to go to.

47:54

You got to check out s August while you're here. Yeah, I do. When you'll move here, you'll go there.

Founding Of The New World

47:59

Yeah, St Augustine's great, you know the founding of the new world was so critical because 40 years before that was the fall of the Eastern Roman Empire.

48:09

In 1453, the ottoman Turks take down the walls of Constantinople, and it's the bit they call it the Byzantine Empire, but they call themselves the Romans because the Western Roman Empire once has fell in 476, but there were still Romans in the east and they said they stayed there till 1453 and AD ad 1453. you didn't know this. Yeah, people, because everyone calls them the busit teams. It's kind of funny, because nobody wants to.

48:39

Nobody wants to consider them to be Romans. It's a very Western, Centric thing. They called themselves Rome. MH. Constantinople was Rome. Wow, by the way, to show you how even more Roman it actually is. When mmed iI conquered the ottoman Sultan, conquered the city and Constantine, the 11th was missing, probably dead, gone, never found again.

49:05

He took his throne, sent delegates out to the pope and says: I am the new Caesar and you better recognize me as Caesar. He wanted to continue the Roman empire under the Turks and the pope like hell. No, you're Muslim you. If you're not a Christian, you can't. He's like. I think he even said: if you convert to Christianity, maybe, but no, and they were like all right, fine, so he never.

49:31

So that's the end of Rome. But and this brings us to like what we're going to get into, because this is perfect. This is a perfect setup for what we're going about to get into. But Rome didn't really die at that point either, cuz you still had in the west the continuation of what they call the Holy Roman Empire. So there's a famous quote. Who is the quote? Was it by voler?

49:58

The voler famously says: the Holy Roman Empire it's not holy, it's not Roman and it's not an Empire. So he's talking. But there are historians that say Vol was not correct. It kind of was. well, in the sense of holy. It was Christian. It was a Catholic Empire. Also, at some points it would become a Lutheran Empire, depending on who the emperor was.

50:21

It could be a Lutheran Empire, it could be a Catholic Empire, and then it was even. There was even Cal EMP, Emperors, Calvinism, but they were always in. They were always in concord with the, with Italy. There were always, well you know, there was. It was always the Holy Roman Empire and the pope hand in and trying to take over. That was the world order of the time period.

50:43

The Franks started the Holy Roman Empire at charlan and it was at the time when the Eastern Roman Empire split from the Western Roman Empire because of the Schism of the Orthodox Catholic church. so the orthodoxes are the Greek East, the Roman Catholics are the Latin West, and the last emperor of the last emperor, that the, that the pope recognized, died and his and the crown fell to Empress Irene.

51:16

And he says: no way, am I going to let a woman be an emperor, an empress? He says: I'd rather turn to the west and I'm going to go look at charlan.

51:24

This is the 9th century, so charlan gets anointed as the Holy Roman Emperor, and from that day forward there was the, there was the Catholic West and the Orthodox East, and that was the end of that was the end of a unified Rome, as you will, MH.

51:41

And so the reason why I bring all that up is because you have this sort of Roman, Holy Roman World Order, led by the church, led by Kings and Emperors, and they're sort of like Waring with each other. Spain goes to war with France, goes to war with Germany, England goes to war with France, and they're all fighting each other.

52:02

But they're all sort of in this sort of Christian Dum world, they're all sort of living in what we call the West. well, by the time the 19, by the time the 18th century rolls around, you get people like Thomas Payne, who's writing books called Age of Reason right, influencing people's minds. Even in Germany.

52:24

You have the book Bavarian Illuminati, started by a guy named Adam Weiss hoop, who was a freethinking liberal, who preached, who hated Christianity, who was like Thomas Payne where he put reason in the Forefront, called himself an enlightened thinker, Enlightenment illuminated one. That's where the term comes from: right Illuminati. And they wanted to start. And then you have in. So then you have that.

52:52

You have the Americans in the west under the English, under the crown of England, MH, and they're not. They didn't get independence yet, but they want it, and there's a lot of Freemasons living there. George Washington was a Freemason.

53:05

So it's like you have these little secret societies of people with their and they're getting together in their underground: Freemasons in America, Freemasons in England, Freemasons in France, and they're all sort of, you know, sending letters to each other. And then you have the Bavarian Illuminati in Germany, Bavaria, and they're also another Freemason Lodge.

Dark History Of Freemasonry

53:27

What is a Freemason? A Freemason? What do the Freemasons believe in? Freemasons are a secret society.

53:34

You know what's easier than handing over all your personal phone data to the CIA, switching to Mint mobile. That's what mint is great, because they don't hack their customers. And switching over was so fast I got it done faster than they could sign the Patriot Act. That's a good business model there. no hoops, no kidnappings. Just \$15 a month for full service. Just go to mmo it. Six and 12 month plans.

53:57

All three month plans are \$15, including unlimited. Their website is so easy and fast to purchase and activate. You know it's not run by the government. All plans come with high speed data and text on the nation's largest 5G Network. You can use your own phone with any mintmobile plan and keep your phone number and contacts. If the government had a phone plan, this wouldn't be it, because it wouldn't inflate their budget.

54:19

But for people who like their money, mint will cost you less. If you want to check out mint Mobile's new three month Wireless plan for just 15 bucks a month, all you got to do is go to mintmobile.com. Danny, that's mintmobile.com. Danany, cut your wireless bill to 15 bucks a month at mintmobile.com dny. \$45 upfront payment required equivalent to \$15 a month. Speed slower above 40 gigb.

54:44

On the unlimited plan, additional taxes, fees and restrictions apply: see mintmobile.com for details. It's linked below. Now back to the show of initiation with 33°. They don't have an. They do not have a requirement for believing in God. They do not have a requirement for believing in God. No, it's not so they. It's a spiritual. It is spiritual.

55:06

They do like to allegorize history and do a lot of comparative religion stuff, symbolism, that type of stuff. All the Freemasons I've had in this podcast have, like the craziest, most wild conspiracy theories. Yeah, I love it. I love it too. Their only requirement is that: what's the only requirement? I can't. They believe that, like the world, population should be under 50.000. I don't think that's true. No, I don't. I don't think that's true.

55:36

That's one of those S sanding Stones thing. You found the Georgia guide stones. Georgia guide stones. That's only for after that guy to set that up for after an apocalypse or something like that. I don't know what that is, but I don't know if you can connect that to the Freemasons type in Freemason: world population belief. See what they come up with anyway, keep going.

55:54

And so what you have in you have this, a sort of this breaking off of society and Freemasons, very much like the mithraic Mysteries. Mithraic Mysteries, like the Freemasons, there is different levels of degrees. Freemasons have 33 degrees, but the mithraic Myster are the degrees like levels how enlightened you can be, how high on the, how highly initiated you are, right. So it's like Scientology. Yeah, but is there anything about population?

56:27

Yeah, you can be a Freemason, you could be, you could be Muslim, you could be Christian, you could be a polytheistic, you could be a Greek, you could. They don't, they do not put Dogma, or they don't they not put a particular Dogma at their Forefront. So they came from stone masons. Right, they stone masons, English stonemasons or Scottish stone masons. Actually right, but it's in the 14th century. They start, okay.

56:49

So in the 1300s, that's when Free Mason re begins, and so the population. Shit's fake news. Yeah, it's fake news. Okay, but it's a fraternity. it's a fraternity of Brothers who are getting together and sort of you know, making sure that everyone's needs are here. It is New World Order. This is way different. That new world order is not Freemasons. Yeah, and what? But I'm going to explain to you the.

57:12

I'm going to lead this up to the idea that the it might not be the Freemasons, illuminati people that are the bad guys. So I'm taking a hot take here, because I know a lot of your, a lot of your audience might think the other the opposite of that.

57:24

During the second red scare, both secular and Christian right American agitators, largely included, largely influenced by the work of Canadian conspiracy theorist William Guy car, increasingly embraced and spread dubious fears of Freemasons.

Illuminati and Jews notice how it's Christians that are pushing that. Yeah, so the Christians and the Catholics do not like Freemasons and Illuminati. The Catholic Church outlawed Freemasonry. The German, the Holy Roman Empire outlawed Freemasonry as well.

57:57

The only, the only place that didn't Outlaw Freemasonry was in England. Godless communism. Godless communism, yeah, which is funny, because Freemasons are not Communists. They the exact opposite. Yes, they want freedom of speech. They want constitutional republics. They want freedom to choose your God. It's completely opposite of Communism, there's no. The communism and Freemason are just Polar Opposites. So that needs to be said. But England did not.

58:24

The king of England never actually formerly outlawed Freemasonry, but the Bishops of the Church of England were heavily opposed to it and they wrote tons of dissertations against Freemasonry as evil. so that's that needs to be said in America was basically the place where the Freemasons can get go and live, you know, without any troubles, MH, and then there's France.

58:49

So before I continue to get into how these people took over and created a new world order, I want to skip ahead because this is important. When Germany, when Germany invaded France and they went to Paris, they went into their judici judicial building. They found all types of mithraic iconography and Freemason stuff, and they broadcast it. I gave you a video. Remember the video that was on from that documentary. Play that real quick.

59:19

Email it to you. Play that real quick. Yeah, we could play. Yeah, let me. What year did Germany invade France? 1940, think it was 1940. I think it was 1940. okay, it was in the beginning of the World War II, right? Okay, yeah, full screen that I got it. That's right there. The statue of mythus. Okay, so that was. That was broadcasted on German television in the 1940s, basically going.

1:00:05

Look, the saviors of Germany went into this evil, freemasonic, Illuminati, world order and look at all these Idols of myth rusters everywhere. So they see the Freemason

symbols on the top, the Skull and Bones, all that stuff. This is real. That's a real place in France. So they're not lying about going into their Jud judicial building and finding all these iconography.

1:00:29

But what I'm more interested in is so that stuff that really was in France, that's mithus. That's really there in France, in Paris.

Mithras & The Statue Of Liberty

1:00:38

Who's mithus? Mithus is the mediator God. his name actually means like contract, he's a mediator, God. That's why contract Constitution, to have a constitutional republic, is basically being ruled by mithas. Now we I was going to wait to get into the Statue of Liberty thing, but I, we can go back to the.

1:01:00

But since we're on this topic of mythis, remember, you were asking me you're like. People are saying that the Statue of Liberty is mithas. Yeah, so it's kind of no, but kind of yes this. So I looked into this. So the, the Statue of Liberty was built in 1886, and if you could pull up, the pull up, pull up the Statue of Liberty. Let's look at that first.

1:01:23

George joh is the one who told you about this on a podcast. Right statue of. Yeah, actually he did. Are you there? we go, you can go back to that one. Yeah, Statue of Liberty is based off the goddess libertas. That's the goddess on the left. That's a Roman Goddess. Libertas. From what year? From what year? Libertas? Yeah, she's. She was around during the Roman Republic and the Roman Empire.

1:01:44

Okay, so from five, I don't know, 500 BC till 500 AD, something like that. Okay, like she's around forever, she liberas. So but that's Statue of Liberty on the, on the right, yeah, but then there's the question of why does she have seven Rays? Right, and it's actually more complicated than that, and I think there's more than just libertas being displayed here was there another statue with seven Rays. The.

1:02:10

The designer of was named Frederick aust a bartoldi. That's the guy who designed. He was a Freemason. he was a Freemason. This was built in 1886, so he's a Freemason, so he's going to be into cism. Now there's a God a, the god of mithraism, the last Pagan religion of Rome before the Romans. The Western Romans fell before Christianity took over.

1:02:34

So even before that, before the 4th Century, during the reign of Diocesan, and then even after that, when the reign of Julian, the EMP, Julie and the apostate, they referred to their the head God, the main God, as the seven raay God, Seven Rays, is the god Soul, Invictus mithas. So sometimes mithas is depicted by himself as with his brother, with, like a twin brother, soul and victus.

1:02:58

Sometimes they're separate, but often, more often than not, it's Soul, inv, victus mithos, as one God with seven Rays on his head. if you can pull that up. So that's painting by the same guy. He painted this before he erected the statue. Okay, so this is his own. This is the same guy, Frederick Augusta ber toldi. Notice how he's emphasizing the seven rays of the sun, right. So there's a solar aspect here.

1:03:24

No doubt about that. Keep going, that's not it? Oh, it was the one where he was a little Idol with. Look up, just look up myth. Soul Invictus, seven Rays, all right. So, as you can see, there's a perfect example, the one in the middle right there. That's Soul Invictus with seven rays.

1:03:46

And, and like I said, Soul Invictus and myth thrus were merged together at the end of the end of the Roman, at the end of the Roman Empire. it. You often find in inscriptions where it says Soul Invictus mithas. So there's mithas with the seven Rays, and then I, then the one that we. So the go to back to the emails, where you find the seven layer, the seven, I'm sorry, the seven initiation layers.

1:04:12

This is the. This is the. This is the last thing I want to and then we'll get back to what we're discussing. It's one of the images in the email. This is: this is important, okay. So the, just like the in free Freemasonry, is drawing heavily from the mithraic Mysteries,

heavily the initiation cult., The Cult of Brotherhood, fraternity, Mythos, the frian cap, the frian cap on the top left, and mythus means contract.

1:04:38

So the frian cap on the top left. you'll see this with the god, the goddess manura, who's the Goddess of Liberty? And she, her paintings are all over the place, Lady Liberty, M, frian cap. And then so notice, beneath her, beneath the frian cap, on the top left, there's the seven Rays, Crown M. And what is that? A torch, a torch and a whip, and a whip. Maybe that's ammon's whip.

1:05:06

Yeah, so notice how the crown has seven Rays. Yeah, and it's a torch, that's the, that's libertas and the, the. So it's called heliod dramis, the sunrunner. That's what they call it, and it's a. It's a symbol of Liberty and the Sun. So the. So is the Statue of Liberty, mithraic? Yes, I do believe so. Is it also the goddess libertas? Yes, I think you could have both. I don't think it's black and white.

1:05:33

Last thing I want to show you on this is: look up the frian cap, Liberty. Click on the FR. Yeah, click on that where there says P. Yeah, now go to images. Nope, oh sorry, why did I do that? Yeah, remember, remember, we saw that Fran cap, right, yeah, that's the symbol of Liberty. Keep going down. Just skim through the all these paintings of Liberty of there. It is right. There, that's the French Revolution.

1:05:58

Okay, and they're wearing Fring caps. Yeah, so that's a, that's a mithraic hat. so the so okay, what I'm leading up to get, what I'm getting at here, is you have these secret societies of Freemasons in England, in America, in France and in Germany, MH. And they're, they're drawing from these old Roman Republic mithraic, of, drawing from a different, a soup of different ideas, MH. And this guy, this guy, looks high as hell.

1:06:32

That's French right there. So the French Revolution is definitely inspired by this. And as we saw when the in the 20th century, even in the even all way in the 20th century, when the Germans are invading France and they break in all their old symbol, symbolism is all mithraic and frian caps. And now so there's this push back between Americans, American freem, Masonic, GE Washington was a Freemason, right, George Washington. there's a.

1:06:59

There's this myth made up about him that he kneeled down and prayed to Jesus. That never happened. That's made up, it's never. It's. It's not any of the primary sources. The first time it's talked about is in, like, the 20th century, so it didn't happen. Do you have a? This is the craziest.

1:07:17

You have an English secret society, mhm, with Freemasons that are that are heavily connected, Ed, to the founding fathers, and they're called the anacreontic society, and this is. This is going to be big. We're just going to get to, because we're talking about the Star Spangled Banner here. Look up the anacreontic society, and I gave you that one picture of them, but it's going to be on their Wikipedia anyway, Ana, anacreontic Society, it'll fix you.

1:07:47

Yeah, there you go all right. go to the Wikipedia page. So this is a gentleman's club that started in London and it's based on the Greek poet an noon, who lived on the island of teos in the 6th century bcee, and their whole purpose was Freedom, Liberty, Justice, drinking, and they dedicated their God that they worship was dionisis. So they had a song. Now a bunch of their, a bunch of their members were well.

1:08:21

For example, some of their members were loyal to the crown of England. Big example: Samuel Johnson was a famous Tory. He met with them. He was part of their group. But there was also Freemasons that were in there, like James Boswell. James Boswell wasn't just any Freemason.

1:08:39

He was the Grand Master of the Grand Lodge of all Freemasonry, and this was during the year 1776. so you know he's buddy, you know he's, you know, affiliated with George Washington dur in the year 177. He's the Grand Lodge master of all Freemasonry and he's a part of this club.

1:09:01

So the anotic society they exist, they, they, from the 1770s all the way into the 1800s, I think right around 1810, they disband and they, their whole purpose, is to go back to the Greek way of life, the Democratic Republic way of life. Forget about the church,

forget about the Catholic Church, forget about the Church of England, forget about the Lutheran and all this crap, all this nonsense.

1:09:27

We want the ways that the Greeks gave us. And they even argued that. And this is another thing that Thomas Jefferson says in his in his letters: that common law that we as we know it has nothing to do with Christianity. It has to do with the ideals that were laid down by Greco Roman republics. Everything that we love and about the West comes from them: our architecture, our music, our theater, our comedy, our poetry.

1:09:56

We have to think we have to go back before the church to get to that stuff. The roots of our culture comes from that.

Original National Anthem

1:10:04

Now we have to play the anacreontic song, the one I was telling you about, because this is going to blow your mind. Okay, how do we find it? Go down there. It is okay. click on the anacreontic song right there the link: yeah, and you're, they're.

1:10:19

You're going to play it, but I want to. I want to play the one that I gave you. Cuz, it sounds way better than this. Okay, I sent to. Actually, actually, let's just play it. Just play the one here. Okay, this is how it goes. Published in 1778, written in 1773. What was going on back then? What does this song remind you of? Oh say, can you see what?

1:10:48

If I told you, those are not the lyrics, those are not the lyrics. All right now, play the video. FL was. Play the video that I gave you. I don't think you gave it to him, though, cuz, I saw in that list. It wasn't there, it wasn't there. How do we find it on YouTube? so I will send you the link right now and then you can send it to him. Is that perfect?

1:11:08

All right, all right, before you play it, let me just expl. Let me just say something real quick. Yep, this is the original lyrics of. The Star Spangled bannard that we all know

today: in love. Yes, okay, this was written in 1773 and it was published in 1778 and it was one of the biggest songs that the Revolutionary Americans were listening to.

1:11:30

Let's play it to anacreon in heaven, where he sat in full Glee, a few sons of Harmony sent a petition that he, their inspirer and Patron would be. When this answer are right from. The jly Voice, SP and flute: no longer be mute. I'll lend you my name and inspire you to vot and, besides, I'll instruct you, like me too, and Twine the M ofen with. Is Jesus of all right?

1:12:41

Pause, explain who bakus was dianis. That's the other bakus. Is dianis are the same God? Okay, it's not. It's not like, it's not like I'm saying. They're they equating with each other. That's two names for Di, who diis is the god of wine. Life, party, vitual culture, swelling of fruits, freedom. In Rome, he's called Liber poter. It's where we get the word liberal from. He's the god of liberalism. He's the god of Freedom.

1:13:09

He's the liberal God.

Olympics Controversy Debunked

1:13:10

That's why, at this, at the Olympics, that was dianis, not Jesus. In blue, you saw that the guy in blue was supposed to be diis. Right, Jesus was the fat lady. Jesus. there's, I guess, type in, type in the. Just look up a picture of the, of the opening ceremonies. We can see who's who. It's supposed to be a reincarnation or a reproduction of the last supper? Right, I don't think so.

1:13:33

I think it's a painting about dianis. No, no, I'm talking about the, the recent Olympic opening ceremony. Yeah, I don't think it's supposed to be that people thought it was. Type in and then type in dianis after it, right there. Okay, yeah, right, there, you go right there. Yes, now I get. I get why people think that there's some. The blue guy is supposed to be Dian Isis.

1:13:52

Yeah, so if you look at that, look at that. Look at now the woman in the middle, right with the crown. How many here? This is it? look, she's got seven Rays on the crown, bro. Yeah, I know, I know I was going to. I was going to bring that up, but you caught it first. Nice, good job, good job. You caught it first. Is she supposed to be Jesus?

1:14:08

So you see where I'm going now. Is she supposed to be Jesus? There she's not. Look it, I'm going to prove it right now to all the idiots out there. I thought the guy who made this literally said this was supposed to be the Lost supper. No, you, you got too many right Wingers in your ear, bro. I do look at this. Look at this AG. Here's the painting right here.

1:14:24

Can I send this to him? Yes, I'm just joking, dud, I do too. We all do we all? I listen to both sides of the political spot. Here we go. Here's the painting of Dian Isis on the ground, and there's a. This came out. This was before the Last Supper. The Last Supper was inspired by this. Okay, Steve, I'm emailing this to you.

1:14:41

Okay, so let me look up the dates real quick while he's doing that, so we can get the dates right. Dutch painting: Leonardo da Vinci's Last Supper was in 1945, 1950. Okay, no, it's actually true that the Last Supper did come up before this. So This Feast of the Gods might have been inspired by Leonardo da Vinci's Last Supper, but he's. It's not Jesus, that's Apollo. And, by the way, Apollo.

1:15:10

Oh, look, it, see the Sun Ray. Yeah, yeah, look, there's dianis on the ground. Right, this is supposed to be like Olympians. right, that's the Olympians. It's for the Olympics. Okay, so that lady is not supposed to be Jesus, she supposed to be Apollo. All these Christian right Wingers are losing their minds over nothing. This was a perfect Olympic ceremony. Those are the Olympian gods. There's dionis on the ground, there's Apollo in the middle.

1:15:34

Now, guess what you're going. This is so what? What is the name of this painting? It's called. The Feast of the Gods, the Feast of the gods. Someone told me this is earlier than the Last Supper, but it's not true. This is after the Last Supper. Yeah, let's read

about the Feast of the Gods. What's the Feast of the Gods all about? It's a Renaissance painting. Baby, okay, we go. The Feast of the Gods.

1:15:55

Oh, that's another one. that's a different one. An oil painting by balini. Yeah, that is a different one, it's by. It's by Jan van biller. Okay, just proba Ty. In Jan van, there is top one. There it is okay. There we go. Painting by a Dutch painter, Jan van biler, created around 1635 to 1640 in Musea magn. This is this is perfectly lines up with our, the French liberal ideology. Right 17th centur, little earlier.

1:16:26

Go up down, down history. I want to read history. The painting represents popular mythological subjects on the Feast of the Gods, has been the property of the French Republicans. Okay, go up a little bit. Explains it. Go up, oh, look at this. Go, explains right there, right there. It explains it. number of the picture there.

1:16:41

In one of the number of pictures in Western Art to depict the Feast of the Gods, in this case at the marriage of Fus and pelus, bakus in the foreground says: bakus dancing, bakus, like just like from the song: go down, go down where it says: Olympics. The painting came to public attention following, okay, controversy of the summer got it. That's what it's supposed to be. Yeah, it's the same painting now.

1:17:04

Okay, what does this have to do with da Vinci, though? Da Vinci painted the Last Supper, right so people are conflating this. People are saying that's the Last Supper. It's not. It's actually this one. Oh so they. So it was kind of a bad. It was kind of like a an overreaction Without Really checking into it right. right now I do want to show. I want to say something about Apollo in the middle notice.

1:17:23

How Apollo has Apollo see how Apollo, yeah, punching on Apollo, can you zoom in? Yeah, can you zoom in on Apollo? There's bakas down there and go up Apollo's at the table. Apollo's got the sun rise. Yes, now he doesn't have seven Rays, right, doesn't? Who's this person whispering in Apollo's ear? Is he got a hookah? He's got a liar, a liar. Yeah, oh no, he's Apollo's holding a harp. Oh it's a harp.

1:17:46

And the other guy has got some. He's like maybe smashing something into a cup or something type in. Okay, so I want to connect Apollo to mithos and do some comparative mythology here, because, remember, we saw mithos with the seven Rays right type in Apollo. mithos. That's an old right there, naked Apollo mythras. That's the one that one this statue right here actually has inscribed in it.

1:18:13

Now there's more than seven Rays, I get it, but it's a solar halo on a god who's called. It's inscribed on there. I think it's on the back of it, mithos, Apollo D. So it's they're equating them the same God. So there is a connection there with that painting with myth rosp. It is a kind of a jump, kind of I'm doing like the meme where the guy's connecting the dots right now.

1:18:35

You know, you know the guy from that's sunay, Sun Sunday. That's always sunny, that's always sunny, and you know that Meme where he's connecting the dot. I'm kind of doing that right now, but just to show you that mithos and Apollo are both solar deities with solar rays. You know what I mean. Yeah.

1:18:50

And so that painting, just like, just like with the so, with the statue of Li holding the torch with the sound of RS, it represents Liberty. Dionis and Apollo are these two Gods, but, as nii points out, they're sort of like a contrast of each other, but they both are like. And if you want to finish that song up, cuz, Apollo comes in that songo, go back to the song. Apollo comes in, that song too.

1:19:16

You closed it. God damn it. Boom, yeah, go like halfway through. a little bit before that, though, little before that, though, right there, ye sons of unon, then join hand in hand, preserve unanimity, friendhip, and love dises to support what. So Happ you, thean of gods is of the name for juper. We our toast it be. May our club flourish, and ofon and Twine a m of Venus with marine and long the sons of andne.

1:20:36

All right, Venus is Lucifer.

Illuminati = Luciferian

1:20:41

Venus is called Lucifer in Latin. Okay, so you have. And bakus is also called the phosphorous lightbringer. That is a luciferian ode right there. So it's actually, arguably, that there are the this Illuminati New World Order of liberalism, the American Revolution, the French Revolution. So that, fat lady, is the devil. It's luciferian I love, as we talked about in the last episode. Who are the bad guys?

1:21:11

Is it the luciferians or is it the church? Right depends on how you see it right, right? So they do have a point. Christians do have a point when they say that Illuminati, New World Order, Freemason is lucif. You're right, it is luciferian, cuz it's enlightened ones, Illuminati, it's Lucifer. The enlightenment is luciferian, okay. So the American Revolution, this is. This brings me to. The Star Spangled bannard.

1:21:41

How did we get from that to the Star Spangled banard? Right, how did we get to that? In 1815? So 40 plus 50 years later, mhm Francis keyth Scott is in. I forgot what city he's in, but he's watching the Americans getting destroyed by the English, by the British royal Navy. There it is. Francis Key Scott witnessed the bombardment of Fort McHenry by the British royal Navy during the Battle of Baltimore.

1:22:10

So somewhere along this Adventure that he's in, they're all listening to this song and drinking. They're all listening to the notic song, and that's how you know. There's a bunch of Freemasons around. How how do they even know this song exists? How do they even know this song? And they're playing this song and they're listening to it and they're all drinking. They're all trying to keep their spirits up right.

1:22:30

And Francis Keith Scott writes new lyrics to this song about this day, about the bombs bombarding. He changes the lyrics and he, but he keeps the song because he wants to keep that spirit, that Bak bakic Spirit, while changing the songs and americanizing it. so now you have the star spangle bannard, which is our, our national anthem with bakic, daian, luciferian roots. Nothing to do with Christianity. It's the opposite. Wow, isn't that crazy?

1:23:04

That is our star spangle that all these Christian nationalists love. They take their head off, they put their hand on their heart and they sing it. They don't even realize they're singing an Ode to Dian, Isis and Lucifer. That's funny as devil brother it is. And he said he even says with my fiddle and flute.

1:23:23

In the song it's one of the lyrics that's Pan, the Devil with the horns and the Shaggy legs playing the flute that's the imagery of Pan shows up in that song. Yes, I definitely pull that up. Pan fiddle flute, that's the flute that he uses, could keep going. I think it was right there. oh, where's pan? Google's blocking it. Google sucks. Put God, pan, God, pan, God. Pan with the fiddle and flute.

1:23:51

Yeah, there he is at that, there he is. So that's part of the lyrics of the song, the jolly old gression with his fiddle and flute. That's pan, baby, that's the devil, dude. So they're singing this song that we all love for our Beloved Country. That's all about freedom and liberty and reason. That's the old Greek ways, that's the old dionan ways.

1:24:17

And then the anotic society was a secret society that focused on, like liberalism, freedom of expression, dianis and Aphrodite sexuality, all that stuff. So is that pan on the left, right there, pan on the left, with the clothing feet, yeah, and the horns, he's teaching the kid how to play the. That's the devil. wow, dude, that's a Roman statue right there during the Roman Republic. That's so crazy, dude.

1:24:45

It's it gets dark, in fact, Inon the. Well, it's only dark because the church made it dark. Exactly right, exactly because church more, it sort of change the way people see the world. Mhm, but that's what these people are trying to go back to. They're trying to go back to Freedom, trying to go back to Liberty. The word Liberty comes from Liber Potter is dionisis. That's his name in Latin.

1:25:08

Just to show people what I mean by that: typen Liber Potter. Watch what it comes up, Liber Potter. There it is Liber. Look at this ancient Roman religion and mythology, Liber the free one, also known as labor Potter. the free father was a the god of

viticulture and wine, male fertility and freedom. He was the patron of deities, Patron deity of Rome's pleian, and was part of their aventide Triad.

1:25:36

His Festival of Ilior, liberalia, became associated with free speech and the rights attached to the coming age. His cult and functions were increasingly associated with romanized forms of Greek dionis bakus, whose mythology came to share: that's us, that's our God that we Worship in America. Wow, that's the god, that's the god of the New World Order, which is French Revolution, American Revolution, the end of the.

Rome's Antichrist; The 2 Beasts Of Revelation

1:26:03

So the Bavarian illuminati people kind of downplay their.

1:26:08

We always talk about the French Revolution, the American Revolution and then, like Bavarian Illuminati, kind of failed. No, they didn't. The Holy Roman Empire was disbanded in 1806. so whatever they were doing over there, whatever they were writing books they were writing literature they were putting out, was changing people's minds to the fact that the Holy Roman Empire Falls. In 1806, the Church of the church, the England's control over the New World, falls.

1:26:37

In 1776, the French Revolution. When was the end of the French Revolution? I don't know that, but it's in its right. Around the same time you have these big revolutions happening. Good qu yeah. Look that up. French Revolution 1848, right? So within a 50 year span you have these major revolutions happening and, as a result, the old Holy Roman order, Church, Vatican control done, and now we have a common law which is called Napoleonic law.

1:27:10

Napoleon puts his name on it and I'm going to. I'm going to show you the end, the stamp, when we knew it was finally over. When the Liberals win and the Roman, you know the Holy Roman Church loses. I gave you an image and I saw it. This one is actually in the email. Okay, and this just tells you everything you need to know about what happened with, yeah, Napoleon, who's allied with the United States.

1:27:38

He's allied with the Freemasons, right. I think it's the last one on the bottom. Yes, can you make that as big as possible for us? Right there, Steve, he's new to Mac. He doesn't understand how. Nero and Kula. This is a code of arms of Napoleon. So you have, and, by the way, I've heard people say that the two headed, Janice, is Napoleon and Tom Jefferson. really, that's what I've heard people say.

1:28:07

What is that demon coming? It actually looks like them. You know how Napoleon looks like. Look at the one on the right facing Europe, that's Napoleon. The one on the left facing the new world, Thomas Jefferson. So that's the new world order. Right now, the pope is down on the bottom, on his hands and knees, basically holding up, and so there's images there. Those images are the battles they won.

1:28:31

Those two cross and bones are as the fall of the Holy Roman Empire and the fall of England's control over the seas. So oh no, I'm sorry, no fall of French Kingdom, that's not. They don't care about England here. So you have the fall of the Holy Roman Empire and the fall of the French Kingdom and return from Napoleon. Steve blow it up.

1:28:57

And why is the pope on his hands and knees with this thing on, defeated the pope. They defeated the church, the end of the church. Now now, why Caligula and Nero? Why them? Right? Those are the two beasts from Revelation. Nero is 666, kiga. Who? Yes, they're who. The two beasts from Revelation are Caligula and Nero. Really, it's a, it's a middle finger to the Christians saying we won, you lost, the Beast won.

1:29:25

Now I can prove this to you. What is the demon head coming out of the top of Jefferson's and Napoleon's head? I don't know what that is. Punch in on that, on the very, very top. I don't no idea what that is. To be honest, I don't have no idea. I don't even want to know, cuz I don't want to. It looks like something that might give me in trouble if I talk about.

1:29:44

Caligula is 666. No, Nero is six. Nero is the second beast in Revelation. If we go to Revelation, should we do it? You want to go to Revelation? Okay, go to Revelation. Go

to revelation 666. Type that in verse Revelation, verse 666. All right, click on NIV. I like the NIV. All right, did you just go down? Oh yeah, there.

1:30:04

So okay, the dragon stood on the shore and I saw a beast coming out of the sea. It had 10 hordes and seven heads that's the Seven Hills of Rome, with 10 crowns on its horns and each of the Blasphemous name. and I saw the Beast that repres resembled the leopard but had feet like those of a bear. The dragon gave this beast power and his great Authority.

1:30:23

One of the heads of the Beast seemed to have fatal wound. The fatal wound had been healed. The whole world was filled with wonder and followed the Beast. People worshiped the dragon because he had given it Authority. This is where it gets. Okay. Here's where, here's how I know. It's Caligula, the first Beast. Okay, we're not in the second Beast yet.

1:30:39

Okay, okay, it says on verse 5: the Beast was given the mouth to utter proud words and blasphemies and to exercise its Authority for 42 months. That's very specific. Guess what kig ruled for 4,42 months, and guess what he did. He was, he was, he was. while he was Emperor, he persecuted the out of the Jews, went over there and made them basically worship. His Image forced them against their will.

1:31:03

He was a horrible Emperor to Jews. MH, now the second beast. Go down the Beast out of the earth. Then I saw a second beast coming out of the earth. It had 10 horns, like a lamb, but it spoke like a dragon. Now go down to the last part of this verse. This calls out for wisdom. Let the person who has Insight calculate the number of the Beast, for is the number of a man?

1:31:27

The number is 666. Now, type in Nero gatria, gatria. How do we know 666 image? Go to. Yeah, prist theology typically support the interpret 666. Now just go to images. Forget about prist. I'm going to prove it to you right now. Look, click on the first link. Click on the first link. Punch in all right, every letter in Hebrew has a numerical numer. We talked about this last time.

1:32:00

If you add up Nero Kaiser and Hebrew and add it up at 666, it's him. Now, guess what? Now you might say that's kind. Maybe it's a coincidence. In the Latin Bibles the name neero Kaiser is spelled differently. So when you, when you equate that it becomes 616, in the Latin Bibles it actually says 616. So it's impossible for anyone else to fit that. It would be one out of a gazillion chance.

1:32:26

And then for it to fit the. The Narrative seven heads and all that, it's Caligula and Nero. So go back to that paint. go back to that Cod of arms now. So now? Yeah, now we know what the hell they're trying to depict here. The pope is dead on the ground. I don't know if he's dead or not. He's on his hands and knees. Yes, that's an Unholy sight right there.

1:32:49

Right, you got the two beasts from Revelation, the two worst people. Caligula was the worst to the Jews. Nero sacked the Jerusalem Temple. These are the two worst Emperors in history. They're the two beast from Revelation. And then you have them bragging about everyone they defeated. In the middle, all the winds look.

1:33:07

See on the top, where it says: jaf, it's really blurry, but what you're seeing on the top middle says Jaffa, and it's Napoleon in his army blasting away a bunch of people at Jaffa because he won a battle there. Napoleon is bragging that this world and now the last thing I got to show you guys, this: you got to see this.

Napoleon Deified

1:33:25

Look up the painting of Napoleon being anointed.

1:33:27

This is: this is the end of the church in control of the world. It's the. It's the new start of what the world we live in today, which is the world of constitutional republics. It's the world that you and I inhabit today is thanks to Napoleon and George Washington and the Freemasons. This is what all right, let's. These are all. These are all amazing paintings. by go to the first one: coronation of Napoleon.

1:33:50

Let's take a look at that and zoom in on this, on this baby, and this is so iconic. Zoom in a little more. This is such a turning point in history what you're seeing here? Wow, can you zoom in? There we go. That's what I want to see now. Look now, look what's Happening Here? Where's Napoleon? He's holding the crown. Okay, who's he? Putting the crown on himself? Okay, he's crowning himself.

1:34:15

He's the new emperor, and he even calls himself the emperor, but he ends the Holy Roman Empire. Done, there's no more Holy Roman Empire now. England already lost the new world and that's already constitutional republic. He sets up the same system that George Washington sets up in Europe becomes common law. even today, as we speak, Napoleonic codex is still the law of the land. So his, he's the last great Caesar Augustus.

1:34:43

Alexander, he's the last of them. He's the last. We're in his world right now. Nobody has come along and undone what he's did. We are still George Washington and Napoleon are the two. That's why they're the two heads. We live in their world right now, the world that they design. I, it was Napo and Thomas Jefferson in that thing.

1:35:03

Thomas Jefferson, right, but George Washington being the first President, I just said that yes, right, right, yeah, you're right. Thomas Jefferson is probably the most important out of all. So he crushed the church. Now, who are these people with the Pope hats on? That's all the Bishops and Cardinals. Now think about this in the painting. it makes Tomar look like they're enjoying themselves. But they're not. They don't look like they're enjoying themselves.

1:35:22

They just realize their world is over. It's the apocalypse they do not want. Napoleon, let's check out a different one. These guys look sad. Yeah, that's probably what the painter was trying to do. Look at the Pope's face. He's like. He's like I just lost. He's lucky that he's okay. So this is the. This is the fork in the road where we're being ruled by religion versus being ruled by law.

1:35:46

Yes, go up, go up, go up. The one right there on the right there, with the that one that's him being anointed. You know what anointed means right in Greek. I do know

what it means to be christed. He's christing. He's being christed. Napoleon is the Christ. zoom in on that a little bit more. Can you punch in a little bit more with your, with your pad? No, I'm at the I'm.

1:36:07

You're the limit, I can. That's a good. That's a good one. Go, that's perfect. That's Napoleon being christed by the pope. So what is in that little jar? It's holy oil is a snake. Venom might be, Fu might be. You never know. It's got a little cross on it, like poison cross. That's Napoleon being. He's the last Christ that ever lived. Now. And there's one more conspiracy there about Napoleon type in Napoleon: Apollo.

1:36:34

Napoleon is Apollo type. That in Napoleon is Apollo. Yeah, they thought he was Apollo. This is, It's All Coming Back full circle. Go to images. I wonder if I can find this. There's like a. There's like a conspiracy theory. there's a conspiracy theory about Napoleon being Apollo. It's a three in one smoker. Oh, is that the painting right there of Napoleon? That's it as a painting of Napoleon, as Apollo. There it is, there it is.

1:37:02

I don't know why. It just says grer on it. Those thanks, granger.com, for being. Oh, they're making you. They're making you buy the image. They put a watermark. Yeah, so that's a famous painting. From what year is that? 1853? And there's Napoleon as aollo, with the crown, with the wreath on his head. They deified him: wow, and there's. There was even some people. There was even some people who said that his name na Apollo Napoleon.

1:37:29

So they're saying they put an n in front of Apollo, you get Napoleon. That was like. It's like. It's not real, but people, people conspiracy. there's conspiracies around during this time period, people saying he is, he was, he was named Apollo, all just with an n in front of it: napalo Leon. No, that's wild. So yeah, so we're. What we're seeing is between the American Revolution and, as we pointed out, you got Thomas Payne, who's?

Thomas Paine's Age Of Reason

1:37:56

Who thinks that Jesus is an allegory of the sun. He's a mythicist. He doesn't even believe the Bible's true at all. He thinks it's all made up. He's does pain. Pain completely disses Christianity. Yes, he's the philos philosopher behind the whole American Revolution. And how was that perceived by the rest of the population? Like, what do people think about that? I mean he started. Thomas pay was hated by the Christians hated.

1:38:19

They burned his books in England. I mean. What did people like other founding fathers think of him? For that they all WR about him as the greatest philosopher of their time period. Is it true that he, when he died why think we still know about? No one went to his funeral, like no one liked him anymore, CU? He was because it was mostly Christians that populated the world.

1:38:37

That's why these founding FS had to play the Christian game a little bit. They couldn't just totally dis Christian, like Jefferson made his Jefferson Bible. Jeff Jesus was great, was a great philosopher. You know, George Washington basically just kept his mouth shut on the whole topic. M never praised Christianity, didn't diss it either.completely stayed neutral on it. Doesn't say about it, right? He? It says he's an Anglican, but he's an Anglican. in the same way.

1:39:04

I'm a Catholic. I was born Catholic. I got confirmed my name's probably in some database somewhere, but I'm not really a Catholic, right. I'm not going to church, right. That's how he was. There's no, there's no evidence of him being like Proud To Be An Anglican. He just was born into anglicanism, right. By the way, Anglican Church is the Church of England, so why the hell would he be an Anglican? It's just nonsense.

1:39:25

Okay, but so what I'm? The point I'm getting at here is: you have this, you have this: the roots of American, the roots of the West, I would say, is actually not Christianity, Judaism.

1:39:39

It's actually Greco, Roman, bakic, dionan, Republican, Democratic worldview, and those are the things that these people, from the French Revolution to the revolution

in Germany, to get rid of the whole Roman Empire, to the revolution in America, all of them sort of seeking to go back to th, to that way of life.

1:40:00

But, you know, also updated a little bit too, and the idea that this is a Christian Nation, that we need to have Christian nationalism, like Nick Fuentes, is pushing, is not historically accurate. It's actually the opposite. If anything, if anything, it's the opposite. I'm not saying it's definitely the opposite, but if anything, it's not the Christian way. If anything, it's the opposite. Right, and the history proves it. Napoleon was against the church.

1:40:27

He dissed the church. He made the church. he made the pope anoint him. Against his will, he conquered all of Italy's lands, he conquered Sardinia, he conquered Sicily, he conquered North Africa, he conquered Israel, the Americans you know. Basically, like we mentioned Thomas Payne, Thomas Jefferson, I got this last quote that I want to show you about the what's his name?

1:40:51

Last quote: this is like: he just bluntly says this is from James Madison we haven't talked about him yet where he says that religion and government are will. Both exist in Greater Purity the less they are mixed together. The purpose of separation of church and state is to keep forever from the shores the ceaseless Strife that has soaked the soil of Europe and blood for centuries, like he's basically saying Europe for the last 10 centuries.

1:41:25

We need to end that. that's not the way we want to go forward, which is what we, which is, if you think about it. That's basically What's led to today civil rights movements, people wanting to be free. That's sort of the new God that we're under, which is dying. Isis, if you think about it, yeah, the freedom, God. Well, we've like, invented, it's like in our world now, like thing.

1:41:48

Everything is so good in America, life is so easy here we've like, invented new religions and people treat the Democratic party and the Republican party as their religion. Yeah, or like woke religions, people. We found new Hills to die on. Not, it's

not religious anymore, because we've made a new religion. Essentially, yeah, new to fight over. Yeah.

1:42:07

And even on the top of, even on top of the DC building, there's the manura, that's the Roman goddess of Law and Order and Justice. There she is right, there, Statue of Freedom. But that's manura, that's the Roman minurva from the ancient Romans, with the helmet and the sword. That's why she was always depicted. And so we're under. The world order that we're under right now is a is a world.

1:42:35

Well, I guess American and European World Order is a liberty world, and even both sides of our political Spectrum love Liberty. Conservatives love Liberty. They love freedom of speech. so to liberals. So, like the new Dell, there is no more like you have creeping in now, this new sort of Christian, nationalist sort of creeping back in and trying to take over the right wing a little bit. You see that you know what I'm talking about.

1:43:02

But a lot of conserv, a lot of Libertarians aren ar, aren't buying that. I feel like the whole is like, even if you look at Trump. He's not a really religious guy. You know he's never been religious, but you know he has to kind of blow that dog whistle a little bit because he wants the religious people.

1:43:20

The religious people are for the most part supporting Trump, right, so he's got to throw him a bone every now and again. he's doing what he's playing the game like the founding fathers did right, because you know he's like. These people are Christian. So I got to kind of play their game a little bit.

Bible Stories That Were Made Up

1:43:36

Yes, exactly.

1:43:37

And the Thomas Payne thing is super interesting, like reading his book about the Age of Reason, like I told you, like the quote that out of that book that I love the most,

where he was saying it's only by the exercise of reason that man can come to discover God. And he's like: take away that reason and he would be incapable of understanding anything. And it makes it's.

1:43:59

It makes sense the way he elucidates it where he's saying, like someone cannot, like you, don't come from nothing. Everything comes from something. any reasonable person can understand that one thing comes from something else. But like, where did the first thing come from? Right like, where did the first man come from? Reasonably, we can't fill in that blank. So we fill in the gaps with God. Right, god of the gaps, because there's.

1:44:24

No, we have to be able to understand the way the universe works some way, right we don't. That's exactly what Thomas PNE was saying in Age of Reason. He's laying out. He's like we've always believed that the gods were in control of the rain, or they're in control of the tsunamis and the floods. Right then we figured out what was really happening. There's a signs behind it, there's a cause and effect.

1:44:43

And then we said: okay, well, God's behind other things like the sun, or why does the earth move? Or why are the stars moving? The God's got to be that right, and it's moving to the gaps where you end up getting like wherever we. Any Mysteries we have any, we can't figure out. That's God right, which I don't have a problem with that right. I people have a right to believe in Mysteries being Divine totally.

1:45:07

You know totally, and then you know. The other great thing that he elucidates really well is that when you look at the Old Testament, he Compares it to like anybody explaining, like in a court of law.

1:45:20

For example, if I go and if I go into a courtroom and I give testimony based on an anonymous source saying I got something, I got this evidence from somebody who's Anonymous that would never hold up in a court of law, not even in real life.

1:45:36

If I told you something that told you I heard something from somebody who's Anonymous, like you would, you could believe me if you chose to, but you have no

reason to believe what I'm saying. Right, and that's add a whole another layer onto it. Now I'm telling you: not only is a source Anonymous, but the son stood still or this person spoke face to face with God.

1:45:57

Right now you're just m taking it to a point where it's completely ridiculous. Yeah, and that's what he says. The Bible is comprised of. it's comprised of these stories who were composed, but we don't know who the authors were, and the explanations they're getting are from Anonymous sources. Right, and they're ridiculous claims. Yep, he points out that Matthew, Mark and Luke and John we don't even know if those are the real names.

1:46:18

He one, he's one of the people who put that together, yeah. And he also points out that a lot of the stuff that we find in the Bible seems to also be drawing from other Pagan myths. Yes, he points that out as well. And, as you said, the sources for the claims. A big example is Paul, Paul's epistle. Corinthians is the big one.

1:46:38

In Corinthians, Paul says that Jesus returned to 500 people and first he appeared to keus, then he appeared to James, then he appeared to 500 people, and they did. Paul never was there. Paul doesn't even name who the 500 people were right. So it's not even a primary source. It's not even a secondary source. It's kind of a thirdhand source. 500 PE people will say this too.

1:47:03

Christian apologists will say: we have 500 eyewitnesses that saw Jesus. Who are they? What are their names, where, where? What are their? What's their? What's their testimony? No, you have one text that says they heard from a, from a rumor. You, they heard a rumor that 500 people saw him. That's not 500 individual testimonies, that's one thirdhand source that was written down for the first time.

1:47:28

How many years after it allegedly happened, probably a decade after a DEC, 10 years. Paul wrote it within a decade. Paul wrote pretty early. Okay, so Paul's letters? I think it's like 40 something, 40 something. Yeah, Paul wrote it about 10 years later. Yeah, Paul, maybe 20, I don't know 10, Paul, you have to give that credit.

1:47:46

Yeah, Paul wrote his letter pretty early, but you're telling me that 500 people saw risen Jesus and they didn't write anything down and only Paul wrote it down. MH, nobody says anything. Nobody says, I saw a miracle today. My name is this place. I live in this city. Boom, WR that out there. Nobody else. It doesn't get to anyone. It only Paul is the only one that knows this. MH.

1:48:08

Sorry and I think you pointed it out on the on the first podcast that we did together that in the Old Testament, the writings, the books of Noah were written allegedly like 800 to 900 years after he died. The first writings of, even later than that, CU, Noah. Supposedly, if, let's say, Noah lived and we do the math, we would end up. So this is how we do the math.

1:48:30

You can look in Luke's genealogy, you can look in Matthew's genealogy and you can do the math between all the sons and fathers. You go all the way back to Noah. Yes, you would end up PL plus or minus 50 years. CU. Some of them have are like we don't really know exactly when they died.

1:48:45

We're just going to give him 10 to 20 years Gap, right, you can give or take some, you end up around 20,2500 BCE for Noah. I think that's what it is. Yeah, 2 000 BCE for Noah. Give or take some, but like you could even go just to give it yeah, when did Noah live? You can look that up. It's a good idea. But like Noah, wi to yeah.

1:49:09

So I was going to say I'm in the middle like give or take some. We don't know exactly when, but at the latest it's going to be 3 000 at the shortest. And that's, and that's if we're doing all the math about who, the fathers of Josiah Hezekiah, all the people in gen, Jesus's genealogy, going back to Noah. right, you would end up somewhere between there. Okay, mhm. So 3,00.2,000 the story of Noah.

1:49:36

So let's go with the latest or let's go with the earliest. Let's give them a bone. Let's go with 1998 BC. Let's say Gees, let's say Noah died in 1998 BC. M, okay, so that means the story of Noah doesn't show up in literature until 300 BC. The first time Noah is the first time Noah shows up in anyone's sources is 300 BC. That's over a thousand years plus 1600 years.

1:50:05

1600 years have gone by and nobody mentions Noah ever. That's pretty suspect. Now you do. You do have other flood stories before Noah. Yeah, you have usn pitum, you have dualon, you have Epic of Gilgamesh, but those AR don't mention Noah. Those are other guys doing flood stuff. Noah stuff. Yeah, Noah shows up. Noah shows up in the primary sources. Around 300 BC, like he points out, 1600 years have gone by.

1:50:37

That's why, when you said 900, I said it's more than that, 1 600, and that's if you give them the latest date, it might even be more than that. If I said 2500, we're looking at 2 000 years before Noah shows up in the history. It's made up. It's made up mythology. It's insane. Let's just be real here.

1:50:55

Yeah, you know, I know, it gives a lot of people Comfort to think that we have it all figured out. Religion's always been correct, but it's just not true. I'm not, I'm not even being, I'm not even an atheist, I'm not. I'm just saying that this one isn't true, but I don't know what the truth is. I'm leaving it open. I think that's the best way. I think it's the best way to approach it.

1:51:13

And then he also said that the he thinks the Book of Job is the one book that doesn't belong in the biblical Canon. Who said that? Thomas Payne? Oh, he said the book of Jo. He say that he said it stands totally disconnected from the other books. It does because it doesn't mention. It doesn't mention Abraham or Noah, or Jacob, or 12 tribes. It doesn't even mention Israel and it mentions like astronomical names.

1:51:38

Yeah, it has. It has zodiac figures in it and there's no evidence that the Jews knew anything about this stuff. well, they do eventually, but I think I know what he means. He said they had. They had no knowledge of astronomy at the time it was written. Yes, so he's saying when, when job was supposedly written. They wouldn't have had that information, yet it would have been centuries later.

1:52:01

So yeah, that's a good point, and that's the thing. Yeah, job is a weird book. It does stand in its own category. Yeah, that's wild dude. It doesn't even happen in Israel. It

happens in the land of oo, no o u, no one even knows where that is. He never mentions the 12 tribes, doesn't mention Jerusalem, doesn't mention Jacob or Noah, or Moses, or the laws or the Torah. It's just. It's just randomly by itself.

1:52:26

Look it. location mentioned in the Old Testament prominently, the book of. There is a man in the land of ooze. It is mentioned, it is most often theorized, that the land of ooze. So they don't really know for sure, right, they just kind of guessing, but yeah, but yeah. So the founding that's. I just want to PE.

1:52:47

I think if there's anything I'm really trying to like drive home is that these revolutions that happened between the end of the 18th century through the middle of the 19th century, with American Revolution, French Revolution and so forth, are driven not by judeo christian ethics but the opposite of that, the actual rejection of those things. And that's what our constitution is kind of built on.

1:53:14

It's kind of built on the ethics that are opposing judeo Christianity and looking and sort of drawing from the old Roman Republic of the, of the Pagan culture, right, the dionan appolloni culture.

Aliens & Surviving The Apocalypse

1:53:28

Yeah, you know, and out of all the planets that are able to inhabit life in our solar system, our planet is the one that Jesus came to.

1:53:37

I know, right, no, but seriously though, it is a little speck of blue green just in the middle of nowhere and there's just like things that can contemplate things here or like move at their own will. Mhm, it's so trippy. It's more trippy or more mind blowing than anything in the Bible. The whole, the whole idea of Life emerging from non life and then Evolution occurring.

1:54:06

That's way crazier than some guy died and came back to life. Way crazier, yeah, and it's like. I always wonder what's going to. So this is some of the stuff I've been

thinking about late, right lately is like this: Earth is not going to be Eternal, like the sun's going to get to a point where it's going to like expand the Earth, it'll have a solar burp and we'll be gone exactly.

1:54:29

And if we don't get off at before that, if we don't figure out, if humans don't figure out a way to get off the planet at some point and like, become like I don't know, have like a floating life, I don't know what do you, what would you even call it? like a, like a dome floating around in space with its own way of like, having plants and atmosphere and oxygen.

1:54:49

Terraform Generation ship, yeah, like a form ship. That's what I'm thinking of. If we don't figure out that an Interstellar, if we don't figure out that it's over, yeah, it's a waste of time. The whole entire project of the Earth was a waste of time, or we could just go underw under the oceans. You think we would survive that way, I think we could survive under the oceans. And then what?

1:55:08

You just look, how, look, how old? There's sharks that are ancient. That's you're really. You're smart, because you're, think about, think about it. There are species that did survive the apocalypse. if you want to call it that. Yes, maybe if we copied what they did, crocodiles, they're dinosaurs. I wonder if there's like Elites that have built underwater places where they can like go if something ever happens, for sure.

1:55:32

Cuz you have Denver, Colorado, you have the underground tunnels down there and that's where, like the president's, going to go. If anything, yeah, there, and there's the one in Virginia too. But I wonder if there's any underwater ones in the ocean somewhere there has to be bro, there has to, there has to be. I think that's are some un leaders that have that. If there's future humans here on Earth, they're probably hiding under the ocean.

1:55:53

Think so that's what Robert sepher thinks. Robert sepher thinks that there's underground white people, tall whites, tall nordics that are underground somewhere. yeah, well, that's what the a lot of the abduction there's, like thousands of these alien abduction accounts that have been written about and studied over the years, and a

lot of them they talk about these like Nordic looking humans being on these crafts, like talking to them. And I wonder why.

1:56:19

I wonder why Nordic, maybe it's just like, I don't know they. Yeah, explain they. It says they have these accounts. Recall them having long white hair and then being tall and like light kind of makes. It kind of reminds me of the Graham Hancock, the people who, the South Americans, that, yes, yeah, maybe they saw an alien very possible.

1:56:42

I mean, look, if they're time traveling back to us, we're probably just a blip on the timeline. they can, they can go way back right, they can go back really far. That's what George Johnnie said. Or Johnny said that he thinks that some of the I think this is what he said.

1:56:55

I might be this up a little bit, but I think he said that some of the we see in our past, like the Great Pyramids, could be future humans going back and doing that to basically like leave a trace that like let, like, give us a hint that, like, something's not right, like something you think. So I think that's. I think that's.

1:57:13

I feel like you could do better than that, though, than like draw, like build some sort of megalithic structure. I feel like you could do better than that, but why not leave like a technology behind that nobody can figure out. cuz, it's probably a puzzle p, a puzzle that we have to put together with our reason. You think it'd be too much to leave, like some sort of like space chip or something that can, like.

1:57:33

You can like press a button and it turns on like a. Yeah, but it wouldn't survive. Nature, you, yeah, it rust. The only that survives thousands of years is giant stone structures. But that means that they're not that advanced. Cuz, they're not that advanced that they can leave something behind that can stay through the elements. Then they had to have some limits on them. Yeah, but like what I'm saying is, you're still.

1:57:53

I'm still saying you're possible, but that if that's all their options are is to build a megalith structure and hope that we find it. that kind of says something about them in a little bit. Yeah, well, there's a. There's these megalithic structures that there's no

reasonable explanation as to how they were created. Yes, look at Thomas Payne's a, you know the you can describe. People are filling the gaps with aliens, right, they don't?

1:58:20

They're trying to like a bey tape. We figure out ET, the gaps with reason for how this was created. These two Mill, there's like over 2 million aliens, or God can't be anything else right? Aliens are God or an advanced or Advanced humans or Advanced humans, like. There's an idea that the human timeline is not linear.

1:58:40

That, like we Advanced, either there's this long timeline of thousands of years and somehow the Ice Age around 18800. Or when was the last ice age? 1.000. the last 1.000 BC, 1.000, yeah, 1.800 BC around, there were some sort of cataclysm that basically wiped out humanity and we had to re it, reset us back to the Stone Age. So we evolved so much and created all this crazy technology. That's how we built the pyramids.

1:59:12

We had a crazy different understanding of the world and physics and math. Everything we got wiped out and now we had to restart. Now we don't understand how this was made, because it or geani thinks in the future. They took their time machine, went whoop way back into the past and built this to confuse us.

1:59:30

It's all mindblowing, because if you think about it to sort of go with that for a second time, the timeline of History sort of does start around 1.000 BC.

Beginning Of History

1:59:41

yeah, that's when you start seeing like right structures that are built with designers that can like, withstand time and not just like not just Arrow was for hunting, but like kcle tape, not just kcle tape. Jericho, the city of Jericho, was a built around 1.000 BC.

2:00:00

The palace at nasos Creet there is a. There's a bottom layer at nasos Creet where there was some sort of P, some sort of building structure there around 1.000 BC also,

and then you have around 7 000 BC or 6 000 BC. There's a giant Palace there on top of it. So between 1.000, somewhere between 1.000 BC and 000 BC, which is the end of the Stone Age.

2:00:25

Up until the copper age, you do start to see civilization start to start getting faster and faster and better and better and better. All of a sudden they know how to use copper metal. It's pretty damn fast. But before that, before 1.000 BC, they're just according. I'm just using the scholarship that the what the consensus is.

2:00:43

They're just hunter gatherers for like hundreds and thousands of years and then all a sudden boom, they expl, explode in technology with just the last spec of time. Something happened, something happened, and you know, Terence McKenna is probably the most out of all the wild theories that are not stonee Theory, Stone date Theory. That's the one that I think makes the most sense.

2:01:04

I think so too, cuz it's like what, if, what, if humanoids or humans or whatever homo sapiens started eating mushrooms because they couldn't find anything else to eat, and they started tripping balls and thinking about space and thinking about math, thinking about thinking about this random, and they started thinking about writing down symbols. Then, all a sudden, you have writing hieroglyphs. That's what makes sense to me. Dude, I was.

2:01:26

I had this dude in here after the first time you came on here. I had a guy come in a couple weeks after who he goes to all the ancient Indian temples all around India. This guy lives in India, born and raised in India, and we were started talking about all the Hindu religions and all like the history of all this stuff, and he was blowing my mind. he was explaining that there's like a monkey.

2:01:49

You remember the name of the monkey? I saw this part where he's talking about this monkey. They eat these mushrooms and these monkeys are like the most evolved primates in all of India. We need to do a case study on this. We need to bring this to the Forefront, because that's Terence McKenna might be right. I had a biologist. She's not. I think she has a PHD now.

2:02:08

She didn't yet when I talked to her, but she's really smart, gut giig. Actually, her name, U. She has a YouTube channel, she's. I threw this at her. What do you think about this Theory? She's not sold by it, but she was like. It's not impossible that Terence mckc could be right. She was like. We just don't know. we just can't really tell. There's no way of testing it right.

2:02:29

But like it is true and this is what she was saying to me it is true that right around this time, 1.000 BCE, human intellect just explodes and then, all of a sudden, within the next 1.000, from 1.000 BC to the Common Era, you're seeing a straight uptick and human intellect like never been before.

2:02:49

It's like it's like a line like this, that it just goes up right, like just straight uptick in human intellect for the next thousands of years mhm. And it, but like those 1.000 years, is a speck. It's nothing compared to the hundreds of millions of years that things have been, that Earth has been here. Humans and humanoids have been around. It's nothing. Steve Pull up that Temple that Prine was showing us, the temple in India.

2:03:17

That's carved out of the side of a mountain and it's all one stone. It's insane, dude. There's this megalithic Temple, this giant Temple, carved out of. I think it's I, for it's not Granite, but it's khish. It's volcanic, some sort of volcanic rock, and it's this beautiful this. Is it right here? Yeah, KH, kalish, khish. Go to images. Go to images. It'll tell you what it's made of.

2:03:41

Oh yeah, it's the largest of the Rock Cut temples at the allora caves in. That's all carved in. It's carved out of one rock. They, literally they excavated it. So like they cut out all the negative space. It's not built like something we build, so they would have to find one giant rock to do this. yeah, exactly how do they? Giant Ro? It's a mountain made out of stone. Yeah, but what if the rock?

2:04:05

What if the stone had like different? What if it had like a crack in it somewhere? Dude, how do you plan this? That's what I'm saying. That's what I don't understand. This is

mind blowing. What if there was a crack in it somewhere? How did they know that the whole thing was solid? Right exactly, and they would have wasted all their time.

2:04:20

Look at, imagine if they're digging down there and they're doing a good job, all that whole top part they do. Then all a sudden they get to that bottom part and it's cracked, or there's like a cavity. Yeah, there's a huge hole there or something they had. you're right, they had to have known that this thing was.

2:04:33

One find some of the images from the lower angle, where it shows all the bridges, and that are there. Yeah, that one on the right, no, that's beautiful. No, close, that, oh, right to the go down right there. Yeah, that one's good. What this one? Yeah, that one should be good. Yeah, that's nice. Punch it on that. Oh yeah, okay, look at. So look at this. Look how small the people are. Look at that.

2:04:52

Oh, my God, that's huge M. It's three stories at least, and it's very similar in style to Egyptian. You know that. You know, it's very you can. There's a lot of people who pointed out that Egyptians and Indians have been in contact for longer than we think. yeah, they weren't separated that for that long in the bagita.

God Means Drugs

2:05:14

I made this connection when I Was preparing for this podcast.

2:05:18

I was I was reading the whole story about how is it Krishna? Krishna put a drug in his eyes, Arjun, to make him see, to make him see his final form or his univers. I saw that I was like: oh, it's the Som. That's what it is. It's the equivalent of the Greek Kon kukan. It's a psychedelic drink, and yeah, but it says they literally put it in his eyes so that he can see.

2:05:44

So he can see. Isn't that awesome, dude? That's incredible. they were saying that the Indo European word get who, which means to like pour or libate, mhm, is where we get the word god from. The English word for God comes from an Indo European

word that's also cognate with Kon and Som and ha. So drugs, the ancient word for drugs, the ancient drugs, I should say, are all cognate with each other.

2:06:14

Where it goes back to Indo European word guo, that word guo is cognate with the word God in English. So it's like. I can actually show you this: if you look up Indo European vocabulary, look at all those elephants, dude. It's amazing, dude. That's amazing, and, by the way, the Indians are indo europeans, their language. I think, I think the islamists came in and tried to destroy all this stuff. they did.

2:06:38

They did Indo European vocabulary. Yeah, right there, all right now can you do a word search? For, do a word search. Wonder if there's like an, there you go. That's no, no, that I know. It's in that one. That's why. That's why I said: okay, so if you do word search, type in the word liate, Al, i, b, a t e, all right, see, look at this.

2:07:02

Okay, this is going to be crazy to PO or invoke. Now, look it, look on the right. It's cognate with hom, the oblation of a viic ritual. That's the drug Som. That's what it's called, or it's called hom, who? So the word God? If you go up just a little bit so you can see the top where it says: go up English God. yeah, so you see, Indo, European, gu, English, God, Latin.

2:07:25

I don't know where funu comes from, but these people know. And then Sanskrit: hom. So this drug, what is hom? That's the Soma drink. Oh, that's the. That's the drink that makes you see the gods holy. So our word for God is, has a cognate with the word the drugs that are Krishna is using. Yeah, isn't that crazy? It is crazy, dude. So that the word God's connected to drugs? Yes, I think it is, dude.

2:07:50

After literally falling down this rabbit hole with you and Almon, like a couple months ago, it just. It makes the what makes the most sense to me. the easiest way for me to understand this is that these ancient people were taking drugs and it showed them the fabric of the universe and they thought that was God.

2:08:07

Well as I, as I've mentioned many times before, I've had a lot of experiences with DMT, and those experiences with DMT has me convinced that our religion comes

from psychedelic experiences? Yeah, so I don't know what happened, how they got away from that stuff. A lot of primary sources reflect it.

2:08:27

You know you have sources of the Hebrew Levites: smoking cannabis in the hot holy of holies, or hotboxing it like lighting it on an altar lighting. The whole thing get filled with smoke and it's the. It's the aroma of God. You have the kakon in grease drink, drinking the wine mix with the Urgot.

2:08:45

You have the Som, you have the Hara and Persia, you have all these different types of psychedelics and they're all connected to these major priesthoods. Then you have a Eucharist in Christianity, MH, and then all of a sudden drugs are gone. So it's like what was the theak? That was like bunch of snake Venoms. The thec was the romance era, drug mixed with Venoms. Yeah, that's what, gayin, there was a ton of.

2:09:09

Can you find the ingredients list? I don't know if we know it all, but you can look it up. Yeah, type in the ingredients list for the theak. I think it was like 12 different North African Viper venoms. Oh, they do know it. I didn't know they knew it. I thought I thought it was a mystery. here we go.

2:09:25

According to commentary on Exodus Kisa, the Spanish scholar Moses Ben knockman list the ingredients of the theak: lein, honey, flesh of wild beasts and reptiles, dried Scorpion and Viper. Oh, was flesh of Viper, dried scor, scorpion, what the hell. And I know, I know that dried scorpion is a psychedelic. I found that out. They got a bunch of roots. Really. I said they had a bunch of Ro Roots.

2:09:50

Wait a minute, hold on, stop right there. That's where you get DMT from extracting from Roots m. Is it a specific root? It's. Almost every root has, aay, some sort of DMT in it, every single kind of Route. So Mimosa hostilis root bar, cinnamon. So Mimosa hostilis root bark and ACAA confusion root bark have the highest levels of DMT.

2:10:12

Right, but it's said that every kind of root bark has some little bit of DMT in it. So those can all have DMT in it. Just a little bit of amounts of it, right, didn't? Almond

also say there was like bodily fluids mixed in there. Yeah, fruits, flowers, fruits and seeds.

2:10:28

Oh, by the way, you have to add what's called Syrian root seeds to your Acacia root bark to convert it from DMT to iasa, because it's an MAO inhibitor. Right, right? So those seeds might. There might be MAO inhibitors. How do they figure that out? Dude? But I but if I had a guess, that's what's going on.

2:10:47

You have the seeds, you have the MEO Inhibitors, you have the DMT roots and you have all these other types of stuff mixing up with this, making this super magic potion to meet the gods with good God. That's a ton of ingredients. I know it's nuts. Dude, it's nuts. I wonder if anyone's tried to recreate it like in modern times.

2:11:04

I want to like, I want to see, I want to do it when I come down here. Yeah, I want. I want, like some sort of like pharmacologist chemist, yeah, some help to tr to try to do this and try to make it. I don't know if it'd be ethical. You know if you really took Alm easy to make DM, though if you took almonds, literally Ione can make DMT. It's super easy.

2:11:21

D so easy to do. Just get AA, AAA confuser. Root bark or Mimosa H root bark is legal because you can use it as Dy, purple dye, purple dye. I'm not kidding. You can use it as purple Dy. I've done it before, isn't that rhin blowing? That's is why I take Amal seriously sometimes, cuz you can sometimes dude: he's right, you know what I mean.

2:11:40

But so okay, you can use that purple D and it's legal for that. Yeah, but if you don't use that purple D, you can. You can add it to hot boiled water, M, and you'll see the layers. Mix up together, you got. Add conf, a acostic soda. You got to mix it up with CTIC soda. Get it real hot and then the layers start to separate. Shake it up real good.

2:11:59

Shake it up real good, probably let it sit for a day in a hot bath. The next day you add the NAPA is in the Bible too, for anyways Napa's in the Bible. So you add it with the Napa. Then you see a th thin layer on top that's clear and a big thick purple layer on

the bottom. You extract the thin, clear layer from with a pipet. You know something. You extract it with M.

2:12:23

Get a little, get a little py. This is how easy it is. I'm almost done. You get a little Pyrex dish of glass pyck dish. Squirt the extraction in there, put it in the freezer overnight. The next day, when you take it out of the freezer, you'll see the DMT CST on the bottom. Really Napa does not freeze. so you dump the Napa out, put it back in your dish or whatever.

2:12:44

You can reuse Napa like seven times, and then you dry out those crystals and it becomes it's pure DMT. Wow, it's that easy. It's that easy. Smoke it. It's the best way to do it. Smoke it, yeah, you have to vaporize it, right. So you get. I just taught your out inside. You go to heaven for you. Go to heaven for N 10es. I have. I've have experiences that I'll.

2:13:08

It won't even do justice to try to talk about. It's only just you just. It's just that. It's life changing. I told you about that D. You go into different places and come back. You literally are gone and come back. I told you about the, especially if you close your eyes and do it. I like.

2:13:23

I used yeah, I used to take a beanie, just put it over my eyes when I did it, because when your eyes are closed, you go into your head and you just you can just want. You just drift off into outer space. When your eyes are open, you're focusing on your environment and then you're not focused on the on. You want to.

2:13:41

You want to meditate, you want to be like you want to be like sitting there like this. That's why I just put a beanie over my head and that's and then any distraction. I even put earplugs in, because any sounds from the outside will wake you up.

DMT

2:13:53

interesting.

2:13:54

You want to be completely distracted from everything and then, whenever I, whenever I would let someone do it, someone wanted to try it, I would give it to him, show him how to do it and I would leave. I'm going to go leave for 10 minutes. I'm G to leave you by yourself. I don't want to because I don't want to sit there and bug you and ask: how is it dude?

2:14:09

Yeah, I would hate that. I would literally show them how to do it. Here you go. I'll even do it before you. Show you how. Show it's safe, I'll do it before him. They'll watch me trip. They'll be like whoa, dude, you were tripping that bad. Yeah, that was fun, that was amazing. It was ecstasy feels amazing. so now you know how to do it. You watch me, do it.

2:14:25

Here you go, here's your, there's your dosage. I'm going to walk away, I'll be back in 10 minutes. Cuz you'll be, you'll be sober by then. Cuz, that's how. That's it. Five minutes, you're back to normal. There's no, there is no cown, there's no. How often, when in your Heyday, how often would you do it? There was time periods where I would do it every day. Really, there was time periods where I did that.

2:14:46

I had some, I had some, some had. I had some DMT f? Es. Let's say that my biggest fear with it is not being able to come back to reality. It's never happening ever. It's impossible. It's impossible. It's impossible. I mean not being because the half life of DMT is. it's physically impossible. I don't mean like permanently tripping, I mean like it. It actually something rewrites your brain permanently to where you don't.

2:15:10

You no longer think the way you used to think it does in a good way. I think it makes people smarter. I think it made me smarter. I used to be a dumbass. I used to never do good in school. I used to not pay attention anything. Now I'm all improve. I think it improved my thinking.

2:15:26

I really, I honestly do think that, because ever since I, when I had that DMT phase, I was kind of just like a loser, doing pouring concrete and working living in a dumb,

umpy apartment, and then after that I got really want, like, started wondering about things more, started studying things more, started researching things more, and then next I wound up nistic and it and I: there's got to be some connection that way.

2:15:51

Right, yeah, but that does that happen to everybody, though? Or there some people that just never leave their apartments and just Fu stay? Maybe that I couldn't tell you. It's interesting.

2:16:01

I told you I had a guy, Andrew gallamore, on the show a couple about a year ago who was in Tokyo and he's studying this stuff full time and he's doing this Extended State DMT research where he gives people like an IV drip of DMT all day, where they keep him in, they pull them out briefly and like, tell me what you're seeing.

2:16:17

Tell me what's going on and they're trying to like, map this whole DMT realm to figure out what the really going on and what's there like. Is there a veil that just go that drops when you're not on? I wonder how successful that's going to be because, like I said, when you're on it and people are talking to you, it takes away from the experience.

2:16:32

It's hard to stay focused, because people who have done it are going to understand what I'm saying about this. Yeah, there's some sort of like. You have to kind of d off for it to work. You have to kind of doze yourself off if you're focused on the world, that if you're focused on all this, you'll stay here.

2:16:46

You can like hold on to this world if you really, if you really wanted to, if let yourself doze off and you just kind of you know how you Daydream and you're just like, if you do that, you're going to go off into another. That's how you blast off from dozing off, letting yourself slip, like I said. That's why I use the beanie when you close your eyes and do.

2:17:04

It's the best way to do it, because you're not focusing on the world around. You're just in your head, and that's the. Those are the best ones. When you're just gone in your head, right, you just start seeing like anything, start seeing color, start seeing

shapes, start seeing crystals, start all kinds of weird smoke. Sometimes it's all Smokey or something like. It's really weird, dude.

2:17:26

It's hard to explain and Joe Rogan did a good job explaining it long, a long time ago. This is from an old clip where Joe Rogan says it's like: imagine if you had gold, liquid gold in your hands and you're trying to hold on to it and it just slips through your fingers. That's what it's like. You can't hold on to it. You want to hold on to it.

2:17:44

You can't take it with you, can't take it with you. Really, you try to remember things like. I've always told people when I'm my biggest breakthrough, when I met a god that looked like Brahma, and I tell people this all the time and I'll never forget it. I remember, I remember it like it was yesterday, but I and I specifically remember having a telepathic conversation with this being on DMT, but I don't remember what it was.

2:18:08

I, when I came back down, I forgot it. I don't remember what the hell we were talking about. Who knows, I have no idea. So how do you not remember that? I'm like. Just don't remember it. Yeah, it's like have? it's like when you wake up from a dream every morning you wake up from a and you're like I had a crazy dream and 5 minutes later you get up, walk around, you forget your dream.

2:18:24

It's the same exact thing and I think dreams. I think DMT is like dreaming like there's a, there's a guy, there's a video. I watched on YouTube Once where this guy was explaining how, when he used to take DMT, or when he I think he was taking mushrooms or DMT anyway, when he was young, he got in a car crash and he almost died and he said he had this near death experience where he saw all these beings and stuff. cuz people say like when you, when you have a near death experience you.

2:18:47

There's reports of people like going into different Realms and like seeing crazy. He said this happened to him when he was young and then, when he got older, he went with his buddy on top of a mountain top and he took either DMT I think it was DMT and he said he saw the same entity he saw during his near death experience and he said the entity said to him: he's like you're not supposed to be here.

2:19:07

What did it look like? Do you remember? I don't know you'd have to pull up the video again, but he said: I think I think it. I think it maps on to our own understanding of things, MH and like at that time when I was doing that.

2:19:19

I don't remember ever research, searching Hinduism, but there might have been a time where I saw a Brahma and a painting, and it just kind of stuck into my deep Consciousness. And when I tripped I saw that and thought that was like what God should look like, for whatever reason. But I'm, but I don't think I did. I don't remember being big. I remember finding that paint.

2:19:38

I remember seeing images of Brahma later and being like. That's the guy I saw on DMT. So it's like it is a little weird that that played out that way. Just to be honest, yeah, it's is an interesting correlation. Like he had it had it, had he whatever, had multiple hands on one side and they were all moving. You know how. I remember you telling me this.

2:20:01

Indian gods had that and it was like this: on the other side and his head was multiple heads spinning and he was sitting Indian style, and he was wearing robes like golden shiny robes white golden shiny robes and there was like things orbiting him, like space, like planets or something, or stars or something. There was like shapes looked like they were orbiting him. Yeah, and it was all smoky in the room, like white smoke was everywhere.

2:20:30

It was weird and that was one of the biggest breakthroughs I've ever had and I was, and it's stuck with me, like it's like life changing. yeah, then I had random ones like. One of the random ones that I had was me and my, the girlfriend I was with. At the time. We went to the park in some like Forest, somewhere I don't know where we were and I was driving the car.

2:20:53

There was a lanyard over my with the keys of the car and she wasn't doing it, but I was. She was just there. I took a rip of it and all of a sudden the car keys this is the car

keys started shooting lightning bolts out and I thought I was going to hit her and kill her started shooting.

2:21:12

And then all a sudden I was like I turned around and I looked up and I saw in the sky. It looked like Mickey Mouse and he was taking cloud. he was in the sky look, looked like he was like just sitting in the sky and he was grabbing the clouds and putting him over himself like a blanket.

2:21:26

He was turning away like he was like cold, and he was taking the blankets and covering himself with it. Right it just random, so it had no meaning. Just my mind was just gone and the first time I ever did it, I oh my God, I didn't know it was going to work or not. I made it myself with my friend from Lebanon.

2:21:43

Muslim dude was doing it with me and I haven't talked to that guy in a while, but anyways. So we're at his apartment, we're making it and we, we, we do it. I we had a what is it called a volcano vaporizer? the best thing you can do for DMT, cuz it just perfectly vaporizes. It took a rip, got that bitter taste and I look at my friend and he's got.

2:22:08

His face is just like mt. He has a an eye on his forehead. He had third eye growing out of his head and I go. I got to go outside. I went outside and the be the. Everything was beautiful, this. The plants were like had faces on them. They're talking and breathing. The sky was beautiful, blue, perfect sunny day out. But then I looked up and I saw a spaceship fly by, and I'm not kidding.

2:22:32

It looked so real. I thought I was like. That is, it was huge. it's like half the sky was a spaceship flying right past me and I was like: do you see that my friend just came back down from doing his head and he was just like whoa? And then we walked around for 5 minutes and then was gone and I was like: do you feel it anymore?

2:22:52

He's like no, I'm like that's it my first time. I remember people saying it takes 105, right, and I remember looking at. I remember looking at my friend. I go, how much time has gone by? The third friend we were with wasn't, didn't do it. He's like 5

minutes. I go what I like. It felt like at least 20 minutes. He's like no, that was five minutes. Wow, so it was kind of kind of crazy.

2:23:13

Yeah, what if all that shit's just there all the time? That's what people think. All the you see on DM, you see on, and DMT is just tearing down your senses. It like, gives you an antenna so that you can like all of a sudden. Now you're locked in like Bluetooth, mhm, like you can hear it or you can see it. You know it's kind of crazy to think about.

Third Eye

2:23:32

You're going, you're getting catapulted right into the world of the Muse, the muses. That's what these, this Rosa crucian, these people that have all these practices to like, connect themselves to this like ethereal Consciousness. Yeah, I've heard about it. They have, like, different protocols that they use where, like, they won't have caffeine, they'll meditate and they have these.

2:23:56

These things they try at the end of the day, where they try to like recall their play their entire day backwards in Reverse, like everything they did, and it's some supposed to like strengthen their antenna to this other realm or whatever. Really, yeah, have you never looked into sanism? Yeah, I've heard about. I thought it was like a new age Christian SL spiritual mysticism movement.

2:24:19

Yeah, it's more spiritual mysticism, like they're really into UFOs and connecting to it's like: what's the guy's name, the philosopher who wrote about the neosphere shardon? Oh yeah, somehow tied into all that stuff. Yeah, I don't know. Is anyone you know anyone is into that? No, neither do. I've met people. I've had people on the show who are really into it. yeah, but I don't know anyone who like actively practices it.

2:24:47

But I've read about it. I've heard that in the Eastern religions of Kundalini, people doing kund delini meditation and like feeling a serpent crawling up their spine and like letting them have like a some sort of psychedelic experience by meditation

without any drugs. Yeah, so I've heard people say that works breathing. You can do it by like hyperventilating with your breathing like the Wim Hoff type. You can have this same kind of experience. There's.

2:25:14

I guess it's never been debunked yet, but it's not like proven. But that, like our brains have DMT in it. Yeah, yeah, I think I think it's true, right, they say they say that there's theories. That's what causes us to dream at night, causes us for REM like the REM. that makes perfect sense. Well, you know, there's, as someone who's done, DMT. It's like dreaming the pineal gland.

2:25:33

I think we have a pineal gland in our brain which is supposed to secrete DMT. The theory is that's what secretes the DMT. That's responsible for the top of our antenna. Yeah, but like I think I could be wrong. Certain reptiles have in their pineal gland. They actually have like a retina on it. Really, to where it like an eye, like an eye, like an eye. We have an old evolutionary Dead Eye.

2:25:58

Can you Google that? Can you Google? That would be cool. If that's true, reptile, pineal gland, retina, if that's true and we have, we have an actual eyeball in our brain. that would be mind blowing, like one that's been calcified and kind of like devolved. You know, people go. People say like: don't drink water from the sink, it's going to calcify your or whatever decalcify your third eye.

2:26:21

Some reptiles, like the Green Iguana, have a partial eye, which is a structure that contains a retina and a lens located at the top of the head, beneath the skin. The partial eye is similar to the eye in terms of embryological development and as the genes Express during this process, but it's usually covered by a thick scale that can be only differentiated between light and dark.

2:26:45

It's not functional in most reptiles and Fades as they mature, but some lizards can use it to detect the blue and green light, which helps them to tell time of day. the partial eye may also help reptiles sense danger and navigate by detecting shadows and changes in light. Damn, go to images. So are we? So if we're, if we're Evolution? Well, Indians believe in reptile Gods too, right? Oh yeah, so are Greeks. It's paral Eyal.

2:27:11

There's a. There's a good picture of. Look at that, dude. Is that what is an eyeball? There's another one right there per ey, there's a lens and a retina. See out of that thing, or they just sense things. It's a sensor, right, that's crazy. And then find a picture of a human pineal gland and wait. So do you think that, since evolutionary wise, we're connected to reptiles?

2:27:34

Some somewhat, you think that's part of what we have up there? Maybe I mean third ventricle, the third ventricle. What does ventricle mean? didn't you hear almond telling me about the third ventricle? Yeah, it's the Water of Life. Yep, cuz it's. There is a liquid in there, yeah, and he thinks they use it for the drugs pineal gland. There's a decent image. He holds those sources to himself sometimes I don't. I want to see the.

2:28:01

I want to see some more galin from him going forward, but I know it's he dude, I'm not. I know he's not lying because he, whenever he does show me that it's there the purp, the purple thing. I didn't know if it was.

2:28:13

I remember I've run into sources about purple a lot, especially with like jus' lexicon, where you have like purple y Bak chance and there's like the Bak chance, but they're also could mean purple. And then I was like, okay, what about the burning purple? Well, there is this one source from diores. It does actually mention burning CA porur, burning per burnt purple, and it's used from.

2:28:40

It even says it's used for many medical things, including healing. So I'm like, oh, he's not lying about this, right. You know, after listening, I was listening to a podcast where Jordan Peterson was like elucidating the Bible and Jesus Christ and the whole history of religion and Christianity, and he was basically. You know how Jordan Peterson does it.

2:29:05

He like, lays out how this philosophical framework for Morality is there to help us be a efficient and Co and a structured Society. He, he makes a case for Christianity somehow being a way to make Society work in a way that we can all live in harmony. Right, and the more you think about like I was trying to conflate it.

2:29:32

He tries to make that argument that Judeo Christianity is the moral ethics behind all Western culture, as if going against what I've been saying this whole time. Right, yeah, but like, when you think about how alone describes this stuff, he's looking at it from a completely different perspective.

Ammon Hillman

2:29:50

He's looking at it from like a once you, if you take the way Jordan Peterson describes this stuff and describes all the philosophical ethereal layers to how this is a structure for society, if you excavate through all the layers of stories and myths and philosophy that's been written about Jesus, he, like amen, describes it as he's basically what he's done is taken like the very bottom layer.

2:30:21

Right now we're like way up here and there's all these layers of dirt below it and what he like. He talks about it in a way where he's talking about exactly what this guy was doing. It's like. It's like almost like as if he is dug up the base layer, the biological dirt and Bones of this guy, and like what was what he actually was.

2:30:48

He's basically saying that all of this context of what, these, of what was going on back then, we've lost it. Now we're in a different Paradigm which in a way he's right, the there's, as I was talking about earlier in this podcast, the 19, the 18th and 19th century was a paradigm shift away from.

2:31:08

You know church run kingdoms, you know different kingdoms all connected to the church, where now, all sudden it's like liberalism, freedom of speech, all that was a paradigm shift. But before that there was another paradigm shift and it was that ancient Greek drug, orgastic world with philosophy right, with people living ethically, with all that stuff, but sort of like mixed together right. and so he's sort of bringing back that culture.

2:31:33

He's bringing back the biology of it. Like, bring it back the biology, the nuts and bolts and Bones of this thing. Like he's pulled out the skeleton right of what it actually was, and that's been one that's been like deeply buried that no one's seen ever. And then again you have to look at it. Like, is he biased? How biased is he?

2:31:57

Because think, if you think about him and the psychology of alond and how he was over by the university and basically told the what was he? They said that the Romans wouldn't do such a thing right. How that basically get a classicist like him, who spent all of his life studying this stuff and wanting to find it out.

2:32:15

There's not much more you can do to motivate somebody to shove it in their face about how wrong they are. Like he's dedicated. He's driven to basically prove them wrong. I bet and I almost don't blame him, you know I don't either it's he's got his Muse, and that's what this Muse is telling him. His Muse is a dead girl. That's what he says. It's a dead girl.

2:32:45

In fact, what I want to do is, when I move down here and I already talked to him about this I want to set up discussion where we just let him go. We need to let him, we need to get him to move down. Here too, we need the devil to move down. Well, I'm going to have the apartment that I looked at is going to have.

2:33:00

I'm going to have a room for the podcast, for you know, for podcast whatever, recording and doing, doing videos and working out. You know an office room and an extra bedroom for people to come in that so I can have people visit and you know I can have guests come in. It'll be a guest room, mhm, and that way, you know, I can get i'mm one down here, get whoever else down here.

2:33:20

I reached out to. I emailed probably two dozen classicists from Harvard and other universities to talk, to talk to. They don't, none of them want to do it. None of them want to do it. In fact, one anyone respond. One of them responded. One of them who actually. I can't remember his name right now, probably better. we don't tell his name, yeah, but he actually is a. He's a Bible scholar and he's actually studied Greek.

2:33:46

He's probably knows more Greek than any Bible scholar and he know. He respond: you probably do, I'll, we'll look it up after we're finish recording. But he actually responded to me and he said he doesn't want to give amen that platform. He's like it doesn't deserve. It doesn't deserve the platform, he doesn't deserve the oxygen. For how? For he's saying: for it's that bad, he says that amen's so far off. Oh like.

2:34:09

He doesn't deserve the time, like it's not worth his time to even talk to him because the guy he doesn't want to give him any more attention. Well, why not? You could have made your make any sense. People just afraid of him. I don't know. it doesn't make.

2:34:23

The reason why that doesn't make any sense to me is because you can, you can be the next flint dible and have, like your moment of Fame, debunking how hor, if it's so bad and so wrong right should be able to come in here, sit down and show with the sources why this is nonsense, and then you'll be able, you'll get Fame from that.

2:34:40

Well, here's the hard part about that is, you can't just look at the like. It's easy for him to say: the sources say this, but you can't. You can't fact check him because no one else read the sources, but these guys supposedly both can. And unless you have somebody who's really fluent in the Greek, who's right, all the same, that he has right. That's what I'm saying.

2:34:57

And if he could, if he can, if they can both come in here and he can pull up these sources and say: what does this say this? That's what I'm saying. If this guy's so confident that ammon's so bad that he doesn't deserve the platform for that, right, it doesn't follow. No, it's so bad. I'm coming in there right now and I'm shutting that down, mhm, because he already has a platform, that ship's already sailed.

2:35:17

Yeah, so you're not. You're just letting him now. You're letting him rock out without checking him. Yes, so, you are platforming him by not debunking him. So that way, you just that guy, can't be that smart for me to just think about that right now. Yeah, that doesn't even follow. This just logically made no sense, right? I'm not giving a platform. no, we're giving you a platform to show why he's so wrong.

2:35:36

You know, yeah, and the fact that he's so dedicated to this, like he's so rare in the fact, like he want, he refuses to monetize his YouTube channel. Did you see that article from medium from somebody? He sent it to me last night. I read it last night long article. It mentions my name in it too. Yeah, you know, it's interesting too. When I brought up to him, I'm like.

2:35:54

What do you think about the Anunnaki and the Nephilim? Yeah, I saw that part. He's like. Ah, he like laughed at it. He's like. That's such right. I'm like. You believe all this, but you don't believe aliens. You don't believe anunaki were aliens? No, he thinks that. I think he said that the Giants meant like they were intellectual giant. If it ain't a Greek Source, you don't believe it right?

Annunaki Putting Gold In The Atmosphere

2:36:09

Yeah, it's funny.

2:36:10

Where did the anunaki alien concept come from? That came from? Who's the guy who was a oh s dear s? I was thinking I drew a blank too, but yeah, I always drew a blank on his name for some reason. When were the, the, those texts, those tablets? When were those made? When were those discovered? Yeah, yeah, no, when was that? When was the Sumerian? When were they written? When was the Sumerian civilization?

2:36:36

3 000 BC? 3 000 BC, I think it's. I think they start in 3500 BC and then they replac by the Babylonians at 2500 BC. Oh okay, so it's like 3 000 years, something like that. I mean 1 000 years, something like the. That's crazy. Like he said, they were trying to like. They were trying to like mine gold. So they can put gold particles in the atmosphere to.

2:36:56

And now you have there's actually science, an article. Is that true? Well, that's what siten writes about. He says anunaki were trying to use gold to put in the atmosphere

for something. And now I think recently climate scientists came out to say they can put gold particles in our atmosphere to stop climate change. Wow, can you find that? See if that's real. If that's true, then you got to give cision a point there for that.

2:37:18

Put type in, like climate scientist, gold particles in atmosphere. See if that's real. I saw that. I heard that somewhere. that could have just been some crazy conspiracy theory I saw on Twitter, but sometimes that comes true. I think I heard Joe Rogan say that before exploring how gold might be used to help be. Article. Not a YouTube video. World gold Council. Not a YouTube video. It's an article. Okay, well, I'm just scroll down.

2:37:42

Yeah, okay, NASA's gold finds surprising shapes in the atmospheric gold. Going for atmospheric gold. Now NASA, a startup says it's begun releasing particle. Click on that one. What about the NASA one? A startup, a startup, says it's begun releasing particles into the atmosphere in an effort to tweak the climate. Is it gold? Go down, gold finger. Is this the same article? Those are the only mentions of gold in this article.

2:38:11

So it's going to be something else. What's that one? What's? yeah, atmospheric gold 2018 For the First Time. S sorry punching on that global scale. Observations of the limb and dis gold instrument launched space, the commercial Gos, in all two ways. No, I don't think this is it, is it? I mean I saw some. I've heard about this. I heard about this: gold particles. You, you don't have particles in there. Yeah, particles, scientist.

2:38:43

Okay, tiny gold, okay, there we go. We found it is f org physics, org. Tiny gold particles can help harness energy from the Sun to break down pollution. I wonder what the technology is. When organic pollutants such as dyes, AR, agricultural chemicals and pharmaceutical enter waterways all around the world, they can harm the environment and human health, and removing them can be incredibly difficult.

2:39:08

Substances that absorb energy from light can be used to accelerate the rate of chemical reaction. To solve the problem, the researchers say having their sites set on finding photo Catalyst that can harness much more of the solar Spectrum. If you can

use solar light, it's cheaper and much more available than UV light. Gold Nano particles, key dude, yeah, no, you're not lying, that's definitely. They're definitely talking about that. That's kind of crazy, huh, that's nuts.

2:39:41

That's I mean, like. The question is: did set, was something like this going on before siten wrote that? Or is siten just guess right? No, this came out. This came out way after this came out in 20.2023. Last year, 2023, yep right. So what do you say about that? I mean all the Sig haters, at least admit that he was, you know, guessing some good things on that one, right? Yeah? Or maybe his translations right?

2:40:09

Never. I couldn't tell you that. Yeah, I go with Samuel Noah Kramer when I go for Sumerian translations, because I love his. He's translated like tons of text. That's where I found the story about Anana. Does he still alive or no? I think he might have just recently died. He's an older scholar. I don't know if he's alive or dead or not, but that's a good question. But he translated.

2:40:33

The Descent of Anana, the katabasis of Anana, where she dies for three days and then resurrects and brings the dead up with her. So that's like a clear example of a Dying Rising God all the way back in the samarians. yeah, just like when we're talking about the Gods, there's something with that three day thing that shows up in a lot of different sources.

King James Bible

2:40:54

So when Dan mlen came on the show he was saying something about, there was one Bible that he says is complete. I think it was the King James. King James Bible. Yeah, why did he say that King James Bible was because the King James well, the King James had all these different, like Bishops or whatever, whoever, whatever they're called, and they got together and they had convened that they were going to.

2:41:17

They were going to create a English Bible that was in uniform. That was there, had no contradictions, and want, wanted, want, wants it to say what they want to say. So they

made little changes in certain parts that they wanted to censor. they, they tweaked. They went with manuscripts that they agreed with them. They went with certain lat. They Ed certain Latin manuscripts that aren't in the Greek. For example, I'll give you an example.

2:41:46

The verse 1 John 57 has an extra like 10 words at the end. That doesn't show up in any of the ancient Greek manuscripts and it's a trinity. It happens to be a trinity verse that says that God is, the father and the son are one, and that doesn't show up in any of the original manuscripts. It's only in Latin and they choose that one.

2:42:09

But so, basically, they're making a Bible that's perfect, has no contradictions, completely in uniform, and it's in English, and it's the first time it's ever been done like that. They also the numbering systems at that time. So that's why. that's why, when you find newer Bibles NIV for example that says verse omitted. So let's say there's, you're reading Mark and all of a sudden it says Mark. Verse 8 says: Jesus went to the waterfall.

2:42:34

In verse 9 says verse omitted, and then verse 10 back to right. People go, what's going on? These Scholars are evil. They're deleting verses. The King James has the verse. That's cuz. The King James has added verses, and it's not that the NIV deleting verses. They're going back to the original manuscripts and they don't have that verse.

2:42:54

So they have to omit the verse because they're using the same numbering system that the King James started right, that they have to have the same numbering system order to be able to compare Bibles. So that because they use the same numbering system, they have to emit verses. And it's not that they're secret satanic Scholars trying to delete Bible verses.

2:43:14

It's because they're using the original manuscripts and the King James Bible as actually the secret, evil ones. I'm just kidding. No, but they're the ones that added the verses. Ah, okay, I see. So somebody broke it down on the internet. They answered a core question. This guy gives a great example where Jesus was placed in the Tanaka, whatever that is.

2:43:34

And yeah, they're making it where all of the past tense and present tense words changed to F, future tense. Yet all the other uses of that word were kept in, weren't tampered with M, because they want to make it more christianized, the Old Testament has to have Jesus in it, right. So I here's another prime example: the Old Testament has to have Jesus. They want to have the Old Testament point to Jesus more obviously.

2:44:02

Okay, they can't add Jesus there, but they want to make it look like it's Jesus is there. So I'll give you a prime example in. I think it's Daniel. In the CH, in the Book of Daniel, where it talks about the sons of God, it says a son of God, it is Daniel. in Daniel it says that the three men in the fire were saved by someone who looked like one of the sons of God.

2:44:28

Sons of God in Hebrew is Benny Elohim, and it translates into Greek as Angelos. It just means Angel. So in Hebrew, Benny Elohim is Angels. They call it sons of God, but that's what they always called it. In Greek it's angalo Angels. So basically what the verse says, and something like an angel: save them.

2:44:47

In the King James Bible they take the plural away and they say: and something that looked like the Son of God came and saved them. So it's like there's Jesus and Daniel. He's the son of God. So they're. What they're doing is they're? They're unifying the Bible so that it all is harmonized. They're harmonizing it. that's the best word to use me, not unify.

2:45:06

They harmonized the Old Testament with the New Testament and they harmonized all the gospels and they basically chose their translation that it becomes like the perfect Bible in their opinion. Okay, so it's a good bible to read if you're looking for a nice, poetic Shakespearean Bible.

2:45:23

Yeah, it seems like Dan was very, you know, it seems like he's pretty nuanced in a lot of the things that he talks about, like he doesn't just go by the book when it comes to some of the stuff, like some of the, he's critical. He's very critical, super critical, yeah.

2:45:37

And even with the stuff he does online I was just talking to Derrick about this because Derrick wanted to interview me about my deep beef with Dan yesterday and he's like: what's up? what he's like. Dan's a good dude, like what's up and it's like: no, I agree with you guys. I think he's a good scholar. He's very smart.

2:45:52

He knows what he's talking about, but he steps out of his element when he starts talking about Greek and Roman classic stuff. He doesn't know any of that. Like he doesn't even know how to pronounce Dian isis's name right se semile. He says samil, like if you don't even know how to pronounce Di's name, mother's name, right, why are you even talking about this stuff? You're, and it's so obvious that he's out of his element.

2:46:13

He's like you. Like when you show him the hararia, his face was like this: yeah, he didn't even never heard of hararia before. yeah. So why would you have a an opinion on it if you never heard of it? And, by the way, you said something in that interview or he you brought up the hararia. All you did was show him what was on the bronica. You didn't even say anything about Easter.

2:46:34

And then he's the one who brought up Easter and goes. The idea that Easter has anything to do with this is nonsense. You didn't even say anything yet. So he was getting defensive already before you even said you think this influence is Easter. You didn't even say that. He just jumped to that conclusion before you even finish talking about hararia. Yeah, what does that tell you? So he's out of his element.

2:46:54

Sometimes he talks about things he doesn't understand because he's got the PHD and he is very smart, but what it does is he's puffed up in one because he knows a lot about one area. He gets puffed up in other areas that he doesn't actually know, right.

First Bible

2:47:06

That's my criticism, d m. And what do you think about? What is? What is your current stance on the idea that the Old Testament was originally Greek?

2:47:18

I don't I, so I don't have the ability to test out which one came first. If I had to guess, I think the most convincing is that the Torah was written first. The septu was translated around exactly the same time like within decades. It was translated after it was written. after it was written. I think I think the original text was not even all of it, though.

2:47:41

I think there are original Greek compositions of the Bible, for example, ma, is it not mccabes? Some of the Old Testament texts are written in Greek. First there's parts of Daniel that were written in Greek. First there are parts of Songs of Solomon that could have been written in Greek. First there are Psalms that written in Greek first, back in Hebrew.

2:48:02

Some of it, some of it, was Greek, but then, but I'm saying, the Genesis Leviticus. Those books probably were written in Hebrew and then very quickly translated, they're all helenistic. Yeah, they're all written in the helenistic period. That's my, that's my stance on it, right? Who's the guy you recently talked to? That was explaining this? the guy you did a zoom with some. Gad bar and Jonathan Edler after that too, both talked about it.

2:48:25

Jonathan Edler weren even farther. Yis Ed was like: yeah, it was probably written around that time, but they don't start practicing it until 150 BC. That's what he says. He says they're probably. They probably started writing it around the third Century BC and they don't start practicing until 150 BC. Gad barneo was like. It's so clear: before 300 BCE there's no mention of the Bible.

2:48:48

There's no sources of the Bible, there's no evidence of the Bible. And after 300 BC all of a sudden the Bible's everywhere. So he says it's so clear. The evidence points this way right. So that's my. If you have to ask me what came first. probably. There's probably Hebrew scrolls. First individual Hebrew scrolls of Genesis, next to Leviticus, next to Chronicles and Kings and the prophets. They're all individual Scrolls.

2:49:13

They're probably all there, but then they get brought to Alexandria and then translated into Greek, and then they all gets compiled together at the same time. Right, that makes the most sense to me. Right, wild, bro, it is, we just did over three hours. That was fantastic, fantastic hungry. Now, oh, you want to do patreon. All right, we're going to do a patreon. We got some juicy questions from the patreon.

2:49:34

So we're going to do a patreon Q&A with you. But tell people where they can follow your podcast, your YouTube channel, all that stuff. Nastic, informat on YouTube. That's it. And I'm also on Twitter. SLX, atnos. look up Gnostic and forant on there I have a second Channel that I upload Clips on. You can find the link to that through the main Channel. But just look up Gnostic and on YouTube it comes right up. Yeah, we'll link it all below. thanks. man hail Satan, everybody hail Satan.

Scribe is also available for iOS
